Seradex OrderStream
Technical Release Notes
April 2021

ClientReports.dll

6.4.90	04/12/2021	I2104014	Telerik report one click print will again skip the print dialog window.

DataTransfer.mdb

6.4.279	04/14/2021	I2012224	Added new DBOX Groups/User Types to support more levels of Customer logins. Added new core searches to support the new logins, (some of the new logins cannot see pricing for Sales Orders or Invoices etc.)

DBox Web Front End Components (WFE)

6.4.27	04/14/2021	I2103067	The Sell Items display category page will now only load as many items as should be shown on screen, instead of loading all of the items in the category at once.
		I2012224	Added support for new Customer Login types. Added the ability to hide all pricing for Estimate/SO/Invoice using the Security options in the Control Panel.
		I2102250	Fixed an issue where the associated product line would not be selected in the dropdown when editing Display Categories.
		I2102277	Fixed an issue where the "Add News and Events" window would not load the "News Types" making it impossible to add new News/Events.
		I2103039	Corrected an issue where the Item Description was showing instead of the Item No in the Item No column on the add sell items page in DBOX.
		I2012223	Added support for different DBOX brandings (Logos, colour scheme, etc.) per customer login (associated with the Buying Group).

InventoryTransfer.dll

6.4.101	05/13/2021	I2102354	The Tools > Transfer Inventory function will now work correctly for uncompleted lines for an otherwise completed transfer, by either completing the transfer or providing feedback as to why it is unable to do so.
		I2102011	For unapproved transfers that transfer onto a work order, show new columns showing whether the item is make/stock or buy as well as the open PO qty, open sub work order qty as well as how much inventory is already allocated to the work order line. Users can now right click to access item running balance, Wo Material Manager and Inventory on Hand.
		I2012057	The line Location combo has been corrected to show available quantity for the item.
		I2103476	Large quantities will no longer throw the Overflow exception.
		I2104306	Corrected issue determining if the destination location is a WIP location for work order related transfers.
		I2104374	Ensure the To Consignment Location validation correctly handles all locations in all scenarios.

Seradex.Dbox.dll

6.4.28	04/14/2021	I2103067	The Sell Items display category page will now only load as many items as should be shown on screen, instead of loading all of the items in the category at once.
		I2103171	Implemented Bulk Saving to push data into ConfigBatch to enhance API performance
		I2012224	Added support for new Customer login types for DBOX. Added support for easily adding new login types in the future.
		I2010286	Corrected and issue where .Dbox was not retrieving the salesrep information correctly, when a sales rep is selected on the transaction web page.
		I2102344	Fixed issue where Dbox configurations are lost when creating new configurations on a transaction requiring a lot of line items
		I2103044	Fixed an issue where configurations on newly saved line items are overridden by the information on other line items.
		I2103147	Documents attached in DBOX will now correctly update the DocumentStorage record when revised.
		I2101212	Implemented initial and runtime data import functionality in the PriceList workbook.
		I2012223	The Buying Group of Customer logins will now be returned in the Login Token call to support different brandings of DBOX per Buying Group.
		I2102250	Fixed an issue where editing or creating a new Display Category on DBOX would not save properly for Product Lines.
		I2101090	Correced issue where the first non- ID column of a query controlled config property is hidden when there are more than two columns from the query in Dbox
		I2102205	Changed the authentication method for Sengrid emails to support their breaking change of no longer allowing Username/password logins for sending emails from DBOX.

Seradex.Dbox.Export.dll

6.4.9	04/14/2021	I2102217	Corrected issue retreiving new gl postings if the Labour Inventory Preference is enabled.
		I2103041	Ensure for AP the proper AP batch file name is created in the export data and ensure only Ar and AP with the AR or AP batch file name is NULL not blank can come over.

Seradex.MasterApi.dll

6.4.7	04/14/2021	I2002159	Modified The Master API to be able to handle Clarify Deployments/Releases. Clarify will now show as an option in Web Update if the client has Clarify and an update for Clarify is available for deployment.
		I2011196	On the launch of Orderstream, before displaying any expiry warning message to the end user, check our Seradex hosted data via web API for the customers license expiry date instead of just the local expiry date

Seradex.RestApi.dll

6.4.24	04/14/2021	I2012223	The Buying Group of Customer logins will now be returned in the Login Token call to support different brandings of DBOX per Buying Group.

6.4.24	04/14/2021	I2103147	Documents attached in DBOX will now correctly update the DocumentStorage record when revised.
		I2012224	Added support for new Customer login types for DBOX. Added support for easily adding new login types in the future.
		I2103067	The Sell Items display category page will now only load as many items as should be shown on screen, instead of loading all of the items in the category at once.

Seradex.Utilities.MicrovellumSystem.dll

| 6.4.20 | 04/26/2021 | I2104179 | Microvellum import should no longer fail with comments above 255 chars (within the contraints of nvarchar(max)) |

Seradex.Win.Estimate.dll

| 6.4.32 | 04/16/2021 | I2104221 | Adjusted the logic to correct an issue where the UOM field is not displaying correct when changing selected value. |

Seradex.Win.Purchasing.dll

| 6.4.52 | 04/16/2021 | I2104221 | Correctly loads the related 'Owner Line No' |

Seradex.Win.QuickConfigurator.dll

| 6.4.28 | 05/04/2021 | I2103259 | Corrected an issue where the Quick Configurator will crash when selecting a query filtering value for a regular index combo box property. |

Seradex.Win.SalesOrder.dll

| 6.4.37 | 04/15/2021 | I2104183 | Release of memory from the UOM grid combo has been removed. |

Seradex.Win.ServiceOrder.dll

6.4.6	04/23/2021	I2103372	Altered Service order to support launching from Tracked Assets and populating the default data as a new service order using the new Interface.
		I2102223	The Checked property of the Hide Details menu item will now toggle when clicked, allowing the subsequent code to do its work
		I2101114	Adjusted the logic ensuring that the system will delete the module user-defined details temp table after saving.

Seradex.Win.Shipping.dll

| 6.4.32 | 04/16/2021 | I2104221 | Adjusted the logic to correct an issue where the UOM field is not displaying correct when changing selected value. |

Seradex.Win.Telerik.dll

6.4.23	04/12/2021	I2104014	The option to print a range or selection of pages from the Telerik print preview window has been restored.

Seradex.Win.WorkOrder.dll

6.4.27	04/16/2021	I2104221	Adjusted the logic to correct an issue where the UOM field is not displaying correct when changing selected value.
