

Seradex OrderStream

Technical Release Notes

August 2023

AcctMaintenance.dll

6.4.129 08/11/2023 I2306014 The CustomerShipTo form will not allow a record to be saved that is both the default ShipTo and inactive.

ActiveM20.dll

6.4.152 08/11/2023 I2304023 The PostStandardLabour accounting preference will be used to determine whether or not the DataCollection module will be excluded from the Unapproval combo.

I2108033 When attempting to unapprove from the Transaction Override form, the speed of loading the Owner combo for Receipts has been considerably improved on databases with a large number of receipts.

I2302071 A setting to sort by rack has been added to the lot/serial inventory allocation form.

AdminTools.dll

6.4.72 08/11/2023 I2305238 License update has been modified to only include sxSystem database records that have both the SQLServerName and DBName filled in.

I2306071 Added logic to ignore leading/trailing spaces when validating document number changes.

AutomatedReports.exe

6.4.12 08/11/2023 I2305023 Added a date/time in the errors recorded in the log file.

I2307096 If a report is processed after its end time due to its position in queue, it will no longer cause automated reports to stop processing.

ClientReports.dll

6.4.100 08/24/2023 I2302345 An email preview has been added for systems without Microsoft Office installed.

I2306302 If an error occurs while replacing report email fields (like {SalesOrderNo}) with report email data, the error is now logged.

I2303111 Reports can now be setup to generate individual attachments per transaction for an email by setting the file name to the transaction number.

6.4.99 08/11/2023 I2305023 Increased the size of the SDDTemp email address columns. Updated to read the report name for automated reports from the client reports mdb file. Altered the error message that is recorded when an issue occurs when gathering email addresses to differentiate the two methods of specifying emails in ReportDestinationDetails.

Config.dll

6.4.205 08/11/2023 I2306295 Corrected an issue in the configurator by changing the scope of the property OldItemSpecID in the configurator mastered item dialog form from private to public to allow reference to other forms

Seradex OrderStream

Technical Release Notes

August 2023

6.4.205	08/11/2023	I2305229	Fixed an issue in the configurator to only process the required number of records when reconfiguring from Search and Replace, and to accurately show the correct number of records actually being processed.
		I2303234	Implemented support for Config Search and Replace in .Net work order module.
		I2304016	Implemented support for external data export from the AppIntegrationImport excel template file to the database as supported in the configurator.
		I2307185	Re-opening existing configured items clears saved values on query controlled properties which may affect dynamic property disabling
		I2307257	Corrected an issue in Config.dll that was causing all the line items on a transaction to be processed instead of just the the selected line items in Config Search and Replace.
		I2307258	Corrected an issue in Config.dll that was causing errors when attempting to load config batch data for ItemSpecs owner type
6.4.206	08/22/2023	I2308190	Corrected an issue that was causing the replacing value in Config Search and Replace not to be processed by the auto processor, and subsequently avoiding the processing of the bill of materials.
CreditNote.dll			
6.4.138	08/11/2023	I2305113	Modified to enable more windows to center on the window that called them.
CRM.dll			
6.4.144	08/11/2023	I2211238	The sales rep combo box will now include the vendor contact.
		I2306014	In the absence of a specified DefaultShipTo, when loading a customer's details in the CRM form the "defaulted" ShipTo record will not be an inactive record.
CRMOutlook365MailReaderService.msi			
6.4.4	08/11/2023	I2210215	Modified to correct a problem when trying to retrieve the emails from the common Outlook mail box due to a wrong reference for one of the components of the Microsoft.Graph.dll, which is the main Microsoft technology used to communicate with the Outlook Online.
DataTransfer.exe			
6.4.39	08/11/2023	I2304094	Modified to simplify the layout of the DataTransfer table.
DataTransfer.mdb			
6.4.307	08/11/2023	I2305113	Modified to open ServiceOrder and Delivery Schedule using the smart load technique.
		I2304099	Modified to add the necessary tables to store the new RFID functionality related data.
		I2306164	Added IncludeLabourInventory to sxAppPreferencesExpanded core view

Seradex OrderStream

Technical Release Notes

August 2023

6.4.307	08/11/2023	I2305153	Added a LocationID field to the PO table.
		I2302353	Work Order Generator now can launch SalesOrder or Item from fields
		I2302040	Added a new Application Preference to control when the user gets a warning including rows via "Select All" in Shop Floor Execution.
		I2207273	Removed integrity check for invalid AR trade GL on customer account sets as Financials - Invalid GL Account Type for AR Account already existed which is the same check.
		I2304023	Added PostStandardLabour accounting preference to sxAccountingPreferencesExpanded view.
		I2301131	Added inactive flag to Locations and new Integrity check Items with an Inactive Location as the default location
		I2306028	Added new integrity check to reveal instances of ItemVendors records whose related vendor is inactive.
		I2301109	Modified to support Report on Event in App Integration Manager when exporting.
		I2304026	Added GenericFileSQL import type. Added RunOrder to ApplIntQueryStages and two new stages, TableDefinition and Populate.
		I2304139	Modified the Inventory - Valuation by Category (Summary) report query.
		I2301043	An ItemVendorDetailID column has been added to the PODetails and ItemVendorHistory ActiveM database tables.
		I2305200	Added a field in CompanySetup for SVODocStoragePath.
		I2307243	Modified to improve the loading of work orders when a significant amount of related data collection exists.

DayEndProc.dll

6.4.163	08/11/2023	I2301011	Improved performance of gathering the audit data for GL inventory Autoposting.
---------	------------	----------	--

DBox Web Front End Components (WFE)

6.4.39	08/11/2023	I2302091	Changed the Clear Filter button on the Search page to be the regular filter button with a line through it. Converting an Estimate to a Sales Order when the PO is required would cause the Convert option to appear before the save had finished after entering the PO.
		I2305139	Corrected an issue where the app settings in the configurator were being overwritten with an empty value causing some unintended behaviour under specific configurator use cases.
		I2305286	Corrected an issue where launching the DBOX Web Configurator from OrderStream would fail.
		I2210040	Added an option to add a disclaimer to the registration page, there will be a checkbox beside whatever text you want to appear, like you would see for accepting the terms and service on most registration pages. This is customizable via the Communication Settings in the DBOX Control Panel. Added an enhancement to override the due date on an Estimate or a Sales Order a specified number of days if any item on the order is not in stock. Added custom + / - buttons on either side of the qty input on the Sell Items page and hidden the default arrows to make them much easier to click/see. Did a sweep through the main modules/home page to ensure that the website is usable on the average mobile device/tablet.

Seradex OrderStream

Technical Release Notes

August 2023

DC2001.dll

6.4.64 08/11/2023 I2306197 Added the Advance column to the manual Data Collection to be able to see and update it as required

ERP Anywhere

6.4.0 08/11/2023 I2307078 Updated GetInventoryOwners and SaveInventoryTransfer to handle owners better
I2305289 Updated app icon
I2305307 Allow users to use external barcode scanners in the "Scan Location" and "Inventory" pages
I2305152 Added ITID as a supported Item ID barcode prefix
I2305175 Removed lock on Owner Type when selecting a location in the Adjustmtnet Module
I2305094 Fixed issue with CheckNegativeInventory call
I2305301 Fixed container module crashing when scanning barcodes
I2305230 Added a validation step when scanning barcodes so barcode results will be more consistent.
I2307252 Set rack and/or bin to an empty string instead of null when the rack and/or bin is suppose to be not set.
I2308006 Updated the GET queries to handle large amounts of data better. Fixed sorting for WorkFlows with no due date

Estimating.dll

6.4.199 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

feble.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fecom.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-c-api.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-cs-net48.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

Seradex OrderStream

Technical Release Notes

August 2023

fedm-funit-c-api.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-funit-cs-net48.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-funit.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-service-c-api.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-service-cs-net48.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm-service.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

fedm.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

feisp.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

feudp.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

feusb.dll

6.4.0 08/11/2023 I2304099 Included as component of the FEIG RFID device SDK.

History.dll

6.4.49 08/11/2023 I2212052 When launching History based Search forms, ensure that the taskbar item is created using Windows approved methods.

Seradex OrderStream

Technical Release Notes

August 2023

Impinj.OctaneSdk.dll

6.4.0 08/11/2023 I2307266 Included as component of the Impinj RFID device SDK.

InventoryTransfer.dll

6.4.123 08/11/2023 I2302071 When loading a mass transfer, the system will now try to preserve the order outlined in the transfer excel workbook.
I2304242 Transfer Tools > Receive Inventory will now only be enabled when appropriate.

Invoice.dll

6.4.190 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.
I2211199 Adjust invoice detail generation query when generating from shipment to attempt to use sales order ordering first
6.4.191 08/15/2023 I2308174 Corrected issue whereby deposits did not load anymore into Invoice for either direct Sales order or shipment invoices.

ItemEditor.dll

6.4.162 08/11/2023 I2301043 Updating vendor information will now record the ItemVendorDetailID to the ItemVendorHistory database table.
I2303024 Added the Tool Revision to the Labour (Operation) Add/Edit screen in the Cell Tools grid and combo box.
I2301131 Inactive locations will not be available in the location drop down in items
I2304285 Inactive vendors will be pushed to the bottom of the Vendor combo list, and saving the ItemVendors form with an inactive vendor selected will be prevented.
I2301039 Fix Primary Costing UOM showing incorrectly if there were multiple UOMs assigned to a vendor
I2305355 Corrected the resolution of the Item Vendor Cost Update cost rollup message box, so it will correctly opt out of rolling up costs when the user answers "no".

LLRP.dll

6.4.0 08/11/2023 I2307266 Included as component of the Impinj RFID device SDK.

LLRP.Impinj.dll

6.4.0 08/11/2023 I2307266 Included as component of the Impinj RFID device SDK.

MatReq.dll

6.4.153 08/11/2023 I2301043 Generating a purchase order now sets the ItemVendorDetailID of the new PO detail.
I2305153 Modified to populate the new PO header location upon PO generation.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.153 08/11/2023 I2304065 Selective mat req processes have been migrated to Seradex.Win.MatReq.dll and Seradex.Purchasing.MatReq.dll.

OrderRevision.dll

6.4.6 08/11/2023 I2306236 Saving a revision with an empty comment will no longer be permitted.
I2306203 Expanded the maximum number of revisions for SalesOrder and PurchaseOrder to 99 from 09.

POInvoice.dll

6.4.134 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.
I2306005 Support line discounts on PO deposit invoices and ensure the vendor account set of the deposit is inherited from the related PO. Also corrected unit discount pct logic on misc Po invoice lines.

ProductStatus.dll

6.4.14 08/11/2023 I2306139 In cases where small changes were made to the work order line, the production status form will now recognize data collection generated before the work order was changed.

PurchaseOrder.dll

6.4.143 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.
6.4.144 08/24/2023 I2303348 Implemented support for Aspose VendorPriceList.xls, including the InitialDataImport and RuntimeDataImport
6.4.145 08/29/2023 I2308318 Corrected the query for obtaining the list of purchase orders to show in the PONo combo when the "All" option is selected.

Receiving.dll

6.4.166 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

SalesOrder.dll

6.4.245 08/11/2023 I2304065 Purchase quantity UOMs are now evaluated when updating existing mat req from the selective mat req form.
I2305113 Modified to enable more windows to center on the window that called them.
6.4.246 08/24/2023 I2303348 Modified to not inform the user that Excel is not installed when Aspose is enabled.

Schedule.dll

6.4.26 08/11/2023 I2212052 When launching the Scheduling Inventory Analysis form, ensure that the taskbar item is created using Windows approved methods.

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.AddressSystem.dll

6.4.13	08/11/2023	I2302140	Ensured address system disposes properly. Address Validation will no longer clear some fields from the original address when the validation api does not return data for the same field.
		I2306170	Prevented address from creating a blank Country/City/Stateprov record if one is assigned to the address class.

Seradex.Aspose.dll

6.4.5	08/11/2023	I2302337	Implemented an Aspose version of 2020 app integration import.
6.4.6	08/24/2023	I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
		I2303348	Implemented required changes to properly hide, show and close the pricing workbook when needed.
6.4.7	08/28/2023	I2303348	Corrected to clear the defined named range at all times, and also fixed a bug that was causing the import routine to fail by disposing off Aspose objects like they are COM objects.

Seradex.BaseSystem.dll

6.4.62	08/24/2023	I2302345	Modified to pass the calling form to the new email preview form to ensure it is always shown on top of the caller when used.
--------	------------	----------	--

Seradex.CommonServices.dll

6.4.82	08/11/2023	I2302040	Added a new Application Preference to control when the user gets a warning including rows via "Select All" in Shop Floor Execution.
		I2305200	Added handling for a SVO-specific Document Storage path, and modules will revert to the default Document Storage path only if no module-specific path exists.
		I2304026	Added module activation check for the GenericFileSQL import.
6.4.83	08/24/2023	I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
6.4.84	08/30/2023	I2308219	Remove the ability for the Progress Form to disable its parent form to prevent sporadic minimization issues.

Seradex.Connection.dll

6.4.53	08/11/2023	I2108136	Corrected issue when creating temp tables with an auto-generated primary key if the table definition is not wrapped in brackets and the last field ends with a bracket(VARCHAR(250) for example).
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.Dbox.dll

6.4.41	08/11/2023	I2305039	Corrected an issue adding a config child item in Dbox and saving without any user changes to the parent or child to no longer save the incomplete configuration when saving/closing the page.
		I2305171	Implemented the logic to clear defaults or previously selected property values when a Dbox configurator property control is disabled in the workbook.
		I2302029	Implemented the functional support in the configurator for the Auto List Single Value default feature for excel and query controlled text box properties in both Dbox and Order Steam
		I2303112	Corrected an issue that was causing Dbox configurator regular combo boxes to not sort correctly
		I2303159	Corrected an issue causing Configurator Properties that aren't visible in DBOX to be set to "expanded" when the Configurator Setup had valid LAN only properties before the first visible DBOX property. This caused no visible property to show as expanded in the parent/child configurator.
		I2302116	Corrected an issue where the Manage Worksheets interface would not show the correct excel sheets and dates modified for the product lines if there were multiple product lines with the same name.
		I2306015	Fixed an issue where DBOX could not generate AR/AP Posting Journals for the Quickbooks link.
		I2306025	Fixed an issue where .NET 6.0 expected the CustomerID to always be filled in on the payment model when this isn't actually necessary. In the old .Net framework code, the model would still be valid, it would just replace null with 0, however .Net 6.0 thinks that's unsafe. Replaced the CustomerID int with a nullable int to handle this situation.
		I2305286	Fixed a number issues in Dbox configurator API by validating some specific fields before using them accordingly due to the possible presence of null values.
		I2307089	Fixed an issue where the Forgot Password functionality incorrectly assumed the request was from the ERP Anywhere mobile app.
		I2305328	Created an API endpoint to get accounts (Customer, Prospect etc) that were modified since a specified date.
		I2306075	Fixed an issue where property values were being checked for length without first checking if they were null causing an Object Reference not set to an Instance of an Object Error in the configurator.
		I2210040	Added an option to add a disclaimer to the registration page, there will be a checkbox beside whatever text you want to appear, like you would see for accepting the terms and service on most registration pages. This is customizable via the Communication Settings in the DBOX Control Panel. Added an enhancement to override the due date on an Estimate or a Sales Order a specified number of days if any item on the order is not in stock. Added custom + / - buttons on either side of the qty input on the Sell Items page and hidden the default arrows to make them much easier to click/see. Did a sweep through the main modules/home page to ensure that the website is usable on the average mobile device/tablet.
		I2306223	Code cleanup to correct erratic line item removal on big orders of 20 lines or more having warning alerts.
		I2307159	Fixed a very inefficient query for gathering Module Search information in DBOX.

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.Dbox.Synchronization.dll

6.4.3 08/11/2023 I2304203 Improved the error message if the API being used is not available.

Seradex.EstimateSystem.dll

6.4.34 07/20/2023 I2307168 Added handling to allow for EstimateDetails.DiscountPct having a NULL value.

6.4.35 08/11/2023 I2302337 Implemented an Aspose version of 2020 app integration import.

6.4.36 08/24/2023 I2303348 Implemented required changes to properly hide, show and close the pricing workbook when needed.

I2305166 Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.

Seradex.Excel.dll

6.4.28 08/11/2023 I2302337 Implemented an Aspose version of 2020 app integration import.

6.4.29 08/24/2023 I2305166 Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.

I2303348 Implemented required changes to properly hide, show and close the pricing workbook when needed.

6.4.30 08/28/2023 I2303348 Corrected to clear the defined named range at all times, and also fixed a bug that was causing the import routine to fail by disposing off Aspose objects like they are COM objects.

Seradex.Financials.FinancialsSystem.dll

6.4.131 06/30/2023 I2306282 Corrected issue approving using online tax with pure zero dollar invoices (without deposit invoice applications) shipping into states that are registered for tax.

6.4.132 08/11/2023 I2306100 Ensure the sales deposit generation launch credit notes properly.

I2305188 Corrected issue with Avalara for clients outside of Texas but registered to collect tax, and using the optional remote seller flat tax does not function properly. Also no longer create new groups that include zero rated city/county or special tax.

I2209177 Altered the credit system so that for AP and using remittance vendors, any credit can now be used as long as the invoice and the credit have the same remittance vendor regardless of the main vendor on the document. AR is the same change but works with Group customers.

I2304107 Corrected issue if an Approved invoice somehow does not have a terms code ID in the invoice header, it was not available to pay.

I2306097 Allow users to pick GL accounts in the GL setup form that somehow do not have a GL account type, to allow correction.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.132	08/11/2023	I2306086	Corrected issue attempting to save a new Tax Authority in the Financials Tax Authority screen.
		I2306034	Improved memory reclamation in Financials forms that show the GL entry grid and GL account drop downs.

Seradex.Financials.TransactionPosting.dll

6.4.6	08/11/2023	I2301011	Improved performance of gathering the audit data for GL inventory Autoposting.
		I2306164	Updated to read company preferences from the sxAppPreferencesExpanded core view

Seradex.Infragistics.dll

6.4.66	07/17/2023	I2307131	On first use of the Data Validation system, ensure that both Save and Approval validations are stored in-memory so that they can be filtered to the correct validations at runtime.
6.4.67	08/11/2023	I2212269	Add methods to a couple combo classes to allow retrieving the data loading query only.
		I2303272	Updated for internal usage.
		I2305153	Modified to add combo column properties to the generic location combo box.
		I2305099	Minor modification to grid data binding behaviour.
		I2301165	When a selected drop-down box value, grid cell, or text field contains a value larger than the control, an ellipsis will now be added to the end as indication.
		I2210022	Added support to use the newer grid control in older modules that do not yet support themes.
		I2301131	Updated location combo to filter out inactive and corrected where some combos had a smaller header font than others.

Seradex.Inventory.Adjustment.dll

6.4.10	08/11/2023	I2302104	On Consignment Adjustment generation on Consignment Consumption Receipt approval, ensure that the quantity adjusted out is not greater than the amount against the specified inventory item record.
--------	------------	----------	---

Seradex.Inventory.dll

6.4.45	08/11/2023	I2304156	Ensured ERP anywhere can return inventory to allocation and inventory to allocate the same way as the current desktop allocation form does it from SalesOrder and Shipping.
6.4.46	08/24/2023	I2308274	The logic comparing what has been allocated with what has been selected will now return more details about the problematic records in all cases.

Seradex.InvoiceSystem.dll

6.4.35	08/11/2023	I2211199	Adjust invoice detail generation query when generating from shipment to attempt to use sales order ordering first
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

August 2023

6.4.35	08/11/2023	I2305070	Adjusted deposit invoice application logic for Invoice to not apply deposit details if the invoice is already zero and there are negative deposits unapplied.
		I2306078	When adding a second or subsequent SalesOrder or Shipping document to an existing invoice, the pre-existing entry date is persisted.
6.4.36	08/15/2023	I2308174	Corrected issue whereby deposits did not load anymore into Invoice for either direct Sales order or shipment invoices.
6.4.37	08/21/2023	I2308191	Modified the Invoice.Net form to handle NULL values of DiscountPct when invoicing non-shippable items.

Seradex.Library.dll

6.4.31	08/11/2023	I2301043	An ItemVendorDetailID column has been added to the PODetails database table.
--------	------------	----------	--

Seradex.MasterApi.dll

6.4.12	08/11/2023	I2303011	Fixed an issue where an improper version of DataTransfer was being identified as the minimum data transfer version required for DBOX. Allowing updates to go through before Data Transfer had been run.
--------	------------	----------	---

Seradex.OrderEntryLibrary.dll

6.4.35	08/11/2023	I2302337	Implemented an Aspose version of 2020 app integration import.
		I2306162	Improved performance in App Integration by opening and closing the pricelist.xls workbook just once, per order, instead of multiple times per line item.
6.4.36	08/24/2023	I2303348	Implemented required changes to properly hide, show and close the pricing workbook when needed.
		I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
6.4.37	08/28/2023	I2303348	Corrected to clear the defined named range at all times, and also fixed a bug that was causing the import routine to fail by disposing off Aspose objects like they are COM objects.

Seradex.ProductConfigurator.dll

6.4.16	08/11/2023	I2306262	Modified Aspose auto processor to always create new itemspec when creating the initial spec for processing line items from the web
--------	------------	----------	--

Seradex.Production.DataCollection.dll

6.4.73	08/11/2023	I2301109	Updated to conform to new the support for core and custom data used for Report On Event. Now prioritizes custom OrderStreamObjectEvents records over core ones.
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

August 2023

6.4.73	08/11/2023	I2307097	Modified the ReturnShopFloorModel API function to properly throw an error when necessary.
		I2304099	Modified to add the necessary code to be able to audit the scanned RFID tag data upon saving from the SFE details user interface.
		I2303272	Modified to support specifying Location, Rack, and Bin on the Shop Floor work order completion screen.
		I2305032	Removed exposed duplicate functions that required the connection to be passed in when they are not required.

Seradex.Production.WorkOrder.dll

6.4.48	08/11/2023	I2303234	Implemented support for Config Search and Replace in .Net work order module.
		I2304329	Modified to detect upon saving if the quantity has been decreased for the lot/serial lines that are stored in the WorkOrderLotSerialInventory table to display a warning message to the user in case they need to deallocate any excessive inventory.
		I2307243	Modified to improve the loading of work orders when a significant amount of related scheduling, data collection, and/or item transfer data exists.
		I2307248	When using the Make-Stock MRP, ensure that the items to append to the work order are added to the Items combo prior to selecting the item on the line.

Seradex.Purchasing.dll

6.4.40	08/11/2023	I2207272	Ensure when an item is selected the spec is created in all cases if there is no master spec for the new item selected in PO.
		I2305153	Modified to implement the necessary logic for the PO division location logic.
		I2301043	Saving a new PO line will now save the related ItemVendorDetailID to the database.
		I2301040	A unit net cost column has been added to the purchase order detail grid.
6.4.41	08/24/2023	I2303348	Implemented support for Aspose VendorPriceList.xls, including the InitialDataImport and RuntimeDataImport
		I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
6.4.42	08/25/2023	I2308304	Corrected the PO line unit cost logic and removed the incorrect OwnerType setting.
6.4.43	08/28/2023	I2303348	Corrected to clear the defined named range at all times, and also fixed a bug that was causing the import routine to fail by disposing off Aspose objects like they are COM objects.

Seradex.Purchasing.MatReq.dll

6.4.3	08/11/2023	I2304065	Selective mat req processes have been migrated here from MatReq.dll
		I2304266	The selective mat req UOM conversion process has been updated to be consistent with other parts of the system.

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.Purchasing.ReceivingSystem.dll

6.4.41 07/20/2023 I2307136

The receiving form will now include partial receipts created for the same PO line when calculating the quantity left on PO.

6.4.42 08/11/2023 I2302104

On Consignment Consumption Receipt generation on Transfer approval, ensure that the generated receiving line item is in-sync with the specified inventory item.

I2301038

Disallow serial lot tracked items to be received in noninteger quantities and fix lack of PO overwriting save validation results

Seradex.RecurringTransaction.dll

6.4.28 08/11/2023 I2304235

Corrected issue deleting job billing with retention if some lines never were billed also delete properly clears out zero dollar descriptions of work that happen to have positive and negatives to balance out to zero.

Seradex.ReportSystem.dll

6.4.24 08/11/2023 I2303300

The .Net report system has been updated to detect redirected printers.

Seradex.RestApi.dll

6.4.35 08/11/2023 I2307089

Fixed an issue where the Forgot Password functionality incorrectly assumed the request was from the ERP Anywhere mobile app.

I2305328

Created an API endpoint to get accounts (Customer, Prospect etc) that were modified since a specified date.

I2308006

Updated the GET queries to handle large amounts of data better. Fixed sorting for WorkFlows with no due date

I2307242

Fixed issue when adjustment line items had owners.

I2210040

Added an option to add a disclaimer to the registration page, there will be a checkbox beside whatever text you want to appear, like you would see for accepting the terms and service on most registration pages. This is customizable via the Communication Settings in the DBOX Control Panel. Added an enhancement to override the due date on an Estimate or a Sales Order a specified number of days if any item on the order is not in stock. Added custom + / - buttons on either side of the qty input on the Sell Items page and hidden the default arrows to make them much easier to click/see. Did a sweep through the main modules/home page to ensure that the website is usable on the average mobile device/tablet.

Seradex.RFIDDevice.dll

6.4.0 08/11/2023 I2304099

Added this new module to be able to read data from various types of RFID scanning devices.

Seradex.RFIDDeviceManager.dll

Seradex OrderStream

Technical Release Notes

August 2023

6.4.0 08/11/2023 I2304099 Added this new module to be able to dynamically read the settings for a RFID device associated to an OrderStream module as well as to audit the scanned data after it has been processed by the module.

Seradex.SalesOrderSystem.dll

6.4.44 08/11/2023 I2302337 Implemented an Aspose version of 2020 app integration import.
I2306008 Corrected issue whereby changing the header location no longer prompted to update the details

6.4.45 08/24/2023 I2303348 Implemented required changes to properly hide, show and close the pricing workbook when needed.
I2305166 Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.

Seradex.Search.dll

6.4.92 08/11/2023 I2212180 Ensured search controls are properly cleaned up and adjusted the style of the filter combos.

Seradex.Shipping.dll

6.4.30 08/11/2023 I2304156 New API Interface for ERP Anywhere to return and manage inventory allocations.
I2306021 Ensured updating inventory from the header menu in shipping is the same logic as when it is done on approval.
I2305093 Limit Misc freight vendors list to active vendors

6.4.31 08/24/2023 I2308274 The message informing the user about over-shipping now includes the problematic line number.

Seradex.SpecBuilder.dll

6.4.10 08/11/2023 I2306060 Modified to generate the TreeSort properly when used with a range of items for reporting style purposes.

Seradex.UserDefined.dll

6.4.20 08/11/2023 I2301120 Standardize UI to be inline with the .Net forms.
I2308022 Add handling to save an empty exploded UDF textbox.

Seradex.Utilities.IntegrationMgrSystem.dll

6.4.32 08/11/2023 I2304026 Added generic import handling for XML or JSON.
I2301109 Modified to support Report on Event in App Integration Manager when exporting.
I2302337 Implemented an Aspose version of 2020 app integration import.

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.Win.AccountMergePurge.dll

6.4.12 08/11/2023 I2306170 Moving City from the left to the right did not update the UI properly

Seradex.Win.AdvancedDeliverySchedule.dll

6.4.8 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

Seradex.Win.BarcodeShipping.dll

6.4.10 08/11/2023 I2209077 Added handling for non-mastered product line items, to display the quantity produced for the specific shipping lines as the quantity available.

Seradex.Win.Controls.dll

6.4.41 08/11/2023 I2210022 Added support to use the newer grid control in older modules that do not yet support themes

I2301006 Modified to ensure that when zooming from the OrderStream Comments control grid line, the system not only pays attention to the editable status of the entire grid, but also to the editable status of the row or the cell launching the zooming view control.

I2305099 Ensure that the Contacts control button sizes properly.

I2305200 Modified the Document Storage tab to retain the previously selected file location rather than revert to the MyDocuments folder each time.

I2302140 Improved memory cleanup of the address control, buttons, and comment control.

I2306212 Modified the One-Click Report control to prevent multiple one-click report requests from occurring simultaneously.

6.4.42 08/24/2023 I2302345 Modified to pass the calling form to the new email preview form to ensure it is always shown on top of the caller when used.

Seradex.Win.DeliverySchedule.dll

6.4.28 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

Seradex.Win.Email.dll

6.4.0 08/24/2023 I2302345 An email preview has been added for systems without Microsoft Office installed.

Seradex.Win.Estimate.dll

6.4.54 07/20/2023 I2307186 Ensure that the EDI Import module can be launched without selecting an account or pre-existing estimate. Correct other uses of menus prior to document selection. Ensure that the Copy Estimate menu does not create a blank estimate when no estimate has been selected.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.55	08/11/2023	I2212052	The Estimate form will no longer disable and enable itself when launching the Estimate Search History form or Item Lookup History form, as this was causing unexpected behaviour with the Microsoft Windows window ordering.
		I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2301131	Updated location combos to all be the same and hide inactive locations.
		I2305113	Modified to enable more windows to center on the window that called them.
6.4.56	08/24/2023	I2301165	When text is too large to display in a field, an ellipses will now appear at the end.
		I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
		I2303348	Implemented required changes to properly hide, show and close the pricing workbook when needed.

Seradex.Win.Financials.dll

6.4.130	08/11/2023	I2306100	Ensure Apply AR credit screens launch negative invoices properly.
		I2210022	Allow users to save grid settings in the receive payment/apply credit and refund credit screens in Financials.
		I2209177	Altered the credit system so that for AP and using remittance vendors, any credit can now be used as long as the invoice and the credit have the same remittance vendor regardless of the main vendor on the document. AR is the same change but works with Group customers.
		I2212041	Adjusted prompt when voiding bank transactions that were created as part of a void of a refund credit to only display the voided prompt if the user viewed the void screen and voided.
		I2306097	Allow users to pick GL accounts in the GL setup form that somehow do not have a GL account type, to allow correction.
		I2302342	Added logic for AP payment generation to prompt the user a summary of what the payment will do and inform them of potential issues such as short payment.
6.4.131	08/17/2023	I2306034	Improved memory reclamation in Financials forms that show the GL entry grid and GL account drop downs.
		I2308168	Corrected the include checkbox behaviour to instantly update the UI for any changes to payment and improved the visibility logic of the Apply credit button to no longer require a line to be included to match the existing logic when launching from the Credit Applied Field.
		I2308212	Corrected issue whereby adding a new batch did not work as expected and altered the message on Void AP as it was erroneously reporting that it replaced the payment.

Seradex.Win.IntegrationManager.dll

6.4.23	08/11/2023	I2301109	Modified to support Report on Event in App Integration Manager when exporting.
		I2304026	Added the ability to import any single XML or JSON order file.
		I2302337	Implemented an Aspose version of 2020 app integration import.

Seradex OrderStream

Technical Release Notes

August 2023

Seradex.Win.Invoice.dll

6.4.60	08/11/2023	I2212269	Improve form load speed and safety by re-implementing the combo loading behaviour and removing threading from UI control loading. Corrected the sizing of the date header controls. Improved the tab order of the Invoice form.
		I2306207	Ensure the Item, Sales Order, and Shipment combos are loaded correctly on creation of a Credit Note from Service Order. Improved performance when creating a credit note from Service Order. Ensure the form state is appropriate upon completion of loading the service order data into Credit Note.
		I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2301165	When text is too large to display in a field, an ellipses will now appear at the end.
		I2301131	Updated location combo on invoice to hide inactive locations.
		I2306100	Ensure the sales deposit generation launch credit notes properly.
		I2305113	Modified to enable more windows to center on the window that called them.

Seradex.Win.MatReq.dll

6.4.4	08/11/2023	I2304266	Ensure that the vendor specified in the Custom Selective Mat Req search is used by the MatReq system without any further intervention by the user.
		I2304065	The selective mat req form has been updated to prevent unexpected quantity increases when updating existing mat req records.

Seradex.Win.ProspectImport.dll

6.4.25	08/11/2023	I2306170	Prevented address from finding a blank country record if it existed and the address has no country assigned.
--------	------------	----------	--

Seradex.Win.Purchasing.dll

6.4.70	07/25/2023	I2306278	Purchase Order header due date changes will now be pushed into its lines and persisted as appropriate.
6.4.71	08/11/2023	I2301131	Updated location combos to all be the same and hide inactive locations.
		I2304058	Hide the line number field in PO
		I2207272	Ensure when an item is selected the spec is created in all cases if there is no master spec for the new item selected in PO.
		I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2305153	Modified to add a new location header combo to the main PO screen to improve location division logic on PO.
		I2305113	Modified to enable more windows to center on the window that called them.
		I2301165	When text is too large to display in a field, an ellipses will now appear at the end.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.71	08/11/2023	I2301120 I2301042 I2307187	Ensure that the Detail UserDefined form launches with a valid PO Detail ID. A purchase order line total weight has been added. Set the detail Comment cell to have multiline capabilities.
6.4.72	08/14/2023	I2308146	The process to obtain an employee's location will no longer throw an exception if the location has not been set up.
6.4.73	08/24/2023	I2303348 I2305166	Implemented support for Aspose VendorPriceList.xls, including the InitialDataImport and RuntimeDataImport Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
6.4.74	08/28/2023	I2303348	Corrected to clear the defined named range at all times, and also fixed a bug that was causing the import routine to fail by disposing off Aspose objects like they are COM objects.

Seradex.Win.Receiving.dll

6.4.62	08/11/2023	I2307187 I2305113 I2102336	Set the detail Comment cell to have multiline capabilities. Modified to enable more windows to center on the window that called them. Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2301131 I2301165	Updated location combos to all be the same and hide inactive locations. When text is too large to display in a field, an ellipses will now appear at the end.

Seradex.Win.RecurringTransaction.dll

6.4.28	08/11/2023	I2304235	Corrected issue deleting job billing with retention if some lines never were billed also delete properly clears out zero dollar descriptions of work that happen to have positive and negatives to balance out to zero.
--------	------------	----------	---

Seradex.Win.Reports.dll

6.4.27	08/11/2023	I2202253	Telerik reports can now be exported and attached to emails as xls files.
--------	------------	----------	--

Seradex.Win.SalesOrder.dll

6.4.60	08/11/2023	I2303086	When updating shipto, do not enforce a change of shipvia unless a new value is found
		I2302348	When the sales order number drop down is filtered to a status, and the status of the current sales order is changed, the form will no longer reload the sales order number drop down to show all statuses.
		I2301165	When text is too large to display in a field, an ellipses will now appear at the end.
		I2306008	Corrected issue whereby changing the header location no longer prompted to update the details
		I2301131	Updated location combos to all be the same and hide inactive locations.
		I2305113	Modified to enable more windows to center on the window that called them.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.60	08/11/2023	I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2304052	Corrected issue whereby launching the detail ship to from Sales order lines and changing tax or otherwise the rate changes was not updating the sales order lines affected.
		I2306178	Corrected display issue when using detail ship to and happened to load a sales order via the drop down while already viewing another sales order for the exact same customer, the detail ship to in the grid did not appear properly.
		I2212052	The Sales Order form will no longer disable and enable itself when launching the Sales Order Search History form, as this was causing unexpected behaviour with the Microsoft Windows window ordering.
6.4.61	08/14/2023	I2308142	Modified the means by which sales order header data are selected, removing the need to have a primary key on the data object.
6.4.62	08/17/2023	I2308170	Modified the post-Batch BOM process to leave the SalesOrder form in a changed state if the BOM was changed; saving the form would then initiate the popup to reflect these changes to the related documents.
6.4.63	08/24/2023	I2305166	Implemented Initial and Runtime data import feature to migrate data from a database to the workbook when using the excel item pricing option instead of the Aspose item pricing option in the Estimate, Sales Order and Purchasing modules.
		I2303348	Implemented required changes to properly hide, show and close the pricing workbook when needed.

Seradex.Win.Scheduling.dll

6.4.55	08/11/2023	I2301075	Hide Launch Material Manager if advanced work order not activated
--------	------------	----------	---

Seradex.Win.Scheduling.Finite.dll

6.4.39	08/11/2023	I2301075	Hide Launch Material Manager if advanced work order not activated
		I2210002	When there is an estimate linked to the scheduled work order, double clicking items in the calendar views in scheduling will now show the work order form instead of the estimate form.

Seradex.Win.Search.dll

6.4.104	08/11/2023	I2212180	Ensured search controls are properly cleaned up and adjusted the style of the filter combos.
		I2102336	Add ability to clear filters from transactional forms in a more flexible manner.
6.4.105	08/17/2023	I2308164	Ensure that the ModuleSearchWorkspace data tables are cleaned up in the correct dependency order.

Seradex.Win.ServiceOrder.dll

6.4.19	08/11/2023	I2305113	Modified to enable more windows to center on the window that called them.
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

August 2023

6.4.19	08/11/2023	I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2301131	Updated location combos to all be the same and hide inactive locations.
		I2305099	Minor UI control size and alignment updates.
Seradex.Win.Shipping.dll			
6.4.48	06/26/2023	I2306259	Corrected the call to open the Multiple Document Storage form from the grid.
6.4.49	08/11/2023	I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2305093	Limit Misc freight vendors list to active vendors
		I2301165	When text is too large to display in a field, an ellipses will now appear at the end.
		I2306021	Ensured updating inventory from the header menu in shipping is the same logic as when it is done on approval.
		I2301131	Updated location combos to all be the same and hide inactive locations.
		I2305113	Modified to enable more windows to center on the window that called them.
6.4.50	08/14/2023	I2308154	Restored the Country and Ship Terms combos to the Shipping grid.
Seradex.Win.ShopFloorExecution.dll			
6.4.66	08/11/2023	I2302040	Added a select all option to Shop Floor Execution with a warning when trying to include more rows than specified in application preferences.
		I2304099	Modified to implement the new RFID scanning functionality on the SFE detail user interface.
		I2303272	Modified to support specifying Location, Rack, and Bin on the Shop Floor work order completion screen.
Seradex.Win.Telerik.dll			
6.4.28	08/11/2023	I2303300	Paper size detection has been extended to include more sizes defined against the reports assigned printer.
		I2202253	Telerik reports can now be exported and attached to emails as xls files.
Seradex.Win.WorkOrder.dll			
6.4.50	08/11/2023	I2301075	Hide Launch Material Manager if advanced work order not activated
		I2303234	Implemented support for Config Search and Replace in .Net work order module.
		I2301165	When text is too large to display in a field, an ellipses will now appear at the end.
		I2305113	Modified to enable more windows to center on the window that called them.
		I2301131	Updated location combos to all be the same and hide inactive locations.
		I2304127	Sub-work orders opened from a WO line right-click menu will spawn in a new WO form.

Seradex OrderStream

Technical Release Notes

August 2023

6.4.50	08/11/2023	I2102336	Ensure the Message Centre and Search tab searches can be filtered in a consistent manner. Ensure the search data is cleared when adding a new document.
		I2212052	The Work Order form will no longer disable and enable itself when launching the Work Order Search History form, as this was causing unexpected behaviour with the Microsoft Windows window ordering.
		I2307248	When using the Make-Stock MRP, ensure that the items to append to the work order are added to the Items combo prior to selecting the item on the line.
ServiceOrder.dll			
6.4.80	08/11/2023	I2305113	Modified to enable more windows to center on the window that called them.
setup.exe			
6.4.4	08/11/2023	I2210215	Modified to correct a problem when trying to retrieve the emails from the common Outlook mail box due to a wrong reference for one of the components of the Microsoft.Graph.dll, which is the main Microsoft technology used to communicate with the Outlook Online.
Shipping.dll			
6.4.178	08/11/2023	I2305113	Modified to enable more windows to center on the window that called them.
		I2303074	Corrected issue generating a shipment from Sales order itself as well as batch processing, barcode shipping and delivery schedule. This only is an issue if the collation of the database does not match the tempDB database.
sxAddress.ocx			
6.4.17	08/11/2023	I2208164	Modified the Address edit control to spend less time checking if it needs to create a new Addresses record if all address fields are empty. Also improved the speed of saving when a valid address had not previously been loaded into the screen in the same session.
sxEDIBridge.dll			
6.4.65	08/31/2023	I2308339	Allow date filtering when exporting PO module EDI formats.
sxMaintenance.dll			
6.4.154	08/11/2023	I2208164	Adjusted the tab order on Employee Maintenance to make it easier to navigate the screen.
		I2307108	Fixed an issue where signing up an Employee for both DBOX and ERP Anywhere at the same time would cause an error.

Seradex OrderStream

Technical Release Notes

August 2023

sxMaintenanceControls.ocx

6.4.43 08/11/2023 I2302040 Added a new Application Preference to control when the user gets a warning including rows via "Select All" in Shop Floor Execution.

sxProfile.dll

6.4.29 08/11/2023 I2302358 The User setup form in sxProfile now displays the Database Code in the grid. Minor tab, layout, and display issues were addressed.

sxRuntime.exe

6.4.63 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

sxSwitcher.exe

6.4.1 08/11/2023 I2305011 Modified to manually position the menu and react to the right click based on the same code that TechsupportMonitor uses.

Tooling.dll

6.4.24 08/11/2023 I2305113 Modified to enable more windows to center on the window that called them.

UpdateAcct.dll

6.4.80 08/11/2023 I2304322 The UPDATES to GLAccounts in the UpdateAccounts module will only occur if the temp table - to be populated from the accounting system - is not empty.

WorkOrder.dll

6.4.227 08/11/2023 I2301116 Lock columns on WO completion form
 I2303272 Modified to support specifying Location, Rack, and Bin on the Shop Floor work order completion screen.
