

Seradex OrderStream

Technical Release Notes

February 2026

AcctMaintenance.dll

6.4.141 02/03/2026 I2511255 Added the means to launch the Import Customer ShipTo utility from an external module.

ActiveM20.dll

6.4.165 02/03/2026 I2512139 Altered PO status update to ignore AP accrual validation for those not using AP accruals and also improved the efficiency of updating Pos with a lot of lines but only a small number of lines had actual status updates.

AdminTools.dll

6.4.82 01/05/2026 I2502153 Minor internal update for ongoing stability and compliance.

Config.dll

6.4.255 02/03/2026 I2601022 Corrected an issue in LAN configurator that incorrectly prompts the user if he wants to override the next line item that he's trying to navigate to using the navigation buttons, even though the next line item is a configured mastered item.
I2601030 Added support to write QC tests from Config when not using auto processor and the order line is a new line.
I2509125 Updated to retain the proper mastered item number, and not revert to the product line item number, when re-configuring transaction line items
I2510047 Implemented a new feature in product line setup, Seradex Maintenance Tools and Dbox to clear the Dbox productline configurator cache upon changes to configurator setup. This will also clear the cached workbook.
I2511174 Updated the LAN configurator to clear existing transaction input worksheet data after the workbook is initially opened, and ensures that the appropriate message is shown when an error occurs.

CRM.dll

6.4.153 02/03/2026 I2511255 Added the Tools > Customer ShipTo utility to the CRM form.
I2305309 Modified the CRM data entry validation process to correct an issue when trying to independently validate user defined data for customers and prospects.

CRMOutlook365MailReaderService.msi

6.4.5 02/03/2026 I2508230 Modified to use OAuth tokens setup and acquired via the new Mail Setup form.

DataTransfer.mdb

Seradex OrderStream

Technical Release Notes

February 2026

6.4.331	01/14/2026	I2601078	Corrected issue with the Spec Mode versions of Bill Of Material - All Levels and Bill Of Material - Multi Level where the total material at the bottom of the report was incorrect if the total quantities of the bom items were <> 1. Also restored the ability to print both item and Spec mode if a bom has no material but has labour.
6.4.332	02/03/2026	I2509188	A customer item revision field has been added.
		I2601018	Re-added the Sales - Daily Customer by Item Report.
		I2601068	Set the Purchase Order - Consolidated Items report to now use Telerik reporting.
			Updated the Purchase Order and Purchase Order - Consolidated Items reports to use the same query, with two differences; PO Detail Comment value exclusion for the Consolidated version, and detail item grouping for the Consolidated version.
		I2508230	Added support for the CRM Outlook Online Sync service.
		I2601110	The core Unposted GL Inventory Transactions search has been excluded.
		I2601183	Corrected error running income statement with the show transaction details enabled.
		I2511061	Adjusted Credit Logic to handle 100% deposits that are non taxable yet the order is taxable. If the deposit covers 100% and is paid the order will not appear as part of balance owing.
		I2512059	Altered overdue invoice check for Credit to also make sure the paid flag is false and not just balance owing.
		I2512043	Re-inserted the Physical Inventory Worksheet report into the database.
		I2507122	The following searches have been successfully transferred to the ActiveM_Development database: Open AP Invoices, Open AR Invoices, Location Report, Quote Summary by Status, Make Items Inventory, Item - Where Used Report, Employee Hours by Work Order, Open PO by PO, Inventory Usage by GL Account, Open PO by Sales Order, Open PO by Vendor, On Time Delivery Performance, Order Action by Sales Order
		I2510069	Added an integrity check: Items - UOM Conversion with factor of zero.
		I2508073	Created table SecuredControlSets, SecuredControlSetDetails, and GroupSecuredControlSets. Renamed GroupedSecuredControls to GroupedSecuredControls_Old. Created View GroupedSecuredControls to use the new data model
		I2511045	Added AutoProcessorStatus as a field to Estimate/Sales Order. Added ShowAutoProcessorStatus to AxisPreferences so it can be disabled.
		I2510003	<ul style="list-style-type: none">- Renamed Job Costing Opportunities search to Opportunities.- Moved the Opportunities search into the newly created Opportunities Search module.- Created a new Job Costing search under the Job Costing Search module.- Added document type filtering to both Opportunities and Job Costing searches by joining JobControlDocumentTypes table and applying a WHERE clause on DescriptionTiny field.- Modified the Opportunities search and the Job Costing search to show both Open and Closed documents, and show the Open/Closed status in a new search field.

Seradex OrderStream

Technical Release Notes

February 2026

6.4.332	02/03/2026	I2511145	<p>The following changes have been applied to sxActiveM_Development database:</p> <ul style="list-style-type: none">- Updated Extended Actual Cost and Extended Std Cost fields for Invoice.- Fixed Quantity column so Credit Notes use QtyCredited and Invoices use QtyOrdered.- Corrected UOM by separating Price UOM, Ordered UOM, and Credit UOM- Removed duplicate quantity columns from the Credit Note search.- Added Credit UOM to Credit Note search.- Renamed and repositioned Price UOM column.- Ensured all SearchDetails align with updated BaseQueries.- Added Where clause for Credit Note search to filter out Invoices.- Ensured the Credit Note form launches on double-click, not the Invoice form.
DataTransferBuilder.exe			
6.4.32	01/05/2026	I2511118	Now supports binary columns the tables listed in dbo.DataTransfer
DBox Web Front End Components (WFE)			
6.4.51	01/08/2026	I2512198	Fixed issue with downloading reports via the transaction page
		I2601032	Fixed an issue that would cause the Set and Reset password pages to redirect to the home page.
6.4.52	02/04/2026	I2512150	Updated dependency to fix issue with viewing reports while using DBOX via an iframe.
		I2512175	Fixed issues with pagination and search filtering for the DBOX search component. Added support for filtering by boolean fields.
		I2511113	DBOX will now support configuring product lines that are Linked Details that don't have a parent product line/configuration.
		I2511225	Added message to explain why login attempts fail for inactive users
		I2512169	Fixed issue with Employee dropdown in CRM Convert to Customer dialog where all employee options get removed when an invalid filter is applied.
		I2511005	Added boolean filtering to our search component
		I2511045	When your order has configured items DBOX will now by default tell the user when it is still processing the lines that the price is still being calculated. Once the Auto-Processor is finished it will automatically update the price and refresh the details in case shipping/handling was added and let the user know to review the price.
ERP Anywhere			
6.4.11	02/04/2026	I2511225	Added message to explain why login attempts fail for inactive users
		I2510043	Added New Unit Cost support for Inventory Adjustments
		I2512071	Added support for 4 digits to the Container module.

Inventory - Valuation by Category.trdp

Seradex OrderStream

Technical Release Notes

February 2026

6.4.3 02/03/2026 I2511076 Modified the "Inventory - Valuation by Category" core report file to explicitly sort by CategoryCode and then by ItemNo, and also to increase the visibility of the Grand Total fields. The detail value fields were also increased in width slightly, at the expense of a few other fields.

InventoryTransfer.dll

6.4.141 02/03/2026 I2510083 The "Transfer Inventory" menu option has been disabled when the Batch Inventory Processor is active since inventory updates are to be done by the processor and not via this menu option.

Invoice.dll

6.4.203 02/03/2026 I2509225 Altered setting of balance owing to ensure no floating point issues with very large balances that can occur with specific balance owing values.
I2512062 Ensure if invoicing a shipment and there are non shippable items but not deposit and there are items auto added based on the shipment that the auto add item remains at the bottom of the invoice

ItemEditor.dll

6.4.176 02/03/2026 I2507263 Added basic handling to enable the Save button when the Items > Edit Vendor form is modified and disable it when it is not.

MatReq.dll

6.4.163 01/27/2026 I2601172 Revert Assembly flag change for Transfer MRP.

POInvoice.dll

6.4.143 02/03/2026 I2509225 Altered setting of balance owing to ensure no floating point issues with very large balances that can occur with specific balance owing values. Also added safety logic on delete to remove GL entries in case the invoice ended up unapproved yet that did not remove GL entries.

Purchase Order.trdp

6.4.3 02/03/2026 I2601068 Minor UI alignment modifications to the Purchase Order report layout.

QualityAssurance.dll

6.4.19 02/03/2026 I2512218 Corrected issue if the logged in employee is not a supervisor or not found attempting to pass override

SalesOrder.dll

Seradex OrderStream

Technical Release Notes

February 2026

6.4.263	02/03/2026	I2601030	Ensure any QC Tests against the sales order line itself are removed when the line or the whole order is deleted and copied when the order is copied or a line is copied.
		I2506061	New advanced delivery schedule applications preferences can now prevent shipments from being updated when the related sales order is changed.
		I2511129	When adding a line from a sales order to an existing open shipment, the system will no longer duplicate single quotes in the items description.
Seradex.AdminToolsSystem.dll			
6.4.0	02/03/2026	I2508073	Converted the User form to .NET. Converted the Group Setup form to .NET. Reworked the Group Setup form to use the new secured controls data model.
Seradex.AppBox.exe			
6.4.24	02/03/2026	I2508078	Modified to handle exceptions that are raised to it from sxRuntime more gracefully.
Seradex.CommonServices.dll			
6.4.101	02/03/2026	I2512243	Improved the robustness of ActiveTransaction handling for rare, long-idle scenarios where a record exists for over 24.8 days.
		I2601161	EmbeddedFileType gets set to null if the EmbeddedFile is saved to a FileTable. Fixed issue when DocumentStorageFiles were getting deleted for having an EmbeddedFileType.
		I2508230	Modified to add support for the CRM Outlook Online Sync service.
		I2601137	Convert Help site URL parameters to lowercase prior to launching the website.
Seradex.ConfiguratorSystem.dll			
6.4.19	02/03/2026	I2511045	The AutoProcessor will now update a new field (AutoProcessorStatus) on the Estimate/Sales Order header to let DBOX know that it has finished processing.
Seradex.Dbox.dll			
6.4.54	01/20/2026	I2601032	Fixed an issue that would cause the Set and Reset password pages to redirect to the home page.
		I2512198	Fixed issue with downloading reports via the transaction page
6.4.55	02/04/2026	I2511159	Corrected an issue where the additional property value information columns for use in the Configurator Property Expand/pop-up property selector would duplicate columns sometimes.
		I2510047	Implemented a new feature in product line setup, Seradex Maintenance Tools and Dbox to clear the Dbox productline configurator cache upon changes to configurator setup. This will also clear the cached workbook.

Seradex OrderStream

Technical Release Notes

February 2026

6.4.55	02/04/2026	I2511045	Added functionality to watch the new AutoProcessorStatus when on the Sales Order/Estimate pages. This will be used to let the user know that the price is not done calculating and dynamically refresh the info on the page when it is.
		I2511113	DBOX will now support configuring product lines that are Linked Details that don't have a parent product line/configuration.
Seradex.Email.dll			
6.4.22	02/03/2026	I2508230	Modified to add support for the CRM Outlook Online Sync service.
Seradex.Email.Providers.dll			
6.4.1	02/03/2026	I2508230	Modified to add support for the CRM Outlook Online Sync service.
Seradex.EstimateSystem.dll			
6.4.55	02/03/2026	I2601030	Ensure any QC Tests against the estimate line itself are removed when the line or the whole estimate is deleted.
		I2509188	A customer item revision field has been added.
		I2511149	Estimate lines' Comment values will be pushed into the SalesOrder lines' Comment field when generating the SalesOrder from an Estimate, no matter what the item is.
Seradex.Infragistics.dll			
6.4.78	02/03/2026	I2512070	Improved how grid settings were applied and made sure connections were closed when applying settings in search and transaction modules
		I2508230	Modified for internal use.
Seradex.Inventory.dll			
6.4.65	02/03/2026	I2601030	Ensure for QC rejected manual inventory, the inventory goes to the desired reject location if it is a failure.
		I2509195	Transfers created on SFE Start operation will now pull inventory from the item's main location setup against the work order line's facility.
Seradex.InvoiceSystem.dll			
6.4.52	01/05/2026	I2601004	Corrected display issue whereby viewing an invoice for a completely invoiced sales order the form caption stated Shipped and Partially Invoiced vs Invoiced
6.4.53	01/06/2026	I2601016	Corrected issue whereby if there are auto add items based on an invoice and they were not already on the invoice it would not add them and an error was thrown.
6.4.54	02/03/2026	I2512062	Ensure auto add items for invoice based on a shipment work regardless of having a deposit or not. Does not affect anyone setup with the same logic for both shipment and invoice.

Seradex OrderStream

Technical Release Notes

February 2026

6.4.54 02/03/2026 I2509188 A customer item revision field has been added.

Seradex.Library.dll

6.4.42 01/05/2026 I2601005 Updated to convert Productline.DisplayOnWeb from boolean to integer.
6.4.43 02/03/2026 I2509188 A customer item revision field has been added.
I2508073 Added support for the new SecuredControlSets, SecuredControlSetDetails, and GroupSecuredControlSets tables. Removed support for the old GroupedSecuredControls table.

Seradex.OrderEntry.AdvancedDeliverySchedule.dll

6.4.8 02/03/2026 I2506061 Delivery schedules can now be automatically generated from sales order.

Seradex.OrderEntry.Bases.dll

6.4.34 02/03/2026 I2509188 A customer item revision field has been added.

Seradex.OrderEntry.dll

6.4.26 02/03/2026 I2509188 A customer item revision field has been added.

Seradex.OrderEntryLibrary.dll

6.4.54 02/03/2026 I2509188 A customer item revision field has been added.

Seradex.ProductConfigurator.dll

6.4.32 02/03/2026 I2509125 Updated to retain the proper mastered item number, and not revert to the product line item number, when re-configuring transaction line items

Seradex.Production.DataCollection.dll

6.4.85 02/03/2026 I2510034 The Shop Floor logic for serial items stored in the WorkOrderLotSerialInventory table has been updated. When completing a work order serial item on the final operation, if the user enters a quantity of 1 and selects Stop rather than Complete, the system will now ensure that both the operation and the corresponding serial work order line are properly marked as completed.
I2512218 Adjusted desktop based SFE to properly launch the QC module as required
I2503230 Added a .NET hook for after work order completion.

Seradex.Production.QualityAssurance.dll

6.4.12 02/03/2026 I2601030 Corrected issue viewing existing approved QC Orders.

Seradex OrderStream

Technical Release Notes

February 2026

Seradex.Production.WorkOrder.dll

6.4.62	02/03/2026	I2506061	Removing a work order line, or a work order can now remove make to order items from related delivery schedules and shipments depending on system settings.
		I2507226	You can no longer save Work Orders if any details lines are missing a UOM, Location, Schedule Direction or Priority
		I2509188	A customer item revision field has been added.

Seradex.Purchasing.dll

6.4.55	02/03/2026	I2511136	The Order Qty Received to Date will be shown in the PO grid as well as the Stock Qty Received to Date.
--------	------------	----------	--

Seradex.Purchasing.ReceivingSystem.dll

6.4.60	02/03/2026	I2511062	The Receive All menu item on the receiving form now converts the purchased UOM into the received UOM when setting the quantity received.
--------	------------	----------	--

Seradex.RestApi.dll

6.4.47	02/04/2026	I2510043	Added New Unit Cost support for Inventory Adjustments
		I2511113	DBOX will now support configuring product lines that are Linked Details that don't have a parent product line/configuration.
		I2511045	Added functionality to watch the new AutoProcessorStatus when on the Sales Order/Estimate pages. This will be used to let the user know that the price is not done calculating and dynamically refresh the info on the page when it is.
		I2511225	Inactive users can no longer login to DBOX or ERP Anywhere

Seradex.SalesOrderSystem.dll

6.4.66	02/03/2026	I2509188	A customer item revision field has been added.
		I2511149	Estimate lines' Comment values will be pushed into the SalesOrder lines' Comment field when generating the SalesOrder from an Estimate, no matter what the item is.

Seradex.Shipping.dll

6.4.43	02/03/2026	I2509188	A customer item revision field has been added.
		I2506061	The shipping APIs have been extended to include line deletion.

Seradex.Strings.dll

6.4.62	02/03/2026	I2506061	New advanced delivery schedule applications preferences have been added.
--------	------------	----------	--

Seradex OrderStream

Technical Release Notes

February 2026

Seradex.Utilities.IntegrationMgrSystem.dll

6.4.50 02/03/2026 I2512017

The ErrorLogs Name field will now be truncated to 250 characters prior to save.

Seradex.Win.AdminTools.dll

6.4.0 02/03/2026 I2508073

Converted the User form to .NET. Converted the Group Setup form to .NET. Reworked the Group Setup form to use the new secured controls data model.

Seradex.Win.AdvancedDeliverySchedule.dll

6.4.15 02/03/2026 I2506061

Delivery schedules can now be automatically generated from sales order.

Seradex.Win.Controls.dll

6.4.60 02/03/2026 I2601161

Document Storage Grid no longer treats DocumentStorage entries with an EmbeddedFileType while not having an EmbeddedFile as a temp file that needs to be deleted.

Seradex.Win.Email.dll

6.4.4 02/03/2026 I2508230

Modified to add support for the CRM Outlook Online Sync service.

Seradex.Win.Estimate.dll

6.4.73 02/03/2026 I2509188

A customer item revision field has been added.

Seradex.Win.Invoice.dll

6.4.76 02/03/2026 I2509188

A customer item revision field has been added.

I2511287 Added the Reference grid field to the list of those with a double-click > exploded view text box. Changes to the Config Description grid field will not be permitted.

I2512062 If the license is active for auto add items on invoice but only setup to do it by shipment, do not prompt the user to add charges if they had the registry setting set to ask. Also the manual menu is not required for credit note or if you are not setup for invoice charges.

Seradex.Win.MaintenanceTools.dll

6.4.30 01/19/2026 I2601067

Updated to address a connection issue in Web Update when using AppBox.

6.4.31 02/03/2026 I2510047

Implemented a new feature in product line setup, Seradex Maintenance Tools and Dbox to clear the Dbox productline configurator cache upon changes to configurator setup. This will also clear the cached workbook.

Seradex OrderStream

Technical Release Notes

February 2026

Seradex.Win.NonConformanceManager.dll

6.4.36	02/03/2026	I2601137	Ensure a Help site URL parameter is supplied when launching the Help page.
--------	------------	----------	--

Seradex.Win.Purchasing.dll

6.4.93	02/03/2026	I2601137	Updated to conform to Help site launching standard.
		I2511287	Added the Reference grid field to the list of those with a double-click > exploded view text box.
		I2511136	The Order Qty Received to Date will be shown in the PO grid as well as the Stock Qty Received to Date.

Seradex.Win.Receiving.dll

6.4.77	02/03/2026	I2511287	Added the Reference grid field to the list of those with a double-click > exploded view text box.
		I2601137	Updated to conform to Help site launching standard.

Seradex.Win.SalesOrder.dll

6.4.80	02/03/2026	I2601137	Updated to conform to Help site launching standard.
		I2601145	The Customer Item Revision field will now be loaded when generating a sales order from a service order.
		I2506061	The sales order form now has a generate delivery schedule tools menu option.
		I2509188	A customer item revision field has been added.
		I2512147	The SalesOrder form will have the ReadOnly property correctly applied for members of a group to which this restriction has been added.

Seradex.Win.Search.dll

6.4.117	02/03/2026	I2601137	Ensure the correct Help site URL parameter is supplied when launching the Help page.
---------	------------	----------	--

Seradex.Win.ServiceOrder.dll

6.4.32	02/03/2026	I2507153	Added support for Labour items with ItemNo: Labour, Labor, _Labour, and _Labor. The check will also ignore any discontinued labour items.
--------	------------	----------	--

Seradex.Win.Shipping.dll

6.4.64	02/03/2026	I2509136	Users can no longer save if there's no 'Shipped UOM' selected on a shipping detail line.
		I2509188	A customer item revision field has been added.

Seradex OrderStream

Technical Release Notes

February 2026

Seradex.Win.ShopFloorExecution.dll

6.4.78	02/03/2026	I2503230	Added the ability for a custom routine to display a message via the main Shop Floor screen.
		I2601030	Ensured QC module opened to the user on work order completion if a QC order is generated as opposed to having it just generated.

Seradex.Win.WorkOrder.dll

6.4.67	02/03/2026	I2506061	Removing a work order line, or a work order can now remove make to order items from related delivery schedules and shipments depending on system settings.
		I2509188	A customer item revision field has been added.

setup.exe

6.4.5	02/03/2026	I2508230	Modified to use OAuth tokens setup and acquired via the new Mail Setup form.
-------	------------	----------	--

sxLicense.exe

6.4.31	01/05/2026	I2502153	Changed the User License Count encoding for improved compatibility.
--------	------------	----------	---

sxMaintenanceControls.ocx

6.4.54	02/03/2026	I2511259	Modified the Work Order Completion - Backflush additional Inventory to satisfy BOM Requirements tooltip to more thoroughly describe its repercussions.
		I2512003	Deleting form-specific Number of Days values from the grid or entering a non-numeric value into those fields will no longer result in an unhandled exception.
		I2506061	New advanced delivery schedule applications preferences have been added.

sxProfile.dll

6.4.33	02/03/2026	I2508073	The Profile form now calls the new .NET version of the Group Setup (Advanced Security) and User forms.
--------	------------	----------	--

Template.xls

6.4.23	02/03/2026	I2602010	VBA syntax errors were corrected.
--------	------------	----------	-----------------------------------

WorkOrder.dll

Seradex OrderStream

Technical Release Notes

February 2026

6.4.252	02/03/2026	I2510034	The WorkOrder completion process has been modified to ensure that, when using the Inventory Batch Processor, zero-quantity completions are no longer sent to the batch queue. Instead, these transactions will be processed locally since they do not impact inventory levels.
6.4.253	02/04/2026	I2601190	Modified to correct an issue preventing the "Qty Transferred to Date" value from resetting to zero when a work order inventory transfer is deleted during a work order update from a sales order.
