## Technical Release Notes

March 2015

### **Config.dll**

6.4.121	03/20/2015	I1503147	Corrected an issue in the previous release where if no operation numbers were specified for the routings (labour) within the Productline excel sheet and there were more than one labour step, the labour schedule and associated data was not built correctly.
6.4.122	03/25/2015	I1503190	Corrected an issue with Productlines that build a multi-level BOM, where certain validations were looking at wrong row information for routing references and would not build the BOM correctly or produce an error.

### **RptFinancials.dll**

6.4.40	03/20/2015	I1502210	Added system cheque number to the core cheque reports to be printed on each remittance page
--------	------------	----------	---

### **Seradex.Production.Scheduling.dll**

6.4.36	03/20/2015	I1503169	Shop Floor Execution will now check for Report on Event access database tables, and skip Report on Event functionality if they do not exist.
--------	------------	----------	--

### **Seradex.Win.ShopFloorExecution.dll**

6.4.24	03/20/2015	I1503169	Shop Floor Execution will now check for Report on Event access database tables, and skip Report on Event functionality if they do not exist.
--------	------------	----------	--
