Technical Release Notes
March 2026

AR Sales Tax Report.trdp

6.4.0	03/04/2026	I2405332	Upgraded AR Sales Tax Report to Telerik

ClientReports.dll

6.4.115	03/04/2026	I2504143	Telerik report queries will no longer be run through the helper function that converts Access-style queries to SQL-style queries.

DataTransfer.mdb

6.4.333	02/10/2026	I2602086	Modified to add the missing CustomerItemRevision field to the WorkOrderNonConsolidatedDetails table to avoid an error when loading consolidated work orders.
		I2602071	Ensure the Name field is added to the SecuredControlSets table and update any NULL Names to the Description value if the table was created prior to the inclusion of the Name field.
6.4.334	03/04/2026	I2601206	Expand DocumentStorage FilePath to store long URLs.
		I2411045	Modifed the Web Reports table to include a "Search launch type" and modified the Search Details so that the WebReport launch fields have the same data type/size as the Transaction Launch fields.
		I2405332	New functions to obtain data similar to the tax sub report and also a new function for the AR Sales Tax Report
		I2601110	The core Unposted GL Inventory Transactions search exclusion has been reversed.
		I2602109	Corrected issue with the Secured Control data migration script to ensure Group Names exceeding 46 characters do not cause a truncation error.

DBox Web Front End Components (WFE)

6.4.53	03/04/2026	I2602245	Corrected an issue where the alerts would appear after the Configurator item master dialog forcing the configurator item master dialog to appear a second time.
		I2601071	DBOX transaction's Web Category Sell Items table will remember the "Items per page" that the user selected. This is saved to their browser so if the user logs out or uses another browser, the "Items per page" will default to 10.
		I2411045	Added support to launch reports from Search in Web, similar to how you can launch a module from Search.
		I2512217	Created new "Manage Sales Rep" page. Fixed issues with the old "Create Sales Rep" dialog.
		I2511284	Added support for PO Numbers in the Estimate page within DBOX 2.0.
		I2510026	You can now change the Main logo, Top bar logo and the side bar logo of DBOX websites. You can now set up to 6 login backgrounds. You can also set a theme override to make sure all users use a set theme (Light or dark)
		I2602012	Fixed issue where "View" only secured elements would still be clickable. Also a securiry debug view to OrderStream Web that can be enabled via the settings page.

Seradex OrderStream
Technical Release Notes
March 2026

EngineeringChange.dll

6.4.26	03/04/2026	I2602165	Ensure that changes to the Item Change grid are correctly tracked. Ensure that the Replacement Item combo is initialized correctly to ensure the ReplacementItemID is set on selection. Update Save behaviour to only disable the Save button if the save was successful.

ERP Anywhere

6.4.12	03/04/2026	I2511267	The Receiving module options of "Show all open POs" and "Show Approved" now work together
		I2602254	Fixed issue when creating a negative adjustment
		I2512063	Added the Shop Floor print function to the Work Order module.
		I2509164	Added the ability to take and save videos
		I2601028	Scan handling and Scannerdialog reworked. Now remembers user input to speed up user work flow.
		I2602141	Fixed issue where the Shop Floor Material's list would show the wrong amount for QtyOnHand.

ExcelBOMImport.dll

6.4.19	03/04/2026	I2511055	When updating an item, the item vendor-related DateModified and UserModified fields will only be updated if something was actually updated.

InventoryAdjustment.dll

6.4.117	03/04/2026	I2601053	Inventory with leading or trailing spaces in racks, bins, or containers, or user-defined fields can now have such inventory returned when attempting to select it for adjustment.
		I2601105	Improved the validation on save and approval, to check for any line location not being set.
		I2602018	Improved fault tolerance for empty (or apparently empty) Actual Unit Cost cell values on import of Physical Inventory Sheet.

ItemEditor.dll

6.4.177	03/04/2026	I2602114	Typing into the Item Editor > Item Vendor form's Vendor combo will no longer mark the form as "changed", thereby disabling the Vendor combo.

JobCosting.dll

6.4.118	03/04/2026	I2509219	When converting an Opportunity into a Job, the user is prompted to reopen the form in Job mode.
		I2602033	When activating the JobCosting/Opportunities form, the user's username will be read correctly, leading to that user's employee being set and used as the fallback value for the Estimator (if no value is explicitly set) on saving a new document.

6.4.118	03/04/2026	I2512153	Restored functionality of the F2 key when selecting a line in the Opportunity Details spread.

MatReq.dll

6.4.164	03/04/2026	I2505277	Make items will now be reported on by the Sales Order Line behaviour in Transfer MRP mode.
		I2508231	Ensure that sales order line item allocations are subtracted from the required amount of the sales order qty.
		I2510209	Ensure that the MRP temp table creation occurs using the Inventory Items rounding units instead of the Purchasing module's rounding units.

POInvoice.dll

6.4.144	03/04/2026	I2601197	Changed the PO line extended cost field to be the actual PO line extended cost, rather than the product of the received quantity and the invoice unit cost.

Seradex.AccountSystem.dll

6.4.2	03/04/2026	I2512231	Modified the Customers object to allow non-Customers table fields to be stored.

Seradex.AutomatedScanner.dll

6.4.8	03/04/2026	I2509102	Upgraded to new versions of Telerik components (Reporting 19.3.26.121, UI for WinForms 2025.4.1321).

Seradex.Dbox.dll

6.4.56	03/04/2026	I2411045	Added support to launch reports from Search in Web, similar to how you can launch a module from Search.
		I2510048	Added the ability to use GenKey to automatically create Item Numbers in the DBOX configurator when mastering new items.
		I2601092	Extracted code that interfaced with the Telerik Reporting assemblies to it's own project for better isolation.
		I2603022	Fixed an issue where copying a line item would trigger every item on the current order to reconfigure in DBOX
		I2602244	Fixed an issue where the propertyName_Images named range to associate images with your excel filtered properties was retrieving one less image than specified by the range size.
		I2602245	Corrected an issue where the alerts would appear after the Configurator item master dialog forcing the configurator item master dialog to appear a second time.

Seradex.Infragistics.dll

6.4.79	03/04/2026	I2602124	Creating an estimate revision will no longer clear grid settings for the Estimate form.

| 6.4.79 | 03/04/2026 | I2602108 | Changes to a search or grid will now be incorporated into the existing grid settings, rather than causing the grid settings to be deleted. |

Seradex.Inventory.dll

| 6.4.66 | 02/06/2026 | I2602060 | Ensure that SFE Auto Transfer item source locations are correctly gathered when Multi-Facility behaviour is not enabled. |

Seradex.InvoiceSystem.dll

| 6.4.55 | 03/04/2026 | I2511082 | Altered invoice to adjust deposit invoice application if applicable when invoice lines are deleted. |
| | | I2601196 | Improved the efficiency of loading invoice header data when generating invoices from sales order or shipping and for shipments with multiple sales orders ensure the header location comes in as expected. |

Seradex.OrderEntryLibrary.dll

| 6.4.55 | 03/04/2026 | I2510065 | The prompt and preference to prompt the user on change of Expected Arrival Date have been deprecated. |
| | | I2504212 | When Excel is accessed for price list functionality and it is not installed, users will now receive a message stating it should be installed, or Aspose should be setup. |

Seradex.Production.Calendar.dll

| 6.4.23 | 03/04/2026 | I2602054 | Restored the abilty to edit existing exceptions when the edit does not overlap dates and ensured the UI clears properly when changing calendar types. |

Seradex.Production.QualityAssurance.dll

| 6.4.13 | 03/04/2026 | I2602027 | Improved the copy QC order level tests to ensure work orders copy when you go from a wo line with a sales order to one without and there are no tests on the WO line you are copying from itself but the related sales order or estimate. |

Seradex.Production.WorkOrder.dll

| 6.4.63 | 03/04/2026 | I2602027 | Improved the copy QC order level tests to ensure work orders copy when you go from a wo line with a sales order to one without and there are no tests on the WO line you are copying from itself but the related sales order or estimate. |

Seradex.ReportSystem.TelerikExtension.dll

| 6.4.2 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components (Reporting 19.3.26.121, UI for WinForms 2025.4.1321). |

Seradex.RestApi.dll

6.4.48	03/04/2026	I2509164	Added support to save videos for ERP Anywhere
		I2512217	Fixed issue when changing the Email for registered users. Added better support for creating/managing sales reps.
		I2601071	DBOX transaction's Web Category Sell Items API call now accepts a pageSize parameter to allow the API call send more than 10 rows by default.
		I2510048	Added the ability to use GenKey to automatically create Item Numbers in the DBOX configurator when mastering new items.
		I2411045	Added support to launch reports from Search in Web, similar to how you can launch a module from Search.
		I2601092	Extracted code that interfaced with the Telerik Reporting assemblies to it's own project for better isolation.
		I2511267	Updated Receiving API endpoints to better support the options from ERP Anywhere
		I2602244	Fixed an issue where the propertyName_Images named range to associate images with your excel filtered properties was retrieving one less image than specified by the range size.
		I2603022	Fixed an issue where copying a line item would trigger every item on the current order to reconfigure in DBOX
		I2602245	Corrected an issue where the alerts would appear after the Configurator item master dialog forcing the configurator item master dialog to appear a second time.

Seradex.Search.dll

6.4.101	03/04/2026	I2411045	Modified Search to support the Web Report Launch Field to enable setup for launching a report directly from a Search in DBOX

Seradex.Shipping.dll

6.4.44	03/04/2026	I2506073	Modified to improve the shipping inventory update related routines to be able to call them from the offline batch transaction processor.

Seradex.SpecBuilder.dll

6.4.18	02/13/2026	I2510233	Refined to ensure the build process covers more complex, multi☐level operation chain cases.

Seradex.Strings.dll

6.4.63	03/04/2026	I2602054	Added an enum for calendar types

Seradex.Utilities.BatchTransactionProcessor.exe

6.4.6	03/04/2026	I2506073	Modified to replace the old VB6 call when processing shipments with the new .NET version to be able to return more meaningful and user-friendly error messages.

Seradex.Utilities.CopyConfigurator.dll

6.4.6	03/04/2026	I2506090	A warning has been added to show which database tables will have data removed and replaced by the copy action.

Seradex.Utilities.IntegrationMgrSystem.dll

6.4.51	03/04/2026	I2511248	Ensure a default App Integration Setup object is populated when using the API import.

Seradex.Win.AdminTools.dll

6.4.1	02/10/2026	I2602071	Ensure that the Users, Groups, and Secured Control setup forms only connect to the master sxSystem database, and do not attempt to connect to the ActiveM database.

Seradex.Win.Controls.dll

6.4.61	03/04/2026	I2601206	Updated the DocumentStorage control to save only files that actually exist to the FileTable, and to ensure that manual edits to an existing line correctly prompt the user when embedded or FileTable☐backed data must be cleared.

Seradex.Win.Invoice.dll

6.4.77	03/04/2026	I2512231	The footer Grand Total label will now reflect the selected invoice's currency code.
		I2511082	Altered invoice to adjust deposit invoice application if applicable when invoice lines are deleted.

Seradex.Win.Purchasing.dll

6.4.94	03/04/2026	I2505277	When using Transfer MRP, the Include Assembly checkbox will now be hidden and auto-checked.
		I2407034	Added support for custom .net hooks on the PO form for load as well as approval and PO delete.

Seradex.Win.Search.dll

6.4.118	03/04/2026	I2411045	Modified Search to support the Web Report Launch Field to enable setup for launching a report directly from a Search in DBOX
		I2602108	Modified the search designer to not delete grid settings if a search is modified to change the number of search details.

Seradex.Win.Telerik.dll

| 6.4.34 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components (Reporting 19.3.26.121, UI for WinForms 2025.4.1321). |

Seradex.Win.WorkOrder.dll

| 6.4.68 | 03/04/2026 | I2510066 | Modified to ensure the form refreshes after transfers are generated, allowing any fields updated externally in the database to be accurately reflected on the form. |

sxMaintenanceControls.ocx

| 6.4.55 | 03/04/2026 | I2510065 | The prompt and preference to prompt the user on change of Expected Arrival Date have been deprecated. |

Telerik.Licensing.Runtime.dll

| 6.4.0 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components |

Telerik.ReportDesigner.exe

| 6.4.2 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components (Reporting 19.3.26.121, UI for WinForms 2025.4.1321). |

Telerik.ReportDesigner.x86.exe

| 6.4.2 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components (Reporting 19.3.26.121, UI for WinForms 2025.4.1321). |

Telerik.Reporting.dll

| 6.4.5 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components |

Telerik.Reporting.OpenXmlRendering.2.7.2.dll

| 6.4.2 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components |

Telerik.Reporting.XpsRendering.dll

| 6.4.2 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components |

Telerik.ReportViewer.WinForms.dll

| 6.4.5 | 03/04/2026 | I2509102 | Upgraded to new versions of Telerik components |

Telerik.WinControls.dll

6.4.3	03/04/2026	I2509102	Upgraded to new versions of Telerik components

Telerik.WinControls.UI.dll

6.4.3	03/04/2026	I2509102	Upgraded to new versions of Telerik components

TelerikCommon.dll

6.4.3	03/04/2026	I2509102	Upgraded to new versions of Telerik components

WorkOrder.dll

6.4.254	02/17/2026	I2602142	Modified to resolve a work order generation error caused by the missing CustomerItemRevision field in the temporary table used by the generation procedure of the WorkOrder Generator.
