**AcctMaintenance.dll**

| | | | |
|---|---|---|---|
| 6.4.103 | 11/30/2018 | I1811180 | The systems currency symbol will now appear in cases where it is not the dollar sign. |

**ActiveM20.dll**

| | | | |
|---|---|---|---|
| 6.4.116 | 11/30/2018 | I1806133 | Altered inventory on hand and allocation forms to handle the new ContainerNo field for inventory. |

**AdminTools.dll**

| | | | |
|---|---|---|---|
| 6.4.49 | 11/30/2018 | I1811135 | AdminTools can now download new updates if the DBOX update management file "Seradex.Win.MaintenanceTools.dll" is missing or incorrectly registered. |

**AutoConfig.dll**

| | | | |
|---|---|---|---|
| 6.4.105 | 11/30/2018 | I1810252 | An adjustment was made to ensure the custom logic for reconfiguration is looking at the right database table. |

**ClientReports.dll**

| | | | |
|---|---|---|---|
| 6.4.76 | 11/30/2018 | I1807236 | Added support for tracking generation of one click emails against document headers. |

**Config.dll**

| | | | |
|---|---|---|---|
| 6.4.168 | 11/30/2018 | I1811188 | Implemented a new Configurator Type field in Configurator Setup for DBOX |
| | | I1809191 | Multiple property value selction issues when navigating between Configurator Property Defaults form and History Lookup module. |

**CreditNote.dll**

| | | | |
|---|---|---|---|
| 6.4.116 | 11/20/2018 | I1810047 | The systems currency symbol will now appear in cases where it is not the dollar sign. |
| | | I1801010 | Extracted form independent functionality from the form to allow for external usage. |
| 6.4.117 | 11/30/2018 | I1811180 | Expanded support for system's currency symbol. |

**CRM.dll**

| | | | |
|---|---|---|---|
| 6.4.128 | 11/30/2018 | I1811180 | The systems currency symbol will now appear in cases where it is not the dollar sign. |

**DataTransfer.mdb**

| 6.4.229 | 11/30/2018 | I1810146 | Sales Rep has been added as a column to the Core Account Search in DBOX. |
|---|---|---|---|
| | | I1810312 | Added translations for the new multi-item image upload page. |
| | | I1810010 | Altered Remittance report to ensure non cheque payments that pay vendor invoices are handled |
| | | I1807236 | An 'Emailed' field has been added to the SalesOrder, Invoice, and PurchaseOrder database tables. |
| | | I1807027 | Added ComboChart as a new Chart Type for DBOX. |
| | | I1810298 | The Daily Shipping Report has been updated to prevent result duplication. |
| | | I1808199 | Implemented a Single Tab Parent-Child configurator (Type 4) in DBOX as per attached documentation. Added ConfiguratorType field in productline table. |
| | | I1806133 | Data model to support tracking material by Containers. |
| | | I1811253 | Vendor Returns ProcType changed to 8 to allow for Appbox Smart Launching. |

**Estimating.dll**

| 6.4.154 | 11/20/2018 | I1810269 | Resolved issue where the .NET form could crash while completing the generation of a sales order. |
|---|---|---|---|
| | | I1807261 | Enhanced the Costing form for .NET compatibility. |
| | | I1808182 | Enhanced VB6 Estimate to pass the excel bom import object the .NET Estimate for Solidworks compatibility. |
| 6.4.155 | 11/30/2018 | I1809242 | In both LAN and Web, FileURL field is now always updated when FilePath is updated in DocumentStorage . Copying and updating Estimate and SalesOrder lines now updates both fields in both systems |
| | | I1811180 | Expanded support for system's currency symbol. |

**History.dll**

| 6.4.43 | 11/30/2018 | I1809191 | Multiple property value selction issues when navigating between Configurator Property Defaults form and History Lookup module. |
|---|---|---|---|

**InventoryAdjustment.dll**

| 6.4.89 | 11/30/2018 | I1806133 | Added ability to adjust existing container inventory |
|---|---|---|---|

**InventoryTransfer.dll**

| 6.4.86 | 11/30/2018 | I1806133 | Added ability to transfer existing container inventory |
|---|---|---|---|

**Invoice.dll**

| 6.4.147 | 11/20/2018 | I1801008 | Split out additional form independent functionality. |
|---|---|---|---|

| 6.4.148 | 11/30/2018 | I1811180 | Expanded support for system's currency symbol. |
| | | I1807236 | Generation of one click emails is now tracked in the database. |
| | | I1811254 | Modified to allow .NET Invoice access to Search |
| | | I1806133 | Added ability to ship containers and create new containers and alter existing ones. |

**ItemEditor.dll**

| 6.4.127 | 11/30/2018 | I1809242 | In both LAN and Web, FileURL field is now always updated when FilePath is updated in DocumentStorage . Attaching and editing Estimate and SalesOrder line attachments now updates both fields in Order Stream |
| | | I1811055 | Increased the MaxLength property of this textbox to 250 characters. |

**MicrovellumImport.dll**

| 6.4.22 | 11/26/2018 | I1810082 | Modified to ensure that when an item is not found during the import process and the dialog for correcting action is displayed if the user types too fast or paste the action value in the action combo box, the system still will be able to set the correct value so that the action can be properly executed. |

**PurchaseOrder.dll**

| 6.4.120 | 11/20/2018 | I1809230 | Added logic to support the new .net PO. |
| 6.4.121 | 11/30/2018 | I1807236 | Generation of one click emails is now tracked in the database. |
| | | I1811180 | Expanded support for system's currency symbol. |

**Receiving.dll**

| 6.4.132 | 11/13/2018 | I1811080 | Restored support for receiving lot serial inventory customizations. |
| 6.4.133 | 11/20/2018 | I1811059 | Opening the customer search on the Receiving form and then closing it without selecting a customer first will no longer result in a Type Mismatch error. |
| | | I1810269 | Updated to check necessary modules activations when launching from .NET. |
| | | I1801007 | Receiving has been enhanced to expose additional functionality to the .Net version. |

**SalesOrder.dll**

| 6.4.191 | 11/20/2018 | I1810269 | SalesOrder.dll enhanced to ensure .NET doesn't experience an issue generating an invoice with deposit details. |
| | | I1811132 | .NET Sales Order deletion validation for associated workorder and shipping documents has been enhanced. |
| 6.4.192 | 11/30/2018 | I1810219 | The performance of the sales order on hold override form has been improved. |
| | | I1807236 | Generation of one click emails is now tracked in the database. |
| | | I1811180 | Expanded support for system's currency symbol. |

| 6.4.192 | 11/30/2018 | I1809242 | In both LAN and Web, FileURL field is now always updated when FilePath is updated in DocumentStorage . Copying and updating Estimate and SalesOrder lines now updates both fields in both systems |
|---|---|---|---|

**Seradex.AccountSystem.dll**

| 6.4.0 | 11/20/2018 | I1801014 | Add common project for Account functionality. |
|---|---|---|---|

**Seradex.AddressSystem.dll**

| 6.4.1 | 11/20/2018 | I1809230 | Added logic to support the new .net PO. |
|---|---|---|---|

**Seradex.BaseSystem.dll**

| 6.4.35 | 11/20/2018 | I1809230 | Added logic to support the new .net PO. |
|---|---|---|---|
| | | I1801004 | Added common functionality for all projects. |
| | | I1801014 | The Range of Credit Note report menu option can now be used within the Credit Note form. |
| 6.4.36 | 11/29/2018 | I1809257 | Corrected issue if the header table of a transaction fails to update the system still tried the details |
| | | I1811246 | Legacy custom report mdbs will now load correctly from the .NET modules. |

**Seradex.CommonServices.dll**

| 6.4.42 | 11/20/2018 | I1810269 | Implemented Lazy Evaluation on module activation to enhance loading times. Resolved issue where Company Preference WOLineDefaultPriority was not initialized. |
|---|---|---|---|
| | | I1801004 | Improved performance when gathering the current user. |
| | | I1809230 | Added logic to support the new .net PO. |

**Seradex.Connection.dll**

| 6.4.36 | 11/20/2018 | I1801014 | Added functionality to retrieve a concatenated list of database values. |
|---|---|---|---|

**Seradex.EstimateSystem.dll**

| 6.4.0 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
|---|---|---|---|
| | | I1808033 | Enhanced for better handling for non nullable values. |
| | | I1705293 | Added an Estimate object class to enhance efficiency and ease of Estimate data manipulation within .Net |
| | | I1806028 | Estimate is now compatible with job costing. |

| 6.4.0 | 11/20/2018 | I1806252 | Built the Import From Giza and Microvellum logic into this version of SalesOrder. |

**Seradex.Financials.FinancialsSystem.dll**

| 6.4.97 | 11/30/2018 | I1811049 | Corrected issue saving the first bank deposit that exists in the system |
| | | I1809147 | Added support for TD USD Export Format |
| | | I1809271 | Voided Bank transactions now create a reversing bank transaction that is also voided as opposed to just creating a manual reversing GL entry. |

**Seradex.Infragistics.dll**

| 6.4.27 | 11/20/2018 | I1801014 | Added safety code when clearing a combo's data source. |
| | | I1808033 | Combo boxes have been enhanced for robustness. |
| | | I1801004 | Added common controls for all projects. |
| | | I1809230 | Added logic to support the new .net PO. |
| 6.4.28 | 11/29/2018 | I1809235 | Added new Reason Code Combo. |

**Seradex.Inventory.dll**

| 6.4.23 | 11/30/2018 | I1806133 | Added functionality to build new containers and alter existing ones as well as a means to generate a transfer to move all materials from one location to another per container |

**Seradex.InvoiceSystem.dll**

| 6.4.0 | 11/20/2018 | I1801014 | Added functionality for the Invoice form. |
| 6.4.1 | 11/29/2018 | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |

**Seradex.Library.dll**

| 6.4.7 | 11/29/2018 | I1809235 | Added support for a PO detail reason code for vendor revisions, will read Reason Codes assigned to the Purchasing Module. |

**Seradex.OrderEntry.Bases.dll**

| 6.4.15 | 11/20/2018 | I1801014 | Added handling for the credit note owner type. |
| 6.4.16 | 11/26/2018 | I1811271 | An issue where the taxGroupID of .NET order details could be set to 0 and cause a foreign key error has been resolved. An issue where the DisplayLineNo of a detail could be incorrectly treated as an integer and cause an error has been resolved. |

**Seradex.OrderEntry.dll**

| | | | |
|---|---|---|---|
| 6.4.14 | 11/20/2018 | I1801014 | Added .NET Functionality. |

**Seradex.OrderEntryLibrary.dll**

| | | | |
|---|---|---|---|
| 6.4.1 | 11/20/2018 | I1801014 | Modified tax functionality for OrderEntry modules, to ensure that deliberately set tax groups are retained. |
| 6.4.2 | 11/26/2018 | I1811271 | An issue where the taxGroupID of .NET order details could be set to 0 and cause a foreign key error has been resolved. |

**Seradex.Production.DataCollection.dll**

| | | | |
|---|---|---|---|
| 6.4.44 | 11/30/2018 | I1806133 | Added ability for work order completion to dictate to produce to a new container or an existing container for clients using the new container tracking module. |
| | | I1811154 | Modified Shop Floor Execution to leave the Work Order open when completing a split of the final operation until the last split is completed. |

**Seradex.Production.Rework.dll**

| | | | |
|---|---|---|---|
| 6.4.11 | 11/30/2018 | I1811072 | Corrected issue when completing a work order then immediately uncompleting when using scheduling and scheduling has not been run between the two actions |
| | | I1810074 | Altered rework so on an uncomplete material is sent back to the original location if the work order line itself is what allocated it. |

**Seradex.Production.Scheduling.dll**

| | | | |
|---|---|---|---|
| 6.4.71 | 11/30/2018 | I1506073 | A Tools menu item was added to allow the user to launch Calendar from Scheduling (Finite and DBR) |

**Seradex.Production.WorkOrder.dll**

| | | | |
|---|---|---|---|
| 6.4.10 | 11/20/2018 | I1809105 | .NET WorkOrder has been enhanced to offer all additional functionality aside from split lot serial items, the detail userdefined, create top level work order, non consolidated details, and smart finder. |
| | | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| | | I1809059 | Enhanced to include Items Transfer menu functionality. Additionally, issues with the SalesOrder combo not allowing reselection, Potential compatibility issues, filtering issues have been resolved. Rows will now expand vertically to fit their data in some cases. Item transfers can be opened by clicking anywhere in the row, not just the content. |
| | | I1801011 | Initial release of .NET WorkOrder. |

| 6.4.11 | 11/30/2018 | I1811072 | Corrected issue when completing a work order then immediately uncompleting when using scheduling and scheduling has not been run between the two actions |
| | | I1810074 | Altered rework so on an uncomplete material is sent back to the original location if the work order line itself is what allocated it. |
| | | I1811273 | Resolved an issue where .NET WorkOrder launched from Job Costing would not open Config before saving. |

**Seradex.Purchasing.dll**

| 6.4.7 | 11/20/2018 | I1809230 | Added logic to support the new .net PO. |
| | | I1801004 | Added functionality for the PO .Net form. |
| 6.4.8 | 11/29/2018 | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |

**Seradex.Purchasing.ReceivingSystem.dll**

| 6.4.10 | 11/20/2018 | I1801013 | .NET Receiving & Vendor Returns fully implemented. |
| | | I1801007 | ReceivingSystem has been enhanced to contain the back end of the .Net Receiving / Vendor returns functionality. |
| | | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| 6.4.11 | 11/29/2018 | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |

**Seradex.SalesOrderSystem.dll**

| 6.4.0 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| | | I1808033 | Enhanced for better handling for non nullable values. |
| | | I1801003 | Developed to function as a backend data model for Sales Order .NET |
| | | I1806028 | Sales order is now compatible with job costing. |
| | | I1806252 | Built the Import From Giza and Microvellum logic into this version of SalesOrder. |
| | | I1806286 | Resolved a potential issue where invoice generation would not complete correctly. |

**Seradex.Shipping.dll**

| 6.4.0 | 11/20/2018 | I1801012 | Initial release of .NET Shipping. |

| 6.4.0 | 11/20/2018 | I1809231 | .NET Shipping has been enhanced and reviewed for preparation of release, and should be feature complete on par with VB6 Shipping. |
| | | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| 6.4.1 | 11/29/2018 | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |

**Seradex.SpecBuilder.dll**

| 6.4.0 | 11/30/2018 | I1709024 | Removed support for data in the ItemOpDetails table (Item mode labour schedule). |

**Seradex.Utilities.NonConformanceManagerSystem.d**

| 6.4.19 | 11/30/2018 | I1810074 | Altered rework so on an uncomplete material is sent back to the original location if the work order line itself is what allocated it. |

**Seradex.Win.Controls.dll**

| 6.4.4 | 11/20/2018 | I1809230 | Added logic to support the new .net PO. |
| | | I1801004 | Added Vendor address control. Added Vendor and Internal Notes tabs, and added ability to hide Freight and Handling currency controls in the Totals control. Added Contact and Website controls. |
| | | I1808033 | Address grid combo boxes have been enhanced for robustness. Resolved an issue where the addressID of cleared addresses was not reset. |
| | | I1801014 | Minor UI adjustments to form controls. |

**Seradex.Win.Estimate.dll**

| 6.4.0 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| | | I1808033 | Robustness of combo box error handling on the form has improved. |
| | | I1808182 | Enhanced VB6 Estimate to pass the excel bom import object the .NET Estimate for Solidworks compatibility. |
| | | I1808238 | .Net forms updated to correctly assign the itemSpecID to the imported row from Microvellum. |
| | | I1807261 | Enhanced the Costing form for .NET compatibility. |
| | | I1806252 | Built the Import From Giza and Microvellum logic into this version of Estimate. |
| | | I1705293 | Created the Estimate .Net form. |
| | | I1806028 | Estimate is now compatible with job costing. |

| 6.4.0 | 11/20/2018 | I1810204 | Validation has been added to prevent deletion of Estimate Details with an associated Sales Order detail. |
|---|---|---|---|
| 6.4.1 | 11/29/2018 | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |
| | | I1811273 | Resolved an issue where .NET Estimate launched from Job Costing would cause an error when opening Config. |
| | | I1811247 | Resolved an issue where copying a blank line could cause an error. |
| | | I1811319 | Initialization of the connection has been modified to ensure that any shared connection information is updated when the form reloads. |

**Seradex.Win.Financials.dll**

| 6.4.96 | 11/30/2018 | I1809147 | For EFT exports for RBC and TD, if one sets up multiple payment types to the same format the client number against the payment type will be read using the first one that exists as opposed to the one for the specific payment type |
|---|---|---|---|

**Seradex.Win.InventoryTransfer.dll**

| 6.4.13 | 11/30/2018 | I1806133 | Added functionality to build new containers and alter existing ones as well as a means to generate a transfer to move all materials from one location to another per container |
|---|---|---|---|

**Seradex.Win.Invoice.dll**

| 6.4.11 | 11/20/2018 | I1801014 | Added an Invoice form to replicate the VB6 Invoice form. |
|---|---|---|---|
| 6.4.12 | 11/22/2018 | I1811255 | Seradex.Win.Invoice enhanced to load credit notes and invoices in .Net from search. |
| | | I1811254 | Seradex.Win.Invoice enhanced to load credit notes and invoices in .Net from search. |
| 6.4.13 | 11/29/2018 | I1811246 | Custom Reports have been added. |
| | | I1811232 | Credit Note in .NET will now smart launch on top of Appbox. |
| | | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |
| | | I1811254 | Modified to allow .NET Invoice access to Search |

**Seradex.Win.Purchasing.dll**

| 6.4.18 | 11/20/2018 | I1801004 | Create .Net version of the VB6 PO form. |
|---|---|---|---|
| | | I1809230 | Added logic to support the new .net PO. |
| 6.4.19 | 11/29/2018 | I1809235 | Added support for a PO detail reason code for vendor revisions, will read Reason Codes assigned to the Purchasing Module. |
| | | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |

| 6.4.19 | 11/29/2018 | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |

**Seradex.Win.Receiving.dll**

| 6.4.17 | 11/20/2018 | I1801007 | Seradex.Win.Receiving has been enhanced to contain the front end of the .Net Receiving / Vendor Returns functionality. |
| | | I1801013 | .NET Receiving & Vendor Returns fully implemented. |
| | | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| 6.4.18 | 11/29/2018 | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |
| | | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |
| | | I1811319 | Initialization of the connection has been modified to ensure that any shared connection information is updated when the form reloads. |

**Seradex.Win.SalesOrder.dll**

| 6.4.0 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
| | | I1808238 | .Net forms updated to correctly assign the itemSpecID to the imported row from Microvellum. |
| | | I1808033 | Robustness of combo box error handling on the form has improved. |
| | | I1801003 | Developed to function as a frontend form for Sales Order .NET |
| | | I1806028 | Sales order is now compatible with job costing. |
| | | I1806286 | Resolved a potential issue where invoice generation would not complete correctly. |
| | | I1806252 | Built the Import From Giza and Microvellum logic into this version of Estimate. |
| 6.4.1 | 11/29/2018 | I1811319 | Initialization of the connection has been modified to ensure that any shared connection information is updated when the form reloads. |
| | | I1811248 | An issue where copying a blank line could result in an error has been resolved. |
| | | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |
| | | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |

**Seradex.Win.Search.dll**

| 6.4.71 | 11/30/2018 | I1811114 | Improved search window tracking to prevent any issue closing search links. |
|---|---|---|---|

**Seradex.Win.Shipping.dll**

| 6.4.1 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
|---|---|---|---|
| | | I1801012 | Initial release of .NET Shipping. |
| | | I1810206 | Corrected issue where two message boxes appear instead of one when selecting a Sales Order on hold. |
| | | I1809231 | .NET Shipping has been enhanced and reviewed for preparation of release, and should be feature complete on par with VB6 Shipping. |
| 6.4.2 | 11/29/2018 | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |
| | | I1811273 | Enhanced .NET forms to ensure consistency of the selected row when documents reload, to prevent modification of incorrect rows when performing operations such as Config. |
| | | I1811319 | Initialization of the connection has been modified to ensure that any shared connection information is updated when the form reloads. |

**Seradex.Win.ShopFloorExecution.dll**

| 6.4.42 | 11/30/2018 | I1806133 | Added ability for work order completion to dictate to produce to a new container or an existing container for clients using the new container tracking module. |
|---|---|---|---|

| 6.4.0 | 11/20/2018 | I1810269 | Improved formatting for shortcut keys. Added shortcut keys that were missing. Added closing checks. Added missing hidden columns. Added missing formatting. Improved Receiving to populate UOM on PO load. Fixed an issue that could cause shipping to throw a foreign key issue. Improved SalesOrder shortcuts to be more robust. Added missing functionality to WO. |
|---|---|---|---|
| | | I1809105 | .NET WorkOrder has been enhanced to offer all additional functionality aside from split lot serial items, the detail userdefined, create top level work order, non consolidated details, and smart finder. |
| | | I1801011 | Initial release of .NET WorkOrder. |
| | | I1809059 | Enhanced to include Items Transfer menu functionality. Additionally, issues with the SalesOrder combo not allowing reselection, Potential compatibility issues, filtering issues have been resolved. Rows will now expand vertically to fit their data in some cases. Item transfers can be opened by clicking anywhere in the row, not just the content. |

| 6.4.0 | 11/20/2018 | I1806028 | Work order is now compatible with job costing. |
| 6.4.1 | 11/29/2018 | I1811319 | Initialization of the connection has been modified to ensure that any shared connection information is updated when the form reloads. |
| | | I1811273 | Resolved an issue where .NET WorkOrder launched from Job Costing would not open Config before saving. |
| | | I1811246 | The custom report menu has been updated - it no longer requires the Custom Reports submenu. Instead it lists the custom reports after a separator bar in the main dropdown, similarly to VB6. |

**Shipping.dll**

| 6.4.138 | 11/20/2018 | I1809231 | VB6 Shipping has been enhanced to expose all necessary functionality for .NET Shipping to be fully functional. An issue has been resolved where the recalculation of the sum of Weight in the header would treat the header weight UOM as the UOM of all details. |
| | | I1810269 | Updated to check necessary module activations when launching from .NET. Fixed issue where it would throw a strange error when trying to launch packing slip with no shipment selected. |
| 6.4.139 | 11/30/2018 | I1806133 | Added ability to ship containers and create new containers and alter existing ones. |

**sxMail.dll**

| 6.4.13 | 11/30/2018 | I1807236 | When a one click email is generated, it will now be recorded against the calling document's header. |

**sxMaintenanceControls.ocx**

| 6.4.18 | 11/30/2018 | I1806133 | Renamed "Work Order Completion - Allocate non stock Lot/Serial to Order" to "Work Order Completion - Allocate non stock inventory to Order" |

**sxTaxes.dll**

| 6.4.33 | 11/20/2018 | I1811211 | Tax form is now calculating manually assigned tax details. |
| 6.4.34 | 11/30/2018 | I1811180 | Expanded support for system's currency symbol. |

**sxWorkFlow.ocx**

| 6.4.21 | 11/21/2018 | I1809192 | Workflow's Task Description column width has been increased and the text will wrap if the text length is greater than the column width. |
| | | I1808129 | The default selection of the current employee for new workflow instances has been restored; inactive employees will no longer be shown in the Assigned To and Assigned By combos. |
| | | I1811244 | Recreating to force version update |

**UWP Inventory Transfer_Adjustment ARM.zip**

| 6.4.3 | 11/30/2018 | I1810177 | Adjusted the duplication items to be posted validation to look at the right field. |
|---|---|---|---|

**UWP Inventory Transfer_Adjustment Window.zip**

| 6.4.2 | 11/30/2018 | I1810177 | Adjusted the duplication items to be posted validation to look at the right field. |
|---|---|---|---|

**WorkOrder.dll**

| 6.4.174 | 11/20/2018 | I1809105 | Enhanced .NET WorkOrder to a state of release ready functionality. |
|---|---|---|---|
| | | I1810269 | Enhanced to allow .NET workorder access to the WOCompletionAuditTrail form. |
| 6.4.175 | 11/30/2018 | I1806133 | Added ability for work order completion to dictate to produce to a new container or an existing container for clients using the new container tracking module. |
| | | I1803188 | Modified to improve the work order completion process by making it more resilient when failures occur. |
| | | I1809145 | Modified to ensure that when processing alternative non-stock items that they are verified first not to be part of the original BOM. |
| | | I1808306 | Modified to ensure that when completing orders created by the Inventory Convertor module, the process of merging the finished good cost does not interfere with the main SQL connection transaction in which the completion process runs. |
| | | I1810074 | Altered rework so on an uncomplete material is sent back to the original location if the work order line itself is what allocated it. |
| | | I1808130 | Improved the work order completion when using alternative items by adding the ability to evaporate miscellaneous items and making sure that the stock items that are part of the BOM are never evaporated twice. |
