

Seradex OrderStream

Technical Release Notes

November 2021

AcctMaintenance.dll

6.4.116 12/10/2021 I2107065 Customer Ship-To contact changes will now be marked as critical change instead of non-critical change.

ActiveM20.dll

6.4.142 12/10/2021 I2105014 Added a option for work order to remove completion lock.
I2103225 When running the item running balance report, if multiple reported items appear as demand for the same work order, the demand will now be correctly distributed between the reported items.
I2108033 Improve the performance of the Receipt gathering query in the Transaction Override form in Admin Tools.
I2106318 Approved shipments generated from a sales order with an existing unapproved shipment will no longer be eligible for unapproval.

ActivityLog.ocx

6.4.31 12/10/2021 I2101022 The activity log form will no longer display a user controls message when the user closes the form, and chooses to save their changes.

AutomatedReports.exe.config

6.4.0 12/10/2021 I2005161 Support has been added for Telerik extensions.

AutoUpdater.exe

6.4.44 12/10/2021 I2101213 Modified to address minor issues with manually set command line arguments and to allow scripting to prevent launching OrderStream or AppBox.

BatchProcessing.dll

6.4.45 12/10/2021 I2109281 Excluded Invoiced and Cancelled Sales Order shipments from the list of shipments in the VB6 Batch Invoice Processor

Config.dll

6.4.193 12/10/2021 I2110289 Implemented support for single excel filtered property value defaults for check box triggering properties
I2110030
1. Corrected an issue that loaded the static data for the SETUP query, instead of the actual data for the query controlled property query
2. Implement support for dynamic sql scripting where there are no 'SELECT' statement at the beginning of the script,
3. Added support to queries with no ID columns for the dynamic sql scripting.

Seradex OrderStream

Technical Release Notes

November 2021

6.4.193	12/10/2021	I2108260	Modified because the SQL stored procedure that was been previously generated to create the pre-operation chain during the spec creation was converted to a regular SQL query.
		I2107284	Added support for launching Configure in .NET Service Order.
		I2108112	When setting up excel filters, triggerring properties for an excel filtered property disappear from the list of available properties even when another filtered property is selected.
CreateAccountingLink.exe			
6.4.0	12/10/2021	I2002120	Modified to support setting up the accounting link via a SQL Linked Server
DataTransfer.mdb			
6.4.285	11/30/2021	I2103173	Implemented a new field in companysetup to hold a json string for custom additional charges on transactions
		I2107027	Two new integrity checks, for AP and AR GL accounts not matching the related sub ledgers
		I2106404	Created new integrity checks, Duplicate unapproved vendor invoice for the same receipt detail and Duplicate unapproved AR Invoice for the same document detail
		I2107284	Added the column "ConfigDescription" to the ServiceOrderMaterials table.
		I2106318	Secured controls can now allow updating file attachments on approved documents.
		I2108001	Split the Approved Vendor Returns without Inventory Updated integrity check to its own check, for clarity.
		I2110031	Added Lookup form for Tax Codes within the Lookup profile bar, used on items for special treatment by the online tax integration.
		I2107156	Increase tax group Name and descripton to 255 characters
		I2110006	Added ConsolidationGroup field to the AppIntegrationLabour table.
		I2110087	Add subreport filtering records for core module Telerik reports to ensure subreports are filtered when the report is launched from a form.
		I2104321	Added the WODueDateOffset field to the CompanyPreferences table.
		I2105014	Added "Processing Transaction" and "Processing Consolidated Transaction" to the TransLogTempAction table.
		I2010182	Added datamodel to support customer payments received yet not deposited.
6.4.286	12/10/2021	I2105014	Add a new index to the TransLogTemp to support the work order multi-user completion.
DayEndProc.dll			
6.4.155	12/10/2021	I2010182	For users with the new interface,process sales order deposits via a new interface
		I2109300	Altered auto posting to work for future dated inventory transactions
		I2110016	Corrected issue where not using acutal cost and also auto posting, if an inventory adjustment is nothing but cost adjustments, it was not closing off from Auto posting.
		I1904218	For accounting systems that produce separate cogs batches, if there are invoice to process yet all GL entries would be zero, do not create the file.

Seradex OrderStream

Technical Release Notes

November 2021

DBox Web Front End Components (WFE)

6.4.31	11/30/2021	I2103190	Added a task to delete the Clients and dist folders before compilation.
		I2107104	Added the ability to select an Employee Group and/or enter a Customer Type into the Display Category setup page. This makes it possible to show certain product lines/sell item groups to only specific groups of Employees or Customers.
			If your login is a Web Admin, you will still see all product lines and sell item categories no matter what.
		I2111074	Fixed an issue where the Item No was not appearing in the header of the item information page, and fixed some alignment/display issues with the List Price, Discount percentage and stock availability on the same screen.

DocumentFormat.OpenXml.dll

6.4.0	12/10/2021	I2106295	Added to support known Office and XPS export formats for Telerik reports.
-------	------------	----------	---

EngineeringChange.dll

6.4.22	12/10/2021	I2101111	The item replacement tab's item number drop down boxes have been restored.
--------	------------	----------	--

Estimating.dll

6.4.188	12/10/2021	I2103397	Changing an estimate's CustomerShipTo for a prospect will now read and display the address information.
		I2102316	When revising or copying an estimate, the Lost To and Loss Reason fields will no longer be copied.
		I2103093	The QtyOrdered will now be taken into account when the Misc Cost is used to determine the total cost of the line in the Costing Info tab.
		I2111025	When using the Add Additional Charges functionality, if the List Price returned by the query is 0, the item's line price after selection will not be overwritten.
		I2110241	Fixed an issue where deleting a VB6 Estimate and Sales Order number in the combo box, making a change and saving the order, creates a new transaction with no line items
		I2109169	Corrected an issue when copying estimate and sales order comments, to use the current date as the entry date instead of the comments entry date on the original document.

ExcelBOMImport.dll

6.4.11	12/10/2021	I2110091	Adjusted the logic ensuring that the Routing Import does the time calculation correct.
--------	------------	----------	--

Seradex OrderStream

Technical Release Notes

November 2021

InventoryAdjustment.dll

6.4.102	12/10/2021	I2109009	Validation has been added to ensure inventory cannot be added to Consignment locations.
		I2110303	When creating the Physical Count Sheet, the system will now handle inventory records with both NULL and blank OwnerNo's.

InventoryTransfer.dll

6.4.107	11/01/2021	I2110304	When transferring inventory to a sales order using the Transfer Generator, the query that gathers the related inventory item records will no longer throw a SQL error.
6.4.108	12/10/2021	I2111013	Selecting the Inventory Transfer header location will no longer clear the transfer header owner information.

Invoice.dll

6.4.179	12/10/2021	I2111009	Now when doing automatic inventory allocation from a sales order while doing partial shipping in invoicing (bypassing a shipment), the inventory will be allocated correctly.
		I2102290	Loading a miscellaneous shipment through the Invoice form will now either load the default Ship To or, the only Ship To for the customer, if no default exists.
		I2010182	For users with the new interface, process sales order deposits via a new interface.

ItemEditor.dll

6.4.153	12/10/2021	I2108260	Modified because the SQL stored procedure that was been previously generated to create the pre-operation chain during the spec creation was converted to a regular SQL query.
---------	------------	----------	---

JobCosting.dll

6.4.98	12/10/2021	I2102020	Clearing document selections from the Contract tab will now be facilitated through the Delete key or through clearing the document number. Any pre-existing rows with all document selections cleared will now be deleted from the JobControlContracts table on save. Corrected work order drop down on Contract Tab.
--------	------------	----------	---

MatReq.dll

6.4.145	12/10/2021	I2102125	When processing from the MRP lookup form in Purchasing MRP, the system will now reload the Purchasing MRP.
		I2108135	Ensured sub contract services use the inventory GL account vs the non inventory GI account.

Seradex OrderStream

Technical Release Notes

November 2021

OwnerTypeFix.exe

6.4.0	12/10/2021	I2002118	Modified the OwnerType Fix tool to address failed previous runs. The Database selection screen no longer scans for connections until the user attempts to open the combo to get a list.
-------	------------	----------	---

POInvoice.dll

6.4.123	10/22/2021	I2110198	Adjusted the multi-users approval validation ensuring that the system is gathering the data correctly.
6.4.124	12/10/2021	I2109238	Prevent issues if a vendor invoice is unapproved and deleted and it was also on the payment hold schedule.

ReleaseManager.exe

6.4.145	11/05/2021	I2109274	Updated to always show all release notes, except those files marked as Beta Release (a rarely used flag). It can only be setup against the object itself, as such the option was moved to the Options menu. Also the "Prior to Release Cycle" check is now based on the "Current Release initial merge Date".
---------	------------	----------	--

RptDataCollection.dll

6.4.78	12/10/2021	I2011291	Modified the WO BOM Status report so that it now uses SQL temp tables instead of permanent tables to ensure they are not left behind.
--------	------------	----------	---

SalesOrder.dll

6.4.230	12/10/2021	I2104265	Added a new menu called "Exclude Job Costing from Copying".
		I2010182	For users with the new interface, process sales order deposits via a new interface with support for tax inclusive Sales Order deposits
		I2104321	Added logic to support the work order offset days calculation logic to work order due date when generating work order.
		I2109169	Corrected an issue when copying estimate and sales order comments, to use the current date as the entry date instead of the comments entry date on the original document.
		I2110241	Fixed an issue where deleting a VB6 Estimate and Sales Order number in the combo box, making a change and saving the order, creates a new transaction with no line items
		I2111025	When using the Add Additional Charges functionality, if the List Price returned by the query is 0, the item's line price after selection will not be overwritten.

Schedule.dll

6.4.24	11/01/2021	I2110269	Modified the work order inventory batch analysis to add an index to the table to improve the performance of sql commands that access it.
--------	------------	----------	--

Seradex OrderStream

Technical Release Notes

November 2021

Seradex.AddressSystem.dll

6.4.7 12/10/2021 I2010218

Enhanced the address validation to include the sublocality_level_1 field from the Google address API if the locality field does not return any value.

Seradex.AutoUpdater.ReleaseFileList.dll

6.4.4 12/10/2021 I2101213

Modified to try to avoid, and, if needed, handle AccessViolationExceptions when reading File information.

I2005161

Modified to be able to deploy the app config files needed for Telerik Reporting extensions.

I2106295

Modified to not attempt to register "DocumentFormat.OpenXml.dll", and "Saraff.Twain.dll" and files that start with "Intuit", and "PdfSharp".

Seradex.AutoUpdater.UpdateClient.dll

6.4.7 12/10/2021 I2005161

Modified to be able to deploy the app config files needed for Telerik Reporting extensions.

I2101213

Updated for compatibility with the changes to Seradex.AutoUpdater.ReleaseFileList.dll.

I2110255

Modified to correct an issue when determining the backup path with sub folders in certain cases.

Seradex.ComComponents.dll

6.4.53 12/10/2021 I2103469

Modified to release com objects more simply and attempt to trap errors when the garbage collection cleanup occurs.

I2109102

Add the ability to suppress message boxes for Web or non-interactive processes.

Seradex.Common.EDISystem.dll

6.4.19 10/21/2021 I2012166

Add error handling to the EDI 850 PO Import to ensure order errors found in the translator are logged in the ImportOrder tables.

Seradex.CommonServices.dll

6.4.69 12/10/2021 I2108088

Modified internal method for retrieving Full Struc data to allow optionally gathering the BOM description.

Seradex.Connection.dll

6.4.48 11/01/2021 I2111003

Addressed a recent issue that caused some connection attempts to report a failure on subsequent attempts when the connection was already open.

Seradex.Dbox.dll

Seradex OrderStream

Technical Release Notes

November 2021

6.4.32	11/30/2021	I2107104	Added the ability to select an Employee Group and/or enter a Customer Type into the Display Category setup page. This makes it possible to show certain product lines/sell item groups to only specific groups of Employees or Customers.
			If your login is a Web Admin, you will still see all product lines and sell item categories no matter what.
		I2110220	Enhanced the Dbox pricing routines to be more efficient and for better performance.
		I2111074	Fixed issues Dbox Api where prices for regular stock Items always come up as \$0 in the Items page.
		I2108268	Corrected an issue where modifying config parent property value does not always trickle down to the children in Dbox. Also, implemented customer config defaults on the parent's children's new configuration, which was missing previously.
Seradex.EstimateSystem.dll			
6.4.22	12/10/2021	I2111025	When using the Add Additional Charges functionality, if the List Price returned by the query is 0, the item's line price after selection will not be overwritten.
Seradex.Excel.dll			
6.4.24	12/10/2021	I2109102	Add the ability to suppress message boxes for Web or non-interactive processes.
		I2105060	Modified the DynamicExcel class to provide functionality required to access PriceList in .NET
Seradex.Financials.FinancialsSystem.dll			
6.4.122	12/10/2021	I2110197	When loading invoices to pay via a deposit, if there is an unapproved payment pending for that invoice with a write off stated, the system was not deducting that write off amount from the available balance.
		I2110031	Ensure description is sent to the invoice/credit note for avalara as well as sending the original invoice date when crediting an invoice. Also ensured the logic to handle differences in tax calculated amounts is handled.
		I2010182	For users with the new interface, process sales order deposits via a new interface
Seradex.Infragistics.dll			
6.4.54	12/10/2021	I2110168	Adjusted the function Restore Grid Setting for search to only reload the size and position of the columns instead of everything.
		I2101147	Added functionality to hide PODetails.UDFs when the app preference is disabled. Note that existing saved grid settings can still cause otherwise hidden columns to be shown.

Seradex OrderStream

Technical Release Notes

November 2021

Seradex.Inventory.Adjustment.dll

6.4.2 12/10/2021 I2109185

Added the ability to auto-post the generated consignment adjustment based on the Application Preference.

Seradex.Inventory.dll

6.4.35 12/10/2021 I2109185
I2108088
I2109249

Added inventory adjustment posting/auto-posting functionality.
Transfer on Demand has been modified to allow viewing and filtering on the work order bom description.
Altered logic to determine item transfer to ensure the comparison is done with Decimal Data types to eliminate any rounding anomalies.

Seradex.InvoiceSystem.dll

6.4.24 12/10/2021 I2010182

When the preference for tax inclusive AR is enabled, ensure invoices for shipping reduce the grand total to zero the same way as sales order invoices do.

Seradex.OrderEntryLibrary.dll

6.4.24 12/10/2021 I2105060

Modified to use the DynamicExcel class which better handles using Excel from .NET

Seradex.Production.DataCollection.dll

6.4.59 12/10/2021 I2110094

Adjusted the logic, ensuring that when scheduling is enabled and the data collection is using work order lot serial logic; the quantity will be looking at the work order lot serial quantity to the stock field.

Seradex.Production.PunchClock.dll

6.4.16 12/10/2021 I2109028

Added JobName to the Job combo in the Punch Clock login form.

Seradex.Production.Rework.dll

6.4.18 10/21/2021 I2110202

Rework/Remake module will now open from the profile bar.

Seradex.Production.Scheduling.dll

6.4.84 12/10/2021 I2109003

DBR and Finite/Hybrid Scheduling now pay attention to the "non-tracked" Cell flag. When the next operation is started, any previous operation for non-tracked cells is treated as completed, assuming no actual data collection exists for them. Note that this works with multiple non-tracked operations in a row as well. Non-tracked operations at the end of the labour schedule are unaffected.

Seradex OrderStream

Technical Release Notes

November 2021

Seradex.Production.WorkOrder.dll

6.4.34	12/10/2021	I2110192	Corrected the issue where the generated work order due date is not calculating correctly.
		I2108088	Modified internal method for retrieving Full Struc data to allow optionally gathering the BOM description.
		I2110278	Adjusted the Work Order MRP .Net form to speed up the generation when attempting to create over 2k work orders.
		I2110168	Corrected the issue where increasing the size of the make quantity field disabled the field to be editable. The grid setting can now be saved when the form is launched using a valid employee record.

Seradex.Purchasing.dll

6.4.32	12/10/2021	I2111260	Added safety logic to retry creation of the temp table "#Temp_" if it already exists.
--------	------------	----------	---

Seradex.Purchasing.ReceivingSystem.dll

6.4.30	12/10/2021	I2109185	Added inventory adjustment auto-posting error handling to ensure the receipt approval is not incorrectly aborted.
		I2108001	Inventory is now required to be updated when approving vendor returns.

Seradex.ReportSystem.TelerikExtension.dll

6.4.0	12/10/2021	I2005161	A FileExists telerik extension has been added which will return true if the provided file path and name is accessible.
		I2108078	Nov 2021 release of Telerik.Reporting components - R3 2021 SP1.

Seradex.RestApi.dll

6.4.27	11/30/2021	I2107104	Added the ability to select an Employee Group and/or enter a Customer Type into the Display Category setup page. This makes it possible to show certain product lines/sell item groups to only specific groups of Employees or Customers.
--------	------------	----------	---

If your login is a Web Admin, you will still see all product lines and sell item categories no matter what.

Seradex.SalesOrderSystem.dll

6.4.30	12/10/2021	I2111025	When using the Add Additional Charges functionality, if the List Price returned by the query is 0, the item's line price after selection will not be overwritten.
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

November 2021

Seradex.ServiceOrderSystem.dll

6.4.5	12/10/2021	I2107284	Added support for launching Configure in .NET Service Order.
		I2108179	The Service Order No can now be used as a flow key for the RMA No.

Seradex.SpecBuilder.dll

6.4.4	10/27/2021	I2110267	Corrected an issue with the new SpecBuilder.Net where it could not correctly determine in all cases when an item had components.
-------	------------	----------	--

Seradex.Strings.dll

6.4.45	12/10/2021	I2109252	Shop Floor Execution reason codes combo will now be filtered by the "DataCollection" and "Shop Floor Execution" module ID.
		I2109185	Added AccountingPreferences enum.

Seradex.UserDefined.dll

6.4.11	12/10/2021	I2110232	Adjusted the user-defined combo values ensuring the system is gathering the value list correctly.
--------	------------	----------	---

Seradex.Utilities.ImportAdapterInterface.dll

6.4.24	12/10/2021	I2002113	Modified to improve the error messages displayed.
--------	------------	----------	---

Seradex.Utilities.IntegrationMgrSystem.dll

6.4.22	12/10/2021	I2110006	Added functionality to import the labour ConsolidationGroup field.
--------	------------	----------	--

Seradex.Win.Controls.dll

6.4.30	12/10/2021	I2101147	Added functionality to hide PODetails.UDFs when the app preference is disabled. Note that existing saved grid settings can still cause otherwise hidden columns to be shown.
		I2104005	The Notes and Internal Notes fields in the Totaller control will now be enabled even if the parent module is locked.

Seradex.Win.Estimate.dll

6.4.38	12/10/2021	I2108009	Modified various text boxes' behaviours with respect to scrollbars and editability.
		I2109163	Two interventions: prevent ShipTo contacts that are not valid customer/prospect contacts from being defaulted as ContactID; and clear out any existing invalid ContactID before it can be displayed in the Contact combo.
		I2106318	Secured controls can now allow updating file attachments on approved documents.

Seradex OrderStream

Technical Release Notes

November 2021

6.4.38	12/10/2021	I2109168	Modifying the header comments in the .NET estimate module, and generating a sales order without clicking away from the edited row, do not save the comment changes like it does when you click the SAVE button.
		I2105165	Fixed an issue, where changing the ship to on .NET estimate overrides the selected CSR on the estimate with the customer's CSR. The contact is no longer overridden.
		I2108233	Corrected an issue that throws a recursive error when adding a line item in Concurrent Item Lookup module from a transaction with no line detail on the grid .

Seradex.Win.Financials.dll

6.4.120	12/10/2021	I2110031	Revised labels for the setup credentials and online tax provider screens.
		I2010182	For users with the new interface,process sales order deposits via a new interface
		I2109206	Prevented users from typing in to the discount field and committing discount amounts greater than 2 decimals.
		I2110080	Voiding of refunds of credits done via cheque will mark void regardless of being printed or not

Seradex.Win.IntegrationManager.dll

6.4.13	12/10/2021	I2110006	Modified to add a validation to ensure that when the order line destination combo is empty an error does not happen.
--------	------------	----------	--

Seradex.Win.InventoryAdditionalInfo.dll

6.4.6	12/07/2021	I2112048	Updated for compatibility with the latest release.
-------	------------	----------	--

Seradex.Win.InventoryTransfer.dll

6.4.26	12/10/2021	I2111012	Adjusted the Container Transfer logic ensuring that the system will default the destination container to the source container if the destination container is not selected.
		I2108088	Transfer on Demand has been modified to allow viewing and filtering on the work order bom description.

Seradex.Win.Invoice.dll

6.4.47	12/10/2021	I2109195	The Search Message Centre will now be filtered and loaded as expected when launching the Invoice module with a pre-selected invoice.
		I2106318	Secured controls can now allow updating file attachments on approved documents.
		I2108009	Modified various text boxes' behaviours with respect to scrollbars and editability.
		I2010182	For users with the new interface,process sales order deposits via a new interface

Seradex OrderStream

Technical Release Notes

November 2021

Seradex.Win.MaintenanceTools.dll

6.4.11 12/10/2021 I2103173

Implemented a new user interface to create or modify custom additional charges in the form of a json string in the CompanySetup table.

Seradex.Win.OrderEntryFormLibrary.dll

6.4.3 12/10/2021 I2105060

Modified to use the DynamicExcel class which better handles using Excel from .NET

Seradex.Win.Purchasing.dll

6.4.57 12/10/2021 I2108009

Modified various text boxes' behaviours with respect to scrollbars and editability.

I2106274

Adjusted the logic ensuring that the system is updating the workflow due date correctly.

I2102125

When processing from the MRP lookup form in Purchasing MRP, the system will now reload the Purchasing MRP.

I2101147

Added functionality to hide PODetails.UDFs when the app preference is disabled. Note that existing saved grid settings can still cause otherwise hidden columns to be shown.

Seradex.Win.Receiving.dll

6.4.50 12/10/2021 I2108009

Modified various text boxes' behaviours with respect to scrollbars and editability.

I2106318

Secured controls can now allow updating file attachments on approved documents.

Seradex.Win.RecurringTransaction.dll

6.4.25 12/10/2021 I2105236

Corrected an issue where the generate button is not showing when launching progress payment setup in the purchase order module.

Seradex.Win.Reports.dll

6.4.21 12/10/2021 I2108078

Updated for compatibility with the latest Seradex.Win.Telerik.dll

Seradex.Win.SalesOrder.dll

6.4.43 12/10/2021 I2105165

Fixed an issue, where changing the ship to on .NET estimate overrides the selected CSR on the estimate with the customer's CSR. The contact is no longer overridden.

I2108233

Corrected an issue that throws a recursive error when adding a line item in Concurrent Item Lookup module from a transaction with no line detail on the grid .

Seradex OrderStream

Technical Release Notes

November 2021

6.4.43	12/10/2021	I2104005	The Lot/Serial Inventory form can now be used when the sales order is approved, if the line status is not fully shipped, and ReadOnly mode has not been activated through Secured Controls.
		I2110032	Adjusted the logic ensuring that the system will clear out the detail customer ship to if the header customer ship to is nothing when the application preference "Force User to select Ship To when there is no default setup" is enabled.
		I2010182	For users with the new interface, process sales order deposits via a new interface.
		I2106318	Secured controls can now allow updating file attachments on approved documents.
		I2109163	Two interventions: prevent ShipTo contacts that are not valid customer contacts from being defaulted as ContactID; and clear out any existing invalid ContactID before it can be displayed in the Contact combo.
		I2108009	Modified various text boxes' behaviours with respect to scrollbars and editability.
		I2104265	Added a new menu called "Exclude Job Costing from Copying".

Seradex.Win.Scheduling.Finite.dll

6.4.29	12/10/2021	I2108078	Updated for compatibility with the latest Seradex.Win.Telerik.dll
--------	------------	----------	---

Seradex.Win.Search.dll

6.4.95	12/10/2021	I2106157	Modified to enable using parameters in Telerik searches.
		I2108078	Modified to remove the 3rd-party Telerik dependency from Search to simplify future upgrades for Telerik.Reporting.

Seradex.Win.ServiceOrder.dll

6.4.10	12/10/2021	I2108179	The Service Order No can now be used as a flow key for the RMA No.
		I2102301	A multi-line edit window can now be displayed for the Service Issue field in the Details grid by double-clicking the Service Issue field.
		I2102339	Add Show Inactive Items menus to the Details and Parts grids in the Service Order form.
		I2101139	Adjusted the detail user -defined to load the .Net version instead of the vb6 version.
		I2107284	Added support for launching Configure in .NET Service Order.

Seradex.Win.Shipping.dll

6.4.37	12/10/2021	I2106318	Secured controls can now allow updating file attachments and the shipped date on approved documents.
		I2108009	Modified various text boxes' behaviours with respect to scrollbars and editability.
		I2102290	The Customer can now be selected when creating a miscellaneous shipment.

6.4.37	12/10/2021	I2109187	Corrected an issue where the shipping module crashed when exiting from the "ShipTo" form that was launched when clicking on the "Edit Ship To" detail line button.
Seradex.Win.ShopFloorExecution.dll			
6.4.56	12/10/2021	I2109252	Shop Floor Execution reason codes combo will now be filtered by the "DataCollection" and "Shop Floor Execution" module ID.
		I2111036	Modified to ensure the application preferences are always loaded on startup.
Seradex.Win.Telerik.dll			
6.4.25	12/10/2021	I2106295	Modified to support known Office and XPS export formats.
		I2106157	Modified to enable using parameters in Telerik searches.
		I2108078	Upgraded to the Nov 2021 release of the Telerik.Reporting components (R3 2021 SP1). Modified to remove the 3rd-party Telerik dependency from Search to simplify future upgrades for Telerik.Reporting.
Seradex.Win.WorkOrder.dll			
6.4.33	12/10/2021	I2108009	Modified various text boxes' behaviours with respect to scrollbars and editability.
		I2110192	Added the "Multiple Work Order Generation" row colour and legend caption.
		I2106318	Secured controls can now allow updating file attachments on approved documents.
		I2110168	Corrected the issue where increasing the size of the make quantity field disabled the field to be editable. The grid setting can now be saved when the form is launched using a valid employee record.
		I2102185	Work order lines that are complete on work orders that are not approve can no longer be modified.
		I2110278	Adjusted the Work Order MRP .Net form to speed up the generation when attempting to create over 2k work orders.
ServiceOrder.dll			
6.4.76	12/10/2021	I2101139	Adjusted the detail user -defined to load the .Net version instead of the vb6 version.
		I2108179	The Service Order No can now be used as a flow key for the RMA No.
Shipping.dll			
6.4.168	11/04/2021	I2111009	Now when doing automatic inventory allocation from a sales order while doing partial shipping, the inventory will be allocated correctly.
6.4.169	12/10/2021	I1903027	Custom enhancements can now determine which sales order lines are present on a shipment.
		I2109166	Correct invoice line extended price calculations for non shippable items where there was already a partial invoice.
