

# Seradex OrderStream

## Technical Release Notes

October 2023

### AcctMaintenance.dll

6.4.130 10/23/2023 I2308258 The copy of a default ShipTo will not become another default ShipTo.

### ActiveM20.dll

6.4.153 10/23/2023 I2308034 Corrected issue whereby unapproval of a credit note would not perform all required actions to unapprove properly.

I2310113 Adjusted the code trimming leading and trailing spaces from the Transaction Override > Change Number routine to use a method friendly to the earliest supported database version.

I2306026 Adjusted sort order for the unallocated inventory in the inventory allocation screen to show inventory for the detail line first and show data closer to FIFO order than before. Also corrected issue with the Sort by Rack option where it would potentially not show allocated inventory at the top.

I2301036 Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.

I2209048 Added safety logic in case the available credit logic is called without the license to ensure the advanced credit logic will not occur.

I2206205 Ensure sales order lines that are set to cancelled that are also related to Jobs when using Job billing are handled.

I2301007 Modified to ensure that no duplicate lines with zero quantity value will be displayed to the user on the Item Running Balance screen.

### ActivityLog.ocx

6.4.38 10/23/2023 I2212174 The number of lines displayed per page has been increased from 10 to 20.

### AdminTools.dll

6.4.73 10/23/2023 I2301082 The system can now check for a profile activation without first checking module activation.

### ClientReports.dll

6.4.101 10/23/2023 I2308337 Report On Event now resets internal arrays every time an event is initialized.

### ClientReports.mdb

6.4.3 10/23/2023 I2310034 Corrected the Modules record for the CreditNote module to be "CreditNote" instead of "CreditNotes".

### Config.dll

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.207	10/23/2023	I2309150	Included check boxes in the list of controls that triggers query control filtered controls to be filtered when a check box value changes.
		I2309001	Fixed an issue that clears an excel filtered property value when an existing configuration is copied via the configurator Copy button.
		I2308199	Modified to use the configurator setting to force new spec when auto processing with excel application
		I2308227	Implemented a 0 or 1 value in cell J52 of the configurator Input worksheet, where 0 means the configuration is being processed with the configurator interface, and 1 means its being processed by the auto processor.
		I2305179	Implemented support to clear dbox cache for dbox clients only after modifying and saving a web productline setup

### CreditNote.dll

6.4.139	10/23/2023	I2308034	Ensure if online tax fails for a Credit note posting or auto posting itself cannot generate GL entries, roll back the approval.
		I2308028	Ensure if online tax fails for a Credit note posting or Auto posting itself cannot generate GL entries, roll back the approval.

### Database Setup Wave 0.xls

6.4.5	10/23/2023	I2302084	Corrected the Vendor Account Set validation in the Wave 0 workbook so it matched the updated layout of the Account Set worksheet.
-------	------------	----------	---

### Database Setup Wave 0.xlsm

6.4.5	10/23/2023	I2302084	Corrected the Vendor Account Set validation in the Wave 0 workbook so it matched the updated layout of the Account Set worksheet.
-------	------------	----------	---

### DataTransfer.exe

6.4.40	10/23/2023	I2209314	Modified DataTransfer to transfer many non-table objects in the same manner as views.
6.4.41	10/25/2023	I2310220	Modified to remove a user in the master database for the SeradexCertificateLogin, when updating the SeradexCertificate, if it exists.

### DataTransfer.mdb

6.4.308	09/05/2023	I2308234	Allowed existing custom ReportOnEvent records to remain.
6.4.309	10/24/2023	I2306176	Added an Internal flag to the WebReports table.
		I2309112	Adjusted DivisionalSellItems view to run quicker and ensure if there is a setup in the divisional sell items table that only those divisions are used.
		I2308309	Added Support for custom Version dll list entries
		I2106040	Added Moneris as an OnlinePaymentProvider.
		I2211287	Added Estimate Document Approval roles to some DBOX Customer Login types that were missing it.
		I2310011	Corrected the base query for Web Service Order List search.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.309	10/24/2023	I2206205	Updated the Job billing Synchronization stored procedure handles inactive Sales order lines.
		I2210040	Added the RegistrationPageDisclaimer field to AxisPreferences.
		I2305083	The ItemsTransfer search has been updated to show transfers regardless of item tracking type.
		I2301086	Created an integrity check to verify that Seradex SQL components (certificate, assemblies, functions, etc.) are installed and up to date.
		I2307290	Added a SecuredControls record to make the Notes field visible in the Estimating form's Comments control's grid.
		I2305109	Modified the solution for the Integrity Check: "System - Check System Paths for Windows Compatibility" to make it clearer for the user.
		I2104031	Exclude nonshippable items and filter/order 'order backlog by due date' by detail status/due date rather than just header
		I2305217	Removed unneeded foreign key constraints which was causing for certain clients performance issues deleting receipts and/or receipt lines. Also added index to improve reading ReceivingLotSerial Data
		I2304182	The Show and ShowRange settings of reports have been updated to reflect what appears on the system forms.
		I2306120	Added a new table to archive the BatchTransactions already processed records before they are deleted after 7 days.
		I2305240	New temporary transaction log actions have been added for generating shipments and invoices.
		I2303133	A secured control entry has been added to enable document storage on approved shipments.
		I2306167	Added two integrity checks that will find a pair of specific malformations in Event Alert recipient and CC recipient email addresses: not being separated by the ; character.
		I2302141	New advanced security to hide banking balances from the Financials Deposit form used to receive payments from customers.

### DataTransferBuilder.exe

6.4.29	10/23/2023	I2209314	Modified DataTransferBuilder to transfer many non-table objects in the same manner as views.
--------	------------	----------	--

### DayEndProc.dll

6.4.164	10/23/2023	I2304234	Adjusted Sage 50 UK AR posting to write one line per Sales GL/Tax Code group with qty assumed as a single unit.
---------	------------	----------	---

### DBox Web Front End Components (WFE)

6.4.40	10/24/2023	I2301213	Added pre-emptive caching for product line information in DBOX to prevent any users from experiencing a slow to open configurator for massive product lines.
		I2106040	Added support to accept payments via a credit card using Moneris as a provider. Removed the Bank Account payment option if Moneris is your selected payment provider.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.40	10/24/2023	I2306308	Fixed an issue causing the collapse arrow on a parent configuration in the estimate/sales order details to not collapse the line/group.
		I2306176	Added support to set Custom Reports in DBOX as internal only.
		I2308279	Removed a duplicate main comment/description field from the Activity form and ensured the Main Comment was able to accept text of the correct length.
		I2301179	Modified the Activity Form to enable the save button as soon as a customer is selected. If you click save without adding a Client Comment the Client Comment field will get highlighted and inform the user that it is a required field.
		I2308005	Fixed some issues with the dialog that tries to warn the user before they leave an unsaved estimate/sales order in DBOX. Continue without saving, continue and save, and cancel will all behave as expected now.
<b>DC2001.dll</b>			
6.4.65	10/23/2023	I2307038	Added validation to check fiscal period locking especially if one DC spans multiple days, only required for those posting actual DC labour into finished goods. Also ensure if a manual DC entry is created against a work order operation but do not select a cell WC, the labour audit trail still records the cell.
<b>ERP Anywhere</b>			
6.4.1	10/23/2023	I2306280	Updated query to handle larger amount of items. Removed Userdefined fields.
		I2112121	This was fixed awhile ago
		I2305028	PRINT CONTAINER LABEL button in ERP Anywhere - Pick and Pack - Pick Item page allows users to download a custom WebReport called "Container"
<b>eSELECTplus_dotNet_API.dll</b>			
6.4.0	10/24/2023	I2106040	Added a DLL for interacting with the Moneris API
<b>Impinj.OctaneSdk.dll</b>			
6.4.1	10/23/2023	I2202284	Main SDK file for the Impinj RFID device.
<b>InventoryAdjustment.dll</b>			
6.4.108	10/23/2023	I2302192	After saving a new adjustment, the adjustment number drop down will now be loaded, filtering results by approved state and date.
<b>InventoryTransfer.dll</b>			
6.4.124	10/23/2023	I2201049	Validation has been added to ensure that the Default Destination Owner info must either be fully specified or not at all.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.124	10/23/2023	I2301036	Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update. Transfer lines to work orders that do not have detail allocations will attempt to use the container inventory first.
<b>Invoice.dll</b>			
6.4.192	10/23/2023	I2310118	Corrected validation step (on an invoice's applied payment missing the Payment GL for its Payment Type) to return a message to the user.
		I2310039	Corrected the logic which was not setting the sales order header SOStatus to the correct value in all cases.
<b>ItemEditor.dll</b>			
6.4.163	10/23/2023	I2306067	Copy Customer Prices (CustomerCodeDetails) when copying item with customer codes checked
<b>JobCosting.dll</b>			
6.4.105	10/23/2023	I2306073	When deleting Sales order or lines check first if there are any opp details set to inactive first then if there are any update them to show up as change orders later.
		I2209249	If a job is able to be deleted and has job billing and there is a pending payment still (not invoiced) the delete will remove that as well.
		I2307011	Deleting a Job will now also automatically delete any related Description of Work records where this would otherwise be permitted.
		I2306055	Modified to allow up to 250 characters in Job Name on the Job Costing screen.
<b>LLRP.dll</b>			
6.4.1	10/23/2023	I2202284	Secondary SDK file for the Impinj RFID device.
<b>LLRP.Impinj.dll</b>			
6.4.1	10/23/2023	I2202284	Secondary SDK file for the Impinj RFID device.
<b>MatReq.dll</b>			
6.4.154	10/23/2023	I2305213	If there are no Buy only parent items marked as Allow BOM, then do not attempt to delete orphaned components.
		I2307250	Modified to ensure that when the "Include Assembly Items" option is selected for the Forecasting MRP, the logic that determines the "First Order By Date" column value includes the assembly items.

**Receiving.dll**

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.167 10/23/2023 I2307184  
I2301036

Do not validate lot Qty on approved receipts when looking at the allocation form and corrected issue where it was possible to waste a Serial number  
Display container no in the grid details if populated via the Container inventory pool logic.

### SalesOrder.dll

6.4.247 10/24/2023 I2310072  
I2309086  
I2306073  
I2301376  
I2307064

Added handling to prevent WO generation for non-processed lines, including a clear message to the user.  
Implemented item costing using Aspose for material requisition generation.  
Removed the restriction for deleting sales orders against approved Jobs when Job Billing is active.  
Modify the logic that displays the message that warns the user that a sub WO will not be automatically created when a non-stock subassembly is added to the BOM to work only where the Require Sub WO option is enabled.  
Corrected missing icon on the Sales order override form and do not bother calling the credit logic if you do not have the license.

### Seradex.Accounting.MYOBLink.dll

6.4.9 10/23/2023 I2304184

Updated for compliance with new connection standard.

### Seradex.Aspose.dll

6.4.8 10/03/2023 I2309291  
6.4.9 10/23/2023 I2309179

Corrected an issue in the initial data import feature that sometimes ceates an incorrect named range for the specified named range in the Initial Data Import setup, and therefore causing incorrect line item pricing when its used in calculating the item price.  
Corrected an issue that was causing the workbook to use an older version of the workbook data for calculations, and returning the wrong pricing.

### Seradex.AutoUpdater.UpdateClient.dll

6.4.10 10/23/2023 I2301187

Messaging used when removing and archiving old files has been improved.

### Seradex.BaseSystem.dll

6.4.63 10/23/2023 I2201051  
I2304184  
I2208119  
I2308218

Remove the requirement of running Telerik reports through the sxProxy EXE.  
Updated for compliance with new connection standard.  
Support has been extended for custom functionality linked to the new user interface.  
Enhance functionality to clear DataSet data tables in a safe and effective manner.

### Seradex.ComComponents.dll

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.58 10/23/2023 I2301082 The system will now check for a financials profile activation before launching financials forms from outside the financials module.

### Seradex.CommonServices.dll

6.4.85 10/23/2023 I2305240 A temporary transaction log manager has been added.  
I2304184 Improved connection integrity in cross module and multi-threaded applications.  
I2301036 Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.  
I2305205 Added new backend functions for WorkFlow, User Defined and Document storage

### Seradex.ConfiguratorSystem.dll

6.4.18 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.Connection.dll

6.4.54 10/23/2023 I2304184 Improved connection integrity in cross module and multi-threaded applications.

### Seradex.Dbox.dll

6.4.42 10/24/2023 I2306204 Corrected an issue in Dbox configurator API where selecting a value in a property does not trigger the related single value auto default when the related single value is cached  
I2301213 Added pre-emptive caching for product line information in DBOX to prevent any users from experiencing a slow to open configurator for massive product lines.  
I2209132 Added Container support for ERP Anywhere to DBOX.  
I2306125 Updated (and fixed) the create Deposit Invoice functionality in DBOX to match new (and missed) logic in OrderStream.  
I2106040 Added support to capture payments through DBOX using Moneris as the payment provider. Added support to automatically create and email a receipt to the customer when a payment is accepted through Moneris.  
I2302144 When converting an Estimate to a Sales Order in DBOX it will now properly set the Entry Date to "today".  
I2306176 Added support to set Custom Reports in DBOX as internal only.  
I2308288 Corrected an issue in Dbox configurator API to differentiate between configurations from OS and Internet Direct before saving a configuration  
I2307176 Updated DBOX/ERP Anywhere to use the new .NET GenKey  
I2306318 DBOX will now respect the price/quantity rounding units in the back end logic. The forms will still let you enter more decimals than should be allowed, but prior to save/calculation the values will be rounded properly and then returned back to the user with the correct number of decimal places.

# Seradex OrderStream

## Technical Release Notes

October 2023

### Seradex.EstimateSystem.dll

6.4.37 10/23/2023 I2309107 Performance has been improved when reloading a selected estimate.

### Seradex.Excel.dll

6.4.31 10/03/2023 I2309291 Corrected an issue in the initial data import feature that sometimes ceates an incorrect named range for the specified named range in the Initial Data Import setup, and therefore causing incorrect line item pricing when its used in calculating the item price.

6.4.32 10/24/2023 I2309086 Implemented item costing using Aspose for material requisition generation.  
I2308326 Modified the check to see if the worksheet exists to prevent access errors.

### Seradex.Financials.FinancialsSystem.dll

6.4.133 10/24/2023 I2106040 Added Moneris as a payment provider for processing authorizations/payments/refunds.

I2306125 Corrected an issue where creating an AR Payment against a quote via DBOX would fail.

### Seradex.Financials.TransactionPosting.dll

6.4.7 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.Infragistics.dll

6.4.68 10/23/2023 I2302141 Updated the Advanced security logic used in the new forms to support the financials menu setup style for secured controls.

I2309112 Ensure when adding items to invoices directly that items not meant for a given division do not appear to the user.

### Seradex.Inventory.dll

6.4.47 10/23/2023 I2304184 Updated for compliance with new connection standard.

I2301036 Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.

I2305205 Added validate lot serial and validate rack bin functions

### Seradex.Inventory.Transfer.dll

6.4.7 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.InvoiceSystem.dll

6.4.38 09/11/2023 I2309026 Reading in NULL values for UnitCost from the related sales order will no longer throw an exception.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.39	10/23/2023	I2308102	Added a hidden field - WorkOrderDetailID - to allow for the related work order to be opened via double-click.
		I2310106	Deleted the old logic pushing _Special items' Comment field into its Name field and AdditionalComment into its Comment field when creating an invoice.

### Seradex.ItemEditor.ItemEditorSystem.dll

6.4.5	10/23/2023	I2305056	Modified to be consistent with the Item Editor in that it allows saving a quantity per parent equals zero. The "Mass BOM Quantity Modifier" user interface will be removing only the components that have been explicitly set to zero and not any pre-existing component where the quantity was already zero.
-------	------------	----------	---

### Seradex.Library.dll

6.4.32	10/23/2023	I2305240	Support for temporary transaction logs has been added.
--------	------------	----------	--

### Seradex.OrderEntry.Bases.dll

6.4.28	10/23/2023	I2304184	Updated for compliance with new connection standard.
--------	------------	----------	--

### Seradex.OrderEntry.SalesOrderEDI.dll

6.4.24	10/23/2023	I2304184	Updated for compliance with new connection standard.
--------	------------	----------	--

### Seradex.OrderEntryLibrary.dll

6.4.38	10/03/2023	I2309291	Corrected an issue in the initial data import feature that sometimes ceates an incorrect named range for the specified named range in the Initial Data Import setup, and therefore causing incorrect line item pricing when its used in calculating the item price.
6.4.39	10/24/2023	I2309086	Implemented item costing using Aspose for material requisition generation.
		I2212072	Added check to determine if one is using financials or not for use in the AR modules and adjusted the price list logic as it was reading the "currency rate" field vs Rate field if one was not already provided to the function.
		I2307261	Corrected issue selecting an item when the estimated unit cost can change based on Qty and that item has unallocated inventory on hand in any material location.
		I2308039	The Estimated Unit Cost on the SalesOrder and Estimating form grid will now populate from the price list when a value for that field is calculated.

### Seradex.ProductConfigurator.dll

6.4.17	09/29/2023	I2309293	Modified to handle environment variables when deploying updated configurator files.
6.4.18	10/23/2023	I2308227	Implemented a 0 or 1 value in cell J52 of the configurator Input worksheet, where 0 means the configuration is being processed with the configurator interface, and 1 means its being processed by the auto processor.

# Seradex OrderStream

## Technical Release Notes

October 2023

### Seradex.Production.Calendar.dll

6.4.19 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.Production.DataCollection.dll

6.4.74 10/23/2023 I2304184 Updated for compliance with new connection standard.  
I2306311 Corrected issue whereby Overhead cell rate was being recorded rounded to the next whole integer.  
I2306120 Modified the function that writes to the BatchTransactions table to ensure that duplicates cannot be added from the same user.  
I2202284 Modified to add the necessary code to be able to automatically complete the final operation and the associated work order in silent mode.

### Seradex.Production.Rework.dll

6.4.22 10/23/2023 I2303294 Altered how loading of the form was done to have the grids appear with columns faster and prevent issues if a user attempts to use the WO combo before it finishes loading.

### Seradex.Production.WorkOrder.dll

6.4.49 09/06/2023 I2307086 Modified updating of sub work orders to handle null QtyComplete.  
6.4.50 10/23/2023 I2307279 Batch BOM Change for consolidated orders has now been implemented in the .NET Work Order form like in the old Work Order form.

### Seradex.Purchasing.dll

6.4.44 10/23/2023 I2310093 PO line's QtyToStock will now be populated on initial save with a non-zero value if the initial quantity is not explicitly set.

### Seradex.Purchasing.PurchasingEDI.dll

6.4.3 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.Purchasing.ReceivingSystem.dll

6.4.43 09/13/2023 I2308282 Modified MultiDivision in PurchaseOrder to warn only, but attempting to approve the related receipt will not be permitted if the PO remains mismatched in this manner.  
6.4.44 10/23/2023 I2308112 Used the stock UOM as the UOM to which returned items are converted when re-calculating the quantity left to be received.  
I2304184 Updated for compliance with new connection standard.  
I2301036 Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.44	10/23/2023	I2307171	Ensure when conversions from one UOM to stock uses the Receiving rounding units
		I2303337	Added API endpoints to support Receiving on ERP anywhere
		I2305217	Improved delete receipt logic to improve efficiency and ensure deletion log records the receipt being deleted as opposed to recording all the lines being deleted
		I2305205	Updated receiving backend to facilitate use for APIs
		I2307212	A previously InventoryUpdated, unapproved vendor return will no longer be prevented from being re-approved simply by virtue of its InventoryUpdated status.

### Seradex.RecurringTransaction.dll

6.4.29	10/23/2023	I2303226	The payment request form has been updated to include a Line Qty column.
--------	------------	----------	---

### Seradex.ReportSystem.dll

6.4.25	10/23/2023	I2304182	The report system now loads report menus to show based on ActiveM reports data.
--------	------------	----------	---

### Seradex.RestApi.dll

6.4.36	10/24/2023	I2306125	Updated (and fixed) the create Deposit Invoice functionality in DBOX to match new (and missed) logic in OrderStream.
		I2209132	Added Container support for ERP Anywhere to DBOX.
		I2301213	Added pre-emptive caching for product line information in DBOX to prevent any users from experiencing a slow to open configurator for massive product lines.
		I2305028	PRINT CONTAINER LABEL button in ERP Anywhere - Pick and Pack - Pick Item page allows users to download a custom WebReport called "Container"
		I2309255	Updated LicenceNode to find the ERP Anywhere Receiving module activation code.

### Seradex.RFIDDevice.dll

6.4.1	10/23/2023	I2202284	Added this new module to be able to read data from various types of RFID scanning devices.
-------	------------	----------	--

### Seradex.RFIDDeviceManager.dll

6.4.1	10/23/2023	I2202284	Added this new module to be able to read data from various types of RFID scanning devices.
-------	------------	----------	--

### Seradex.SalesOrderSystem.dll

6.4.46	10/23/2023	I2310072	Added handling to prevent WO generation for non-processed lines, including a clear message to the user.
--------	------------	----------	---

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.46 10/23/2023 I2212072 Added check to determine if one is using financials or not for use in the AR modules and adjusted the price list logic as it was reading the "currency rate" field vs Rate field if one was not already provided to the function.

### **Seradex.Search.dll**

6.4.93 10/23/2023 I2308218 Ensure the Search setup data is cleaned up effectively.

### **Seradex.Security.dll**

6.4.28 10/23/2023 I2305179 Implemented support to clear dbox cache for dbox clients only after modifying and saving a web productline setup

### **Seradex.Shipping.dll**

6.4.32 10/23/2023 I2310039 Corrected the logic which was not setting the sales order header SOStatus to the correct value in all cases.

I2308101 Ensure detail colour coding is applied on new item selection.

### **Seradex.Utilities.BatchTransactionProcessor.exe**

6.4.2 10/23/2023 I2306120 Modified to add the ability to archive the already processed records from the BatchTransactions before they are deleted after 7 days.

### **Seradex.Utilities.IntegrationMgrSystem.dll**

6.4.33 10/23/2023 I2308337 Modified to add clean up to the back end

### **Seradex.Utilities.OrderImport.dll**

6.4.34 10/23/2023 I2304184 Updated for compliance with new connection standard.

### **Seradex.Utilities.RFIDAutomatedProcessor.exe**

6.4.0 10/23/2023 I2202284 Standalone utility to process the last Shop Floor operation and complete the corresponding work order line using an RFID scanning device. Note that this utility should be set up to work with the Task Scheduler.

### **Seradex.Utilities.RFIDAutomatedProcessor.exe.conf**

6.4.0 10/23/2023 I2202284 Config file for the standalone utility (Seradex.Utilities.RFIDAutomatedProcessor.exe) to process the last Shop Floor operation. In this file the user should store the specific setting for the operation, such CellID, EmployeeID, etc.

# Seradex OrderStream

## Technical Release Notes

October 2023

### Seradex.Win.AdvancedDeliverySchedule.dll

6.4.9 10/23/2023 I2308269 Clean up Report system references to the Delivery Schedule form to ensure subsequent report calling works as expected.

### Seradex.Win.AppboxThemeSelector.dll

6.4.8 10/23/2023 I2307163 Save enables when changing appbox custom order

### Seradex.Win.BillOfLading.dll

6.4.15 10/23/2023 I2304184 Updated for compliance with new connection standard.

### Seradex.Win.Controls.dll

6.4.43 10/23/2023 I2307290 The Notes field has been restored to the SO.Net and Estimate.Net forms' Comments grid - hidden by default - allowing it to be made visible via SecuredControls.

### Seradex.Win.Estimate.dll

6.4.57 10/03/2023 I2309291 Corrected an issue in the initial data import feature that sometimes ceates an incorrect named range for the specified named range in the Initial Data Import setup, and therefore causing incorrect line item pricing when its used in calculating the item price.

6.4.58 10/23/2023 I2308334 Disabled the View Worksheet menu item when running in Aspose mode, as workbooks cannot be viewed in Aspose mode.

I2308076 Modified the document number combo handling to avoid throwing an exception when values are typed in.

I2307290 Add additional exposed functionality to allow custom calls to further interact with the grid.

I2304182 The Notes field has been restored to the SO.Net and Estimate.Net forms' Comments grid - hidden by default - allowing it to be made visible via SecuredControls.

I2307102 Switchboard reports hidden using the report display utility will no longer appear in the forms report menu.

I2305123 Modified several context menu click events to avoid proceeding if no active row is selected.

I2302141 Form remembers header spacing when changed

### Seradex.Win.Financials.dll

6.4.132 10/24/2023 I2302141 Added support for Advanced Security to Deposits and Receive Payments within Financials and upgraded Financials to use the newer advanced security logic.

I2106040 Added Moneris as a payment provider for processing authorizations/payments/refunds.

## Technical Release Notes

October 2023

### Seradex.Win.IntegrationManager.dll

6.4.24	10/23/2023	I2308337	Modified to add clean up to the back end
		I2301211	Modified the Microvellum/Cabinet Vision import line options to exclude merging when its setup is missing.

### Seradex.Win.IntercompanyManagement.dll

6.4.8	10/23/2023	I2304184	Updated for compliance with new connection standard.
-------	------------	----------	--

### Seradex.Win.InventoryCosting.dll

6.4.12	10/23/2023	I2301054	Modified to include finished good cost adjustments that happen upon work order completion. In this scenario the cost adjustment record will be the top level one.
--------	------------	----------	---

### Seradex.Win.InventoryTransfer.dll

6.4.36	10/23/2023	I2306303	Items allocated to a work order can now be added to containers.
		I2304184	Updated for compliance with new connection standard.
		I2309240	Corrected issue with container management when the last load option used was Selected Container and the next use of the Container management will load Selected and unassigned even though the Selected option is selected.

### Seradex.Win.Invoice.dll

6.4.61	09/12/2023	I2308296	Batch Invoice Approval form will no longer halt on the first validation failure.
6.4.62	10/23/2023	I2307102	Modified several context menu click events to avoid proceeding if no active row is selected.
		I2308102	Added double-click functionality for documents (SO, SH, WO) referenced in the grid.
		I2309112	Ensure when adding items to invoices directly that items not meant for a given division do not appear to the user.
		I2305123	Form remembers header spacing when changed
		I2304182	Switchboard reports hidden using the report display utility will no longer appear in the forms report menu.

### Seradex.Win.Production.dll

6.4.10	10/23/2023	I2304184	Updated for compliance with new connection standard.
--------	------------	----------	--

### Seradex.Win.Purchasing.dll

6.4.75	09/13/2023	I2308282	Modified MultiDivision in PurchaseOrder to warn only, but attempting to approve the related receipt will not be permitted if the PO remains mismatched in this manner.
6.4.76	10/23/2023	I2308334	Modified the document number combo handling to avoid throwing an exception when values are typed in.

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.76	10/23/2023	I2309251	Corrected the PO grid line validation which is intended to forbid changing a line's location to a non-WIP location if it is owned by a WO line and a non-stock item.
		I2309163	The check for an employee location will be bypassed for inactive employees when adding a new PO.
		I2301036	Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.
		I2305123	Form remembers header spacing when changed
		I2208119	The purchase order form has been updated to support custom functionality.
		I2307027	Discontinued items can no longer be selected by typing the Item No into the item cell.

### Seradex.Win.QuickConfigurator.dll

6.4.36	10/23/2023	I2304184	Updated for compliance with new connection standard.
--------	------------	----------	--

### Seradex.Win.Receiving.dll

6.4.63	09/13/2023	I2308282	Modified MultiDivision in PurchaseOrder to warn only, but attempting to approve the related receipt will not be permitted if the PO remains mismatched in this manner.
6.4.64	10/23/2023	I2308334	Modified the document number combo handling to avoid throwing an exception when values are typed in.
		I2308189	Restored reference to the old receiving generator to support custom logic that relies on it.
		I2308226	Modifying receiving lines' ownership will now function as expected.
		I2304184	Updated for compliance with new connection standard.
		I2208119	The receiving form has been updated to support custom functionality.
		I2306255	Added a call to save the Receiving form before receiving all lines during the Tools > Process Receipt process.
		I2305123	Form remembers header spacing when changed
		I2307184	Ensure if the receipt is not approved yet inventory is updated, viewing the allocation form is still locked.
		I2304182	Switchboard reports hidden using the report display utility will no longer appear in the forms report menu.
		I2305205	Updated receiving backend to facilitate use for APIs
		I2303337	Receipt changes to ensure compatibility with back end changes for ERP anywhere
		I2308057	The Packing Slip textbox will no longer be cleared when running Process Receipt/Process Return without first saving the document.

### Seradex.Win.RecurringTransaction.dll

6.4.29	10/23/2023	I2303226	The payment request form has been updated to include a Line Qty column.
--------	------------	----------	---

### Seradex.Win.Reports.dll

6.4.28	10/23/2023	I2304182	The display column values of the user report access form can now be edited.
--------	------------	----------	---

#### Seradex.Win.SalesOrder.dll

6.4.64	10/03/2023	I2309291	Corrected an issue in the initial data import feature that sometimes ceates an incorrect named range for the specified named range in the Initial Data Import setup, and therefore causing incorrect line item pricing when its used in calculating the item price. Disbled the View Worksheet menu item when running in Aspose mode, as workbooks cannot be viewed in Aspose mode.
6.4.65	10/23/2023	I2310019	Corrected issue on multi division where items tagged as non sell yet have a setup for that division are not available in the drop down for new or existing unapproved orders.
		I2308334	Modified the document number combo handling to avoid throwing an exception when values are typed in.
		I2309029	A message to the user was restored in the event that a sales order could not be used to generate MatReq.
		I2309011	Modified the deletion routine to work as expected when the sales order is opened from a search.
		I2212072	Ensure for non financial clients they cannot generate deposit invoices on sales orders without the deposit processing license.
		I2307102	Modified several context menu click events to avoid proceeding if no active row is selected.
		I2307290	The Notes field has been restored to the SO.Net and Estimate.Net forms' Comments grid - hidden by default - allowing it to be made visible via SecuredControls.
		I2210116	Adjusted logic to ensure header discount as entered is preserved on any line change that affects total or retail totals.
		I2304182	Switchboard reports hidden using the report display utility will no longer appear in the forms report menu.
		I2305240	Shipment and invoice generation will now check to see if a second user is processing the sales order before continuing.
		I2305123	Form remembers header spacing when changed
		I2208119	The sales order form has been updated to support custom functionality.

#### Seradex.Win.Search.dll

6.4.106	10/23/2023	I2308218	Ensure the Search layout data is cleaned up effectively.
		I2210157	Change menu option for legend to make it more clear why it doesn't appear on all searches (renamed Coloured Cell Legend)

#### Seradex.Win.ServiceOrder.dll

6.4.20	10/23/2023	I2307102	Modified several context menu click events to avoid proceeding if no active row is selected.
		I2304182	Switchboard reports hidden using the report display utility will no longer appear in the forms report menu.

#### Seradex.Win.Shipping.dll

# Seradex OrderStream

## Technical Release Notes

October 2023

6.4.51	10/23/2023	I2307102	Modified several context menu click events to avoid proceeding if no active row is selected.
		I2208119	The shipping form has been updated to support custom functionality.
		I2305123	Form remembers header spacing when changed
		I2303133	Document scanning has been added to shipping.
		I2308334	Modified the document number combo handling to avoid throwing an exception when values are typed in.
		I2308102	Added double-click functionality for SO documents referenced in the grid.
		I2308101	Ensure detail colour coding is applied on initial selection of a sales order.

### Seradex.Win.ShopFloorExecution.dll

6.4.67	10/23/2023	I2202284	Modified the SFE detail form code to improve the way it interacts with the RFID devices and properly handle multi-threading.
		I2307029	All columns in the "Select Work Order Lines to Complete" form within SFE will now automatically resize as appropriate.

### Seradex.Win.WorkOrder.dll

6.4.51	09/12/2023	I2309074	Modified to address an issue that occurs when attempting to load a consolidated work order.
6.4.52	10/23/2023	I2307102	Modified several context menu click events to avoid proceeding if no active row is selected.
		I2307279	Batch BOM Change for consolidated orders has now been implemented in the .NET Work Order form like in the old Work Order form.
		I2308230	Added some handling to the WorkOrder form to get around a known Infragistics issue which causes an exception to be thrown when typing directly into the WorkOrderNo combo.
		I2310072	WO Generator will no longer permit an unprocessed line to have a WO line created for it. The WO Generator grid will be shown with a red background and the Include checkbox will revert to unchecked for all such cases.
		I2307116	Reload Item Defaults is no longer being blocked for WorkOrder lines related to SalesOrder lines.
		I2305064	On grid cell combo close-up and non-combo grid cell value change, the SetChanged method is fired, preventing use of the Add button.
		I2305123	Form remembers header spacing when changed
		I2306287	Moved the test for AdvancedDocumentStorage module activation to before the context menu is populated on WorkOrder form load.

### Shipping.dll

6.4.179	10/23/2023	I2309275	Launching the Ship Container tool from a just-generated shipment will no longer throw an exception.
---------	------------	----------	---

### sxEDIBridge.dll

6.4.66	10/24/2023	I2308199	Modified to use the configurator setting to force new spec when auto processing with excel application
--------	------------	----------	--

# Seradex OrderStream

## Technical Release Notes

October 2023

### sxPhysical.dll

6.4.44 10/23/2023 I2211168 Corrected an issue for the cycle count functionality where the same item class was wrongly used in the query that calculates the number of items to be counted per class.

### Template.xls

6.4.16 10/23/2023 I2308227 Implemented a 0 or 1 value in cell J52 of the configurator Input worksheet, where 0 means the configuration is being processed with the configurator interface, and 1 means its being processed by the auto processor.

### UpdateAcct.dll

6.4.81 10/23/2023 I2212204 Customers, Prospects, and Vendors will all have the DateCreated and UserCreated populated when imported via Update Accounts.

### WorkOrder.dll

6.4.229 10/24/2023 I2208313 Completed column allows changes if tabbed over (not just when clicked)  
I2307017 Modified the Qty To Inventory column to accept only numeric characters for the Work Order Completion form.  
I2307007 Modified CompleteWO form Priority and LotSerialQty columns to be non-editable.  
I2307038 Ensure for standard labour or using DC labour with non tracked cells, regular hours are still recorded even if the cell cost is zero.  
I2301036 Added support for Container Inventory Pool which allows non stock items to be received to an owner without a line which assigns automatically to a container upon inventory update.  
I2306120 Modified the function that writes to the BatchTransactions table to ensure that duplicates cannot be added from the same user.  
I2305182 Modified to improve the lot/serial adjusting logic to be able to remove serial records related to deleted work order lines or lines where the items have been changed.  
I2308221 Modified to avoid an error when loading the Work Order Completion form that was happening when having custom menus against the main work order form that are not applicable to this form.  
I2307279 Batch BOM Change for consolidated orders has now been implemented in the .NET Work Order form like in the old Work Order form.  
I2309086 Implemented item costing using Aspose for material requisition generation.
