Technical Release Notes

February 2018

AcctMaintenance.dll

6.4.97	03/15/2018	11801198	Altered the deletion logic of customers and vendors to prevent deletion if a related bank transaction or deposit details exist.
		11712135	Added validation functions on save to ensure minimal BillTo/ShipTo and address information has been entered for the CRM > Tools > Customer Tools > Customer BillTo and Customer ShipTo.
		11711105	Corrected the return type of a field to account for the possibility of dealing with a blank line when Customer Item Numbers

AdminTools.dll

6.4.43	03/09/2018	11708210	Now handles downloading the initial AutoUpdater.exe.config file, but never downloading a new one as that would overwrite the client's setup. Also handles downloading the text file for the AutoUpdater.exe.config file.
6.4.44	03/12/2018	11803077	WebUpdate no longer displays a message to the user when it cannot get the version number for an msi file because the file doesn't exist.

AutoProcessor.exe

6.4.3	03/15/2018	11711031	Adjusted the logic ensuring that errors are captured when running work order transfer generation from Auto Processor.
-------	------------	----------	---

AutoUpdater.exe

6.4.37	03/09/2018	11708210	New .NET AutoUpdater
--------	------------	----------	----------------------

AutoUpdater.exe.config

6.4.0	03/02/2018	11708210	New files required for .NET AutoUpdater
-------	------------	----------	---

AutoUpdaterClientInstaller.msi

6.4.0	03/09/2018	11708210	New files required for .NET AutoUpdater
-------	------------	----------	---

AutoUpdaterServerInstaller.msi

6.4.0	03/09/2018	11708210	New files required for .NET AutoUpdater
-------	------------	----------	---

BatchProcessing.dll

6.4.37	03/09/2018	11802154	The negative inventory check will be run for every checked shipment, if the Update Inventory checkbox is checked.
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

February 2018

Commissions.dll

6.4.22 03/09/2018 11701191 Modified to ensure that when viewing the transaction commissions, the rules displayed are the ones related to the commission group. Also the rules have been moved to the detail section because, in general, different details can have different rules.

CRM.dll

6.4.121 03/15/2018 11801198 Altered the deletion logic of customers to prevent deletion if a related bank transaction or deposit details exist.

DataTransfer.mdb

6.4.215 02/12/2018 11801062 Added a view to facilitate the gathering of items' overall Reorder totals across all facilities.

6.4.216 03/19/2018 11801134 A new integrity check to detect Sales Reps linked to inactive Employees was added.

11801118 Appbox has been enhanced to launch the Version Information module.

11801178 Changed the wording on the "Set Password" to properly reflect the required password strength.

11802043 Update ufn_getExchangeRate to handle DEFAULT parameter for Sell Rate usage

11710252 Added new tables for Dashboards in DBOX. Added new fields to SecuredObjects to support the new security for Dashboards in DBOX. Added localization values for the Dashboard manager. Added states and roles for the dashboard manager.

11801230 Altered the SQL from the "Sales Order - Without Line Items" integrity check to correctly identify Sales Orders with no lines.

11712207 Enhanced the core report queries to display null-value city, province, state, and postal code values as empty strings.

11802129 View dbo.qryInventory is now correctly uses the Item's Location to determine if there is Qty on Hand.

DayEndProc.dll

6.4.131 03/15/2018 11802156 Corrected issue with inventory postings for clients using Standard Cost only posting

DBox Web Front End Components (WFE)

6.4.4 03/19/2018 11802076 The Description on a Line Item will now take up to 50% of the width of the Detail's on-screen width. The rest of the description can be seen by clicking the More Info icon to the Right of the Description.

11802124 The Account Management page was not showing the country, only the State/province after the City. I have ammended that line to show City, StateProv and Country (depending on which exist of course).

Seradex OrderStream

Technical Release Notes

February 2018

6.4.4	03/19/2018	11801261	Modified CSS on the Configurator Image Upload page to be legible on all themes. Made some changes to the SideBar/Navigation Menu to allow the text and icon color to be colors other than white/theme driven. Made text contrast properly with background colors for certain clients with light-coloured themes.
		11801177	Modified Client Themes to properly read the background image etc. files from the Amazon Buckets instead of the Azure Storage
		11801224	Fixed Chrome v63+ bug where Calendar inputs would display partially outside the bounds of the window.
		11710252	Created the Dashboard Manager Module. The Home page can now be Dashboards instead of the default DBOX home page. Added the ability for Dashboards to show alongside searches on lists such as the CRM List or Transaction Lists.
		11802129	On the Sell-Item page it will now display the Qty on Hand instead of the "available/no stock" icons.
		11802130	Attachments will now show when going to edit an existing news item, they can also be deleted.
			When save is clicked on the edit/create news dialog, and focus returned to the previous page, the news list will properly refresh with the new item/changes.
			Users can now click on the name of the attachment to download an attachment, not just the paper clip.
		11802123	Added the ability for the Activity form to be pre-populated with data when being created from the Account Management page.
		11711109	Fixed multiple inconsistencies in terms of missing tooltips, and useless buttons.
		11801217	Modified the configurator to support in-line adding/editing/removing of Child Configurations when editing a parent configuration.
		11803016	All ID fields are hidden on Searches and cannot be enabled.

Estimating.dll

6.4.147	03/09/2018	11710222	Correction has been made to ensure that the File Attachments field is updated when deleting.
---------	------------	----------	--

InventoryTransfer.dll

6.4.81	03/15/2018	11802092	Adjusted Inventory Transfer form to open maximized.
--------	------------	----------	---

Invoice.dll

6.4.132	03/15/2018	11709070	Altered invoice to support Job costing based deposit invoices
		11710260	The default empty line in the Edit Freight form will no longer add itself to the main spread on Save

JobCosting.dll

Seradex OrderStream

Technical Release Notes

February 2018

6.4.68	03/15/2018	I1709070	Added support to Job costing to generate deposit invoices.
		I1802080	Adjusted the logic to ensure that the contract and change order tab only delete override records upon save.
MatReq.dll			
6.4.117	02/12/2018	I1801257	When running MRP in All Facilities mode, the reorder values for the main location and facilities, will be summed up to ensure an accurate calculation of inventory needs across the system. The MRP calculation of quantity on hand has been modified to be more generic.
		I1801128	Only items that have Facility Info records specified will be reported on through the Transfer MRP interface.
6.4.118	03/09/2018	I1802099	When filtering by a Facility in Purchasing MRP, items with no demand in that facility will only be reported on if the Include Stock Items with No Demand checkbox is checked.
POInvoice.dll			
6.4.93	03/15/2018	I1801176	Corrected issue in vendor invoicing if no item is selected for a miscellaneous invoice line and corrected header discount calculation on pure miscellaneous invoices.
PurchaseOrder.dll			
6.4.112	03/09/2018	I1801002	Refactored Purchase Order form code to facilitate reusability with new implementations of the Purchase Order UI.
		I1708177	New functionality was added to prevent personal key from generating for intercompany.
RptDataCollection.dll			
6.4.64	03/19/2018	I1710165	Minor UI adjustment has been made to the Complete Work Order Variance report.
		I1712207	Reports have been enhanced to always display the available address City, Province/State, and Postal code values, regardless of how many of them are populated. A comma will be added appropriately after City if province/state or postal code is populated. The comma between the Province/State and the postal code has been removed.
RptEstimating.dll			

6.4.20	03/19/2018	11712207	<p>Reports have been enhanced to always display the available address City, Province/State, and Postal code values, regardless of how many of them are populated.</p> <p>A comma will be added appropriately after City if province/state or postal code is populated.</p> <p>The comma between the Province/State and the postal code has been removed.</p>
RptFinancials.dll			
6.4.60	03/09/2018	11801283	<p>Corrected display issue for the Income statement/balance sheet if using regional settings that are not English Canada or United States and the start date chosen is greater than Jan 1 and the day portion is less than 13</p>
RptInventory.dll			
6.4.53	03/19/2018	11712207	<p>Reports have been enhanced to always display the available address City, Province/State, and Postal code values, regardless of how many of them are populated.</p> <p>A comma will be added appropriately after City if province/state or postal code is populated.</p> <p>The comma between the Province/State and the postal code has been removed.</p>
RptOrderEntry.dll			
6.4.44	03/19/2018	11712207	<p>Reports have been enhanced to always display the available address City, Province/State, and Postal code values, regardless of how many of them are populated.</p> <p>A comma will be added appropriately after City if province/state or postal code is populated.</p> <p>The comma between the Province/State and the postal code has been removed.</p>
RptPurchasing.dll			
6.4.32	03/19/2018	11712207	<p>Reports have been enhanced to always display the available address City, Province/State, and Postal code values, regardless of how many of them are populated.</p> <p>A comma will be added appropriately after City if province/state or postal code is populated.</p> <p>The comma between the Province/State and the postal code has been removed.</p>
SalesOrder.dll			
6.4.183	03/15/2018	11708177	<p>New functionalities were added to support batch generation material requisition.</p>

Seradex OrderStream

Technical Release Notes

February 2018

6.4.183 03/15/2018 11711132

Users without security access as determined by the AltEmployeeGroups table can no longer delete content from the File Attachment column in the Comments spread on the Sales Order form.

Seradex.AppBox.exe

6.4.6 03/09/2018 11708210

Now directly calls AutoUpdater so AutoUpdater can re-launch AppBox when possible.

Seradex.AutoUpdater.ReleaseFileList.dll

6.4.0 03/09/2018 11708210

New files required for .NET AutoUpdater

Seradex.AutoUpdater.UpdateClient.dll

6.4.0 03/09/2018 11708210

New files required for .NET AutoUpdater

Seradex.Connection.dll

6.4.32 03/09/2018 11708177

Corrected an issue where the system is not destroying a temp table that was created under the dbo. Schema

Seradex.Dbox.Dashboarding.dll

6.4.0 03/19/2018 11710252

Created the Dashboarding DLL. Can now create dashboards for use around DBOX.

Seradex.Dbox.dll

6.4.4 02/09/2018 11802079

If no body is present will put the subject in the body of an e-mail when sending a report as an e-mail. Apparently SendGrid requires a body in their e-mails.

6.4.5 03/19/2018 11802084

Properly creating and modifying JobControlContracts upon Estimate and Sales Order Generation.

11710252

Modified some Search/Chart Security related functions to use new tables in line with the new Dashboarding features.

11802123

Added the ability for the Activity form to be pre-populated with data when being created from the Account Management page.

11802130

Attachments will now show when going to edit an existing news item, they can also be deleted.

When save is clicked on the edit/create news dialog, and focus returned to the previous page, the news list will properly refresh with the new item/changes.

Users can now click on the name of the attachment to download an attachment, not just the paper clip.

Technical Release Notes

February 2018

6.4.5	03/19/2018	11801248	Implemented AdditionalInfo and AdditionalInfoValues copying for prospect to customer conversion
		11801217	Implemented an enhanced Parent Child Configuration within a single page (Configurator) in DBOX.
		11802125	Added proper sorting of results to a bunch of calls that fill dropdowns on the web (mainly alphabetical)

Seradex.Financials.FinancialsSystem.dll

6.4.91	03/09/2018	11802003	Ensure the balance owing on AR payment documents is recalculated based on the sum of the cash application of invoices to prevent issues if the balance owing in the database against an AR payment becomes corrupted.
--------	------------	----------	---

Seradex.MasterApi.dll

6.4.2	02/09/2018	11802079	If no body is present will put the subject in the body of an e-mail when sending a report as an e-mail. Apparently SendGrid requires a body in their e-mails.
-------	------------	----------	---

Seradex.Production.DataCollection.dll

6.4.34	02/12/2018	11801160	Corrected issue with Shop floor whereby if a partial work order completion (stop action) fails to complete the work order the quantity to complete in data collection is not rolled back.
6.4.35	03/15/2018	11706006	Prevent issues if required core fields are removed from the custom search for Shop Floor.

Seradex.Production.Scheduling.dll

6.4.66	03/15/2018	11801083	Leveling in Finite/Hybrid Scheduling has been updated to handle an issue with limiting the work centers available for an operation within that operation.
		11803064	Corrected an issue in Finite/Hybrid Scheduling that can occur when leveling encounters a backwards scheduled operation that is locked and has a time that overlaps other operations when it should not.

Seradex.RecurringTransaction.dll

6.4.10	03/09/2018	11711106	Corrected an issue that occurred when attempting to approve a progress payment document that is already approved.
--------	------------	----------	---

Seradex.ReportSystem.dll

6.4.4	03/14/2018	11803062	The ReprintFlagField will now be trimmed of any leading or trailing spaces before determining if reprint functionality should be performed.
-------	------------	----------	---

Seradex.RestApi.dll

6.4.4	03/19/2018	11802130	<p>Attachments will now show when going to edit an existing news item, they can also be deleted.</p> <p>When save is clicked on the edit/create news dialog, and focus returned to the previous page, the news list will properly refresh with the new item/changes.</p> <p>Users can now click on the name of the attachment to download an attachment, not just the paper clip.</p>
		11802123	Added the ability for the Activity form to be pre-populated with data when being created from the Account Management page.
		11710252	Added new routes for the Dashboards in DBOX.
Seradex.Utilities.ImportAdapterInterface.dll			
6.4.20	03/09/2018	11708177	New functionality was added to prevent personal key from generating for intercompany.
Seradex.Utilities.OrderImport.dll			
6.4.19	03/09/2018	11708177	New functionality was added to prevent personal key from generating for intercompany.
6.4.20	03/15/2018	11707105	Modified to handle when only a CustomerShipTo's StateProvince Code or Name is supplied instead of both or neither.
Seradex.Win.Financials.dll			
6.4.88	03/09/2018	11801208	When voiding a refund of credit, ensure only one reversal option is available and it is selected by default.
Seradex.Win.InventoryCosting.dll			
6.4.6	03/09/2018	11802132	Labour calculation rounding has been modified to ensure labour operations of all durations are reported on correctly.
Seradex.Win.Scheduling.dll			
6.4.37	03/09/2018	11803050	Corrected issue where the footer buttons are not scaling correctly with Window's DPI.
6.4.38	03/16/2018	11803120	Adjusted the UI when Window's scaling is at 100%.
Seradex.Win.Scheduling.Finite.dll			
6.4.16	03/09/2018	11803050	Corrected issue where footer buttons are not scaling correctly with Window's DPI.
6.4.17	03/16/2018	11803120	Adjusted the UI when Window's scaling is at 100%.

Seradex OrderStream

Technical Release Notes

February 2018

Seradex.Win.Search.dll

6.4.63 03/15/2018 I1803050 Corrected issue where searches are not scaling correctly with Window's DPI.

Seradex.Win.Telerik.dll

6.4.8 03/14/2018 I1803062 The Telerik Print Dialog will now restrict certain print actions, only when Reprint functionality has been setup for a report.
I1802214 Telerik report viewer dispose functionality will now only be run on valid report objects.

ServiceOrder.dll

6.4.65 03/15/2018 I1505102 The selected records in the ShipTo/BillTo contact combos will be retained when the combos are reloaded

setup.exe

6.4.0 03/09/2018 I1708210 New files required for .NET AutoUpdater
I1708210 New files required for .NET AutoUpdater

sxEDIBridge.dll

6.4.42 03/09/2018 I1708177 New functionality was added to prevent personal key from generating for intercompany.

sxMaintenance.dll

6.4.121 03/15/2018 I1801198 Altered the deletion logic of employees to prevent deletion if a related bank transaction or deposit details exist.

sxPhysical.dll

6.4.34 03/09/2018 I1802158 When not in Bar Coded entry mode in the Physical Inventory module, clicking the arrow key or pressing enter in the Qty field will no longer attempt to set focus to the Tag No field.

sxRuntime.exe

6.4.45 03/09/2018 I1708210 sxRuntime no longer automatically launches AutoUpdater.exe elevated. AutoUpdater will elevate itself when required.
I1803050 Corrected issue where searches are not scaling correctly with Window's DPI.

sxVersion.dll

6.4.11 03/19/2018 I1801118 Appbox has been enhanced to launch the Version Information module.

Seradex OrderStream

Technical Release Notes

February 2018

Template.xls

6.4.10 03/14/2018 I1803095 Disabled and removed sample RuntimeDataImport query that was overwriting data on the Output sheet.

UWP Inventory Transfer_Adjustment ARM.zip

6.4.0 03/09/2018 I1712076 Adjusted the logic ensuring that the logic will not attempt to valid a control that is not there.

WorkOrder.dll

6.4.157 02/12/2018 I1801062 Multi-facility functionality has been added to the Make-Stock MRP form.

6.4.158 02/15/2018 I1802110 Modified to ensure that stock items that are not custom marked as "Required Backflushing" are also checked for insufficient inventory during work order completion when using the application preference: "Work Order Completion - Backflush additional Inventory to satisfy BOM Requirements".

I1802138 Adjusted the logic to ensure that work order is deleting the detail line correctly.

I1802144 Corrected Make-Stock MRP apply filter's gathering logic ensuring that the system is gathering data correctly when MultiDevision or MultiFacility module activation are off.

6.4.159 03/15/2018 I1711031 Adjusted the logic ensuring that errors are captured when running work order transfer generation from Auto Processor.

I1708177 New functionality call was added to support reordering of work order line from outside logic.

I1801251 When backdating a work order completion, ensure the transaction date of all inventory item audit trail records produced records the back dated value.

I1802024 Corrected issue with generation of transfer for parent work orders with existing sub work orders that had prior work order completions on the parent work order.

I1802150 Adjustment has been made for Work Order MRP ensuring that the system is populating the item rack and bin against the item location when generating work order with the Per Std Run Qty checked.

I1803020 Adjusted the Work Order MRP to ensured that the system is gathering the data correct.

Adjusted the Work Order MRP to ensured that the Include Facilities view tool enforce the user to re-apply the filter.

I1803069 Corrected the gathering logic for Item alternate substitutions during work order completion.

I1803066 Modified to improve the speed of the consolidated work order completion process.
