

Seradex OrderStream

Technical Release Notes

February 2019

ActiveM20.dll

6.4.119 03/06/2019 I1803043 Exposed additional functionality to the .NET modules and inventory packaging distribution form.

ActivityLog.ocx

6.4.26 03/06/2019 I1901155 Activity Log view settings are now saved in the registry explicitly rather than when the setting is changed.

AdminTools.dll

6.4.54 02/07/2019 I1902053 Web Update now maintains the new activation code for the new interface.

Config.dll

6.4.171 03/06/2019 I1803043 Enhanced config to allow for the creation of package distribution information when the related information on the excel sheet is filled out.
I1901055 The systems currency symbol will now appear in the configurator's extended price field instead of the dollar sign.

CreditNote.dll

6.4.121 03/06/2019 I1902067 Added logic to support .NET Credit All function.
I1902056 Changing the discount percent now correctly sets the discount amount.

DataTransfer.mdb

6.4.235 03/06/2019 I1901100 Item Vendor Details - With Invalid UOM Conversions integrity check will now exclude discontinued items when validation.
I1803043 Added additional columns to the InventoryConversionOrder tables, as well as the InventoryConversionOrderDetailLinks and InventoryConversionOrderPackaging tables.
I1811001 Secured control entries for purchase order and service order have been added.

DayEndProc.dll

6.4.140 02/27/2019 I1809087 Altered Day end to integrate into Sage 50 UK version
I1602071 To prevent multi-user issues in day end, the system will no longer allow creation of ActiveM data objects under schemas other than dbo.
I1901193 Added support to Auto Post GL entries upon inventory update for Seradex Financials only.
I1902159 Modified to update the file format of the MYOB GL batches to support the latest versions of MYOB AccountRight (versions 2015-2018).

Technical Release Notes

February 2019

Estimating.dll

6.4.156	02/13/2019	I1901315	Modified to ensure that multiple Customer Codes for a Customer/Item combination does not cause any duplication of lines in the transaction.
6.4.157	03/06/2019	I1812200	Modified to reduce locking effects with Inventory.
		I1808216	The Costing Info tab has been updated to break down costs by estimate line.
		I1901249	The IsOrderContainsChargeItems function should now use the correct variable.

ExcelBOMImport.dll

6.4.1	03/06/2019	I1901141	Improved base performance, added a setting to allow ignoring of the Harm Code warning, and ensured new BOM creation will reset all related Item Spec Master Copy flags.
-------	------------	----------	---

InventoryTransfer.dll

6.4.89	03/06/2019	I1901180	When copying a transfer for a work order, ensure the Work order line transfer qty validation is not copied over.
--------	------------	----------	--

Invoice.dll

6.4.152	02/13/2019	I1901315	Modified to ensure that multiple Customer Codes for a Customer/Item combination does not cause any duplication of lines in the transaction.
6.4.153	03/06/2019	I1901089	When in multi-shipment mode, the Sales Order combo will now load only sales orders for the current invoice customer.
		I1901294	Modified to ensure that when updating inventory for a document completes successfully, it's inventory updated flag is set before the SQL Transaction is committed. This will ensure that no document can be fully processed without the flag being set due to a connection failure.
		I1811235	Invoice enhanced to set VB6 Module lockout information on load. Invoice enhanced to allow for inventory allocation. The HasRackOrBin functions that are no longer necessary have been removed from the form libraries. The logic that det
		I1901091	Merged the incomplete invoice detail lines message with the approval message.
		I1810166	Further improved performance for loading existing invoices.
		I1901251	Ensured that the system is passing the correct variable to the GetItemTrackType function.

ItemEditor.dll

6.4.129	03/06/2019	I1809141	Modified to no longer round the quantity values with adding or editing a BOM component.
---------	------------	----------	---

Technical Release Notes

February 2019

JobCosting.dll

6.4.78	03/06/2019	I1901022	<p>The Bid List grid's "Account" column width has been increased. When adding a new line, the focus will be set to the new line account type cell.</p> <p>The "Accept" button on the Bid List tab will now attempt to save the transaction when the transaction is in a modified state.</p> <p>The "Accept" button will now warn the user and will not continue if there is no "accepted" bid.</p> <p>When creating a new estimate from the Bid List grid, the system will attempt to save when the form is in a modified state.</p> <p>The Opportunities transaction will now be appended to bid estimate transaction that has been "accepted".</p>
		I1810002	<p>The Opportunity Details spread will no longer attempt to reload related data every time the Opportunity Details tab lose and regain focus.</p>
		I1809181	<p>A new validation has been added to ensure that user cannot save when there is a changed to the account where there are existing contract or change order transactions.</p>
		I1902063	<p>For progress billing, in cases where estimate or sales order documents cannot be created, a message has been added to state why.</p>

MYOB.AccountRight.SDK.dll

6.4.2	02/27/2019	I1902159	<p>Updated to latest version from MYOB to eliminate a connectivity issue with recent versions of AccountRight.</p>
-------	------------	----------	--

POInvoice.dll

6.4.102	03/06/2019	I1903030	<p>Corrected issue related to the Scanned Document button not resizing correctly.</p>
---------	------------	----------	---

PurchaseOrder.dll

6.4.123	03/06/2019	I1811001	<p>The purchase order form can now be setup to prevent deletion through secured controls.</p>
---------	------------	----------	---

SalesOrder.dll

6.4.195	02/13/2019	I1901315	<p>Modified to ensure that multiple Customer Codes for a Customer/Item combination does not cause any duplication of lines in the transaction.</p>
6.4.196	03/06/2019	I1901114	<p>Rephrase some of the customer po number validation captions.</p>
		I1812052	<p>Selecting the "No" option for the prompt to change sales rep will now not continue with the changes.</p>
		I1803043	<p>Enhanced to launch, create, and modify package distribution information.</p>
		I1812200	<p>Modified to reduce locking effects with Inventory.</p>
		I1902029	<p>The discount percent will now be loaded with ten decimal places when selecting a line item.</p>

Seradex OrderStream

Technical Release Notes

February 2019

Seradex.Accounting.MYOBLink.dll

6.4.6 02/27/2019 I1902159 Modified to reference the newest MYOB SDK library to eliminate a connectivity issue.

Seradex.ComComponents.dll

6.4.42 03/06/2019 I1803043 Added additional inventory allocation functionality.

Seradex.CommonServices.dll

6.4.45 03/06/2019 I1902026 Document Scanning functionality has been added.
I1803043 Added PackagingDistribution Module activation.

Seradex.Connection.dll

6.4.37 03/06/2019 I1901262 Resolved an issue where the master database connection could be destroyed and cause errors by opening certain .NET forms.

Seradex.EstimateSystem.dll

6.4.1 03/06/2019 I1902170 .NET Estimate and SalesOrder have been enhanced to handle loading query changes from VB6 more robustly.

Seradex.Infragistics.dll

6.4.31 03/06/2019 I1803043 Added enhancements to controls
I1901081 Data validation has been enhanced to allow use of VB6 spread cell aliases for .NET Ultracombo cell keys. This has been set up for SpecID/ItemSpecID and Comments/Comment, for .NET to VB6 respectively. This will need to be worked through for all .NET forms and will require another ticket.
Additionally, Data Validation has been enhanced to prevent minor problems with boolean fields being misrepresented as true.
I1806259 Added a new grid formatting to support date time using the 24 hour format.

Seradex.InvoiceSystem.dll

6.4.3 03/06/2019 I1902067 Added logic to support .NET Credit All function.
I1901089 Added the ability to track multi-shipment mode.
I1811235 Added Container Management menu option.
 .Net Invoice enhanced to set VB6 Module lockout information on load.
 .NET Invoice enhanced to allow for inventory allocation.
I1811184 The "Qty On SO" will now display correctly in .NET Invoice.

Seradex OrderStream

Technical Release Notes

February 2019

Seradex.OrderEntryLibrary.dll

6.4.4	03/06/2019	I1901075	Enhanced .NET Excel closure to confirm all workbooks are closed and the excel application is out of memory on module exit.
		I1803043	Added internal library functions.

Seradex.Production.WorkOrder.dll

6.4.14	03/06/2019	I1810296	The process of transferring materials to a work order will now prevent transfer in the scenario where a line was completed through another process before this function was called.
--------	------------	----------	---

Seradex.RestApi.dll

6.4.14	02/04/2019	I1901073	Fixed an issue where changing the List Price would not updated the Extended Price in DBOX.
		I1902013	Fixed an issue with DBOX where the Extended Price would always be rounded to zero decimal places.

Seradex.SalesOrderSystem.dll

6.4.2	03/06/2019	I1901114	Customer PO validation has been added.
		I1803043	Enhanced to manage the packing distribution information during save and load operations.
		I1902170	.NET Estimate and SalesOrder have been enhanced to handle loading query changes from VB6 more robustly.

Seradex.Search.dll

6.4.75	03/06/2019	I1902119	Improved compatibility with SQL-2017.
--------	------------	----------	---------------------------------------

Seradex.Shipping.dll

6.4.3	03/06/2019	I1902294	The quantity to stock will now be updated when the "Ship All" tools menu gets executed.
		I1811235	NET Enhanced to use container functionality. Shipping enhanced to handle the case where its connection is prematurely destroyed. The logic that determines when forms can enter inventory allocation has been updated in .NET to conform with VB6 changes.

Seradex.Win.Controls.dll

6.4.7	03/06/2019	I1903032	Added Document Storage tab and functionality. Additionally, Resolved issue where Document storage does not save correctly when simultaneously saving a new order.
-------	------------	----------	---

Seradex OrderStream

Technical Release Notes

February 2019

6.4.7 03/06/2019 I1901080

The Document Storage tab has been recreated in .NET and added to .NET Purchase Order.

Seradex.Win.DeliverySchedule.dll

6.4.22 03/06/2019 I1901246

Corrected issue when there is no default days setup for the shipping module, the system will not load Delivery Schedule module correctly.

Seradex.Win.Estimate.dll

6.4.5 03/06/2019 I1808216

The Costing Info tab has been updated to break down costs by estimate line. Enhanced Estimate in .NET to prevent modifying approved or readonly Estimates through Config, Item Editor, Item taxes, or reload item defaults. The ShipTo information will now be updated correctly.

I1901076

I1902293

Seradex.Win.Invoice.dll

6.4.16 03/06/2019 I1811184

The "Qty On SO" will now display correctly in .NET Invoice.

I1811235

Added Container Management menu option.

.Net Invoice enhanced to set VB6 Module lockout information on load.

.NET Invoice enhanced to allow for inventory allocation.

I1902067

Added logic to support .NET Credit All function.

I1901089

Added the ability to select multiple sales orders/shipments for one invoice.

I1901086

Corrected issue where key down will cause an error if no document has been selected.

I1901087

Added logic to handle errors that occurred when opening and closing the .Net form extremely fast.

I1901091

Added logic to valid incomplete invoice detail lines and merged the message together with the approval message.

Seradex.Win.OrderEntryFormLibrary.dll

6.4.0 03/06/2019 I1803043

Created the Package Distribution form. This form is intended to be used to allow inventory on a single detail to be distributed to multiple Ship To locations.

Seradex.Win.Production.dll

6.4.2 03/06/2019 I1809141

Modified to display all Inventory and BOM quantities using the number of decimal places specified for Inventory.

Seradex.Win.Purchasing.dll

6.4.22 03/06/2019 I1903032

Added Document Storage tab and functionality. Additionally, Resolved issue where Document storage does not save correctly when simultaneously saving a new order.

Seradex OrderStream

Technical Release Notes

February 2019
