

Seradex OrderStream

Technical Release Notes

March 2018

ActiveM20.dll

6.4.113 04/04/2018 I1708043 When the Inventory Allocation form is launched from Inventory Transfer, the system will now auto-populate the New Rack/Bin with the To Rack/Bin specified on the transfer line.

The New Rack/Bin validation has been modified to use the new spread message box dialog.

ClientReports.dll

6.4.69 04/03/2018 I1801038 Modified to eliminate potential issues with PrinterNames containing symbols such as "&". Previously an error message would be displayed when attempting to print due to the system saving the chosen printer as the user's default printer for this report. Note that this did not prevent printing from succeeding.

Config_3D.dll

6.4.9 04/03/2018 I1801207 Corrected the title and button text for the "Select a Product Line" form

Database Setup Wave 1.xlsm

6.4.1 04/03/2018 I1709045 Removed the 'Items - Vendor UOMs Order vs Invoice' check, and removed the mandatory asterisk from the Vendor Item Number field on the 'Purchased Items' sheet.

DataTransfer.exe

6.4.35 04/02/2018 I1803073 Corrected issue running data transfer on a blank SQL database to generate a new system database

DataTransfer.mdb

6.4.217 04/02/2018 I1802075 Discount Percent localization value for the Sell Items page added.
I1801163 Corrected two queries for the ExceptionCheck which were invalid: "Unallocated Stock Items on Hand > Reorder Level + Reorder Qty" and "Work Order - Open SubContracts for Completed Work Order Lines"
I1802149 Updated the "Usage History" report's query to ensure that it only retrieves the data consumed by work orders for the "Yearly WO Usage" column.
I1708043 The Rack and Bin field have been added to the ItemReorderDetail table. The ToRack and ToBin field have been added to the ItemsTransferDetails table
I1802250 Changed the Integrity Check's system filtering from Dbox to DboxBase and AxisOrderEntry to DboxOrderEntry.
I1802094 Alter BudgetKPI Table to change amounts to float, add KPI Type and KPI Unit
I1803041 DateCreated has been added to the core Account Search.

Technical Release Notes

March 2018

6.4.217	04/02/2018	I1803073	Corrected issue running data transfer on a blank SQL database to generate a new system database
6.4.218	04/02/2018	I1804010	Rebuild of Datatransfer.mdb to resolve compatibility issue.

DayEndProc.dll

6.4.132	04/04/2018	I1802161	Corrected issue with situations on receiving batches where the amount of inventory affected is not the same as the related AP accrual
---------	------------	----------	---

DBox Web Front End Components (WFE)

6.4.5	04/03/2018	I1802075	Base Price and Discount Percent have been added to the "Add Sell Items" form as editable fields.
		I1802219	Added a default currency symbol as a global option for each client.
		I1803183	CRM Dashboard Pipeline no longer flows outside the bounds of the container on Firefox.
		I1801239	Modified the account/contact selectors on each form to be form specific (no logic shared between forms). Also made the account/contact selectors able to be pre-filled with data (clicking create Opportunity from the Account page, for example, will fill in the Selected Account).
		I1803181	Fixed some display issues with the dropdowns/autocomplete controls on the Configurator.
		I1803076	The Search List page has been modified to remove the Circular FAB buttons at the bottom of the page and make it more in-line with the grids on the rest of the site (like CRM List etc.) You can now show/hide columns using the little purple icon above the grid (there's a tooltip) instead of through the individual columns.
		I1803207	Child configurations were not displaying warning alerts when the configuration had both Critical and Warning alerts upon save.
		I1803201	Dynamic Display/Hiding of properties on the Configurator is fixed.

ExcelBOMImport.exe

6.4.12	04/04/2018	I1712250	An adjustment has been made to ensure that the inventory tracking type is valid when importing.
--------	------------	----------	---

InventoryTransfer.dll

6.4.82	04/04/2018	I1802226	Validation has been added to ensure that inventory transfers cannot be approved when there is invalid detail owner information.
		I1708043	Transfer detail line will default the ToRack and ToBin using the transfer detail lines item specified Rack/Bin or the Rack/Bin specified in the Facility Info tab of the item master against the item transfer document destination location when the application preference "Default the Transfer Line To Rack & Bin from Item" is checked.

Invoice.dll

Seradex OrderStream

Technical Release Notes

March 2018

6.4.133	04/03/2018	I1803072	Corrected an issue where the system is not cleaning up record set correctly.
		I1803083	Correction was made to ensure that creating invoices via the Invoice form will add deposit invoice when using Orderstream financial.
		I1803218	Corrected issue where the invoice document will not append partial invoiced non-shippable items if the "Drop Shipment" module activation is on.

ItemEditor.dll

6.4.120	04/04/2018	I1708043	Two new columns called Rack and Bin have been added to the Item's Facility Info Tab.
---------	------------	----------	--

JobCosting.dll

6.4.69	04/03/2018	I1802189	The Help caption for the Job Costing/Opportunities form will dynamically change based on the mode that the form is in.
--------	------------	----------	--

POInvoice.dll

6.4.94	04/03/2018	I1802244	Corrected issue where vendor invoices with negative subtotals but positive tax that caused the grand total to be positive were being marked as debit notes.
--------	------------	----------	---

PunchClock.exe

6.4.2	04/03/2018	I1801035	The PunchClock application will now launch the Login Form.
-------	------------	----------	--

PurchaseOrder.dll

6.4.113	03/23/2018	I1803186	Correction has been made ensuring that the system will populate the work order line combo on the detail line when associating a work order document.
---------	------------	----------	--

Receiving.dll

6.4.118	04/03/2018	I1803160	When there is no WIP location marked as a Material location, the system will now correctly generate receiving details for subcontract items when selecting the PO within the Receiving module.
		I1802097	Correction has been made ensuring that the QtyToStock field is populated when creating an RMA receiving document from Service Order module.
		I1602136	Modified to improve Receiving's update inventory process in a multi-user environment. This new process will better handle: <ul style="list-style-type: none">• depleting negative inventory.• connections failures to the ActiveM SQL database. It will allow the user to retry the completion process after a connection failure. It will not leave partially processed receipt lines that cannot be fully received when the connection is lost.• sql deadlocks occurrences have been reduced. Note that a deadlock occurs when two or more tasks permanently block each other by each task having a lock on a resource which the other tasks are trying to lock.

Seradex OrderStream

Technical Release Notes

March 2018

6.4.118 04/03/2018 I1708043 When generating receiving documents via manual generation or against a purchase order in the Receiving form or through Purchase Order, the system will now default the rack and bin against the location of the item using the item specified Rack/Bin or the Rack/Bin specified in the Facility Info tab of the item master.

RptDataCollection.dll

6.4.65 04/03/2018 I1803180 Corrected issue with the Completed Work Order Variance reports, both detail and summary when running for work orders that have the consolidated details.

Seradex.Common.EDISystem.dll

6.4.12 04/03/2018 I1803023 Adjusted the logic to ensure that the EDI translator path will look in program files (x86) if the machine is running on a x64 operation system.

Seradex.Dbox.dll

6.4.6 04/03/2018 I1802075 DiscountPercent has been added for Sell Items.
I1803185 Corrected creation of additional child configurations
I1803159 Parent child configuration alerts are now handled properly in the API.

Seradex.Library.dll

6.4.3 04/03/2018 I1709065 Updated to support additional objects in the ActiveM.

Seradex.Production.DataCollection.dll

6.4.36 04/03/2018 I1802167 The shop floor execution reports on events setup validation has been restored.

Seradex.Production.PunchClock.dll

6.4.11 04/03/2018 I1801035 Updated the Target Framework to .Net Framework 4.5.2.
Updated to handle all database connection scenarios.

Seradex.Production.Scheduling.dll

6.4.67 04/04/2018 I1803237 Updated to ensure if quantity change does not cause a significant change in the time required, it is still applied to the live schedule.

Seradex.Win.Purchasing.dll

6.4.15 04/03/2018 I1802134 Custom column positions from MRP by Location are now saved under the LocationMRP name.

Seradex OrderStream

Technical Release Notes

March 2018

Seradex.Win.Search.dll

6.4.64 04/03/2018 I1801122 The module activation of CRM will now be loaded when using searches from the dashboard.

ServiceOrder.dll

6.4.66 04/03/2018 I1803044 Adjusted the logic to ensure that the service type will save correctly.
I1604063 Adjusted the Service Item Search SQL statement to return top 10,000 rows when there are no specify filtering criteria.

sxEDIBridge.dll

6.4.43 04/03/2018 I1803200 Corrected issue with Connection not persisting during use in custom applications.

sxMaintenanceControls.ocx

6.4.13 04/04/2018 I1708043 A new application preference called "Default the Transfer Line To Rack & Bin from Item" has been added.

sxWorkflow.ocx

6.4.18 04/03/2018 I1802119 Removed the logical check that a workflow comment had to have length greater than zero before it could be saved.

WGenerator.dll

6.4.30 04/03/2018 I1802230 Adjusted the logic to ensure that work order generation will now check for pre-existing work order for the include lines.

WorkOrder.dll

6.4.160 04/04/2018 I1801236 Added the ability to log the user's action when prompted with the insufficient quantity validation message during the work order completion process when applicable.
I1708043 When generating work order using the Work Order's Make Stock MRP Form tools menu, the system will default the work order line item rack and bin using the item specified Rack/Bin or the Rack/Bin specified in the Facility Info tab of the item master against the line item location.

Work Order Transfer Material Tools menu will default the ToRack and ToBin of the item transfer detail lines in the generated item transfer document using the transfer detail lines item specified Rack/Bin or the Rack/Bin specified in the Facility Info tab of the item master against the item transfer document destination location when the application preference "Default the Transfer Line To Rack & Bin from Item" is checked.

Seradex OrderStream

Technical Release Notes

March 2018

6.4.160	04/04/2018	I1802208	Adjustments were made to ensure that the quantity for lot/serial finished good is kept in synch with the work order line quantity after a connection failure had happened for clients using the advanced work order lot/serial functionality.
		I1711114	Modified the work order completion to display the number of lines processed versus the total selected, and also when scanning instead of displaying warning messages it will now display notifications in red colour in the footer section of the interface with an alert sound.
