

Seradex OrderStream

Technical Release Notes

October 2018

AcctMaintenance.dll

6.4.102	10/26/2018	I1712206	Corrected logic involved with saving a new record in the BillTo matrix. Also modified the validation to only report the first invalid record, as well as indicate which row was the problem.
		I1810143	When using Seradex Financials, messages stating an account is not in your accounting system can no longer appear.

ActiveM20.dll

6.4.115	10/26/2018	I1712057	The inventory allocation form will now display a summary of inventory records instead of each individual record.
		I1809199	The Harmonization Codes combo in the Category Maintenance form is now sorted in alphabetical order.
		I1810069	Altered item running balance to handle material from an ASN receipt that has not been processed yet via Receive ASN inventory

AdminTools.dll

6.4.48	10/26/2018	I1807112	Updated to acquire and download release notes for DBOX components.
		I1810009	Modified web update to correctly handle file date/time based on the time zone for rar 5.x files.
		I1809183	Release Notes in Web Update will now display the correct list of changes when the current file is a pre-release file or an msi file.

AutoConfig.dll

6.4.103	10/01/2018	I1810014	Corrected an issue with web configured ItemSpecs where it could not properly handle property values with an apostrophe. It would return an error when attempting to process these configured line items.
6.4.104	10/26/2018	I1809261	Modified to allow reconfiguring non-regular product lines from the Reconfigure Tools menu option of the main Estimate and Sales Order screens.
		I1709024	Removed support for data in the ItemOpDetails table (Item mode labour schedule).

Config.dll

6.4.167	10/26/2018	I1709024	Removed support for data in the ItemOpDetails table (Item mode labour schedule).
		I1808081	Config will no longer try to process items to master when the items to master worksheet is empty.

CRM.dll

6.4.127	10/26/2018	I1809021	The ability to open Smart Finder has been removed from all modules.
		I1810143	When using Seradex Financials, messages stating an account is not in your accounting system can no longer appear.

Seradex OrderStream

Technical Release Notes

October 2018

DataTransfer.mdb

6.4.228	10/26/2018	I1809230	New view called sxAppPreferencesExpanded was added to support the new .net PO.
		I1810207	An issue where loading a line from Concurrent Item Lookup into Work Order would cause an error has been resolved.
		I1809021	The Smart Finder profile nodes have been removed.
		I1808293	Changed the existing Integrity Check "Calendar - Multiple definitions for one weekday in a Calendar" to Critical. Added a new Integrity Check "Calendar - Multiple definitions overlapping by date in a Calendar"
		I1809075	Routing and Revision fields have been added to the Inventory Valuation by GL search and its underlying view.
		I1809065	Added "Import Notes" as a new Transaction Type for comments relating to the import of data.
		I1810012	The sales commissions search has been updated to support launching invoices on double click.
		I1808179	Eliminated the "AR Entry No" field in the core Invoice Status search, and replaced it with the "AR Batch" field.
		I1805104	Added 3 new tables for the Ardis integration functionality. Also added a new profile for the Ardis Integration to the sxSystem database.

DayEndProc.dll

6.4.139	10/26/2018	I1808104	Corrected issue with Inventory posting amounts for AR Credit notes if you credit more than is returned to inventory and return to inventory is greater than zero.
---------	------------	----------	---

Estimating.dll

6.4.153	10/26/2018	I1809261	Modified to allow reconfiguring non-regular product lines from the Reconfigure Tools menu option of the main Estimate screen.
		I1810047	The systems currency symbol will now appear in cases where it is not the dollar sign.
		I1806106	The LeadTime field was truncated to 50 characters instead of 15, bringing it in line with the size of the database field.
		I1808188	Updated to ensure that Cost Override Qty is always in Stock UOM.
		I1809021	The ability to open Smart Finder has been removed from all modules.
		I1809245	Unprocessed, in process, or error processed lines from Quick Config Batch Mode and web will no longer be treated as non-config lines for the purposes of allowing approval, copying, etc in Sales Order, and Estimate.

InventoryAdjustment.dll

6.4.88	10/26/2018	I1809265	Altered adjustment to facilitate adjusting out a specific inventory record when using adjustment from external applications
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

October 2018

Invoice.dll			
6.4.146	10/31/2018	I1810047	The systems currency symbol will now appear in cases where it is not the dollar sign.
		I1809021	The ability to open Smart Finder has been removed from all modules.
		I1801008	Additional splitting of functionality for Invoice, to allow form independent functions to be called externally.
		I1810286	When deleting a saved invoice detail, ServiceOrder and POInvoice details will now be checked to ensure they do not have a reference to the detail being deleted.
		I1810166	Improved performance of loading existing invoices.
ItemEditor.dll			
6.4.126	10/26/2018	I1709024	Removed support for data in the ItemOpDetails table (Item mode labour schedule).
		I1808186	Corrected the logic to allow a new item to be chosen on the main Item Editor form once the Item Master form closes when creating a new item.
JobCosting.dll			
6.4.76	10/26/2018	I1810087	The change order grid will now be editable by default on approved jobs.
PurchaseOrder.dll			
6.4.119	10/26/2018	I1810017	The Total Weight field will now convert to a single unit if there exist UOM conversions between all weight units of all items on the PO.
		I1810047	The systems currency symbol will now appear in cases where it is not the dollar sign.
		I1809004	If the user selects a different vendor for the PO, then re-selects the original vendor, the address it loads will be the one associated with the vendor, and it will persist on save.
		I1809115	Modified to prevent pasting a block of cells into the grid. All paste actions are now forced to occur inside a cell (in edit mode).
		I1809021	The ability to open Smart Finder has been removed from all modules.
Receiving.dll			
6.4.130	10/26/2018	I1809021	The ability to open Smart Finder has been removed from all modules.
		I1809115	Modified to prevent pasting a block of cells into the grid. All paste actions are now forced to occur inside a cell (in edit mode).
		I1803208	The Sales Order combo in the details spread will now filter appropriately
		I1809146	The vendor return approval validation has been updated to better account for inventory allocated to the receiving document's target.
6.4.131	11/01/2018	I1810324	An issue where Receiving was unable to load from searches or other modules has been resolved.

RptDataCollection.dll

Seradex OrderStream

Technical Release Notes

October 2018

6.4.69	10/04/2018	I1810048	Modified to correct a syntax problem in one of the dynamic queries of the new cost variance calculation logic that runs upon work order completion. This is only an issue for consolidated work orders.
SalesOrder.dll			
6.4.190	10/26/2018	I1810047	The systems currency symbol will now appear in cases where it is not the dollar sign.
		I1809261	Modified to allow reconfiguring non-regular product lines from the Reconfigure Tools menu option of the main Sales Order screen.
		I1809079	Corrected a problem in the logic that adjust the total serial quantity for serial finished goods to match the quantity on the work order line or sales order line when the quantity on the line has been diminished. This only affects clients that are using the advanced work order lot/serial functionality for finished goods.
		I1809245	Unprocessed, in process, or error processed lines from Quick Config Batch Mode and web will no longer be treated as non-config lines for the purposes of allowing approval, copying, etc in Sales Order, and Estimate.
		I1809226	The Drop Shipment flag can no longer be set for sales orders that are Stock Items with a Reorder Qty greater than 0.
		I1808188	Updated to ensure that Cost Override Qty is always in Stock UOM, and the Estimated Unit Cost calculation to ensure it always uses the Cost Override Qty.
		I1809021	The ability to open Smart Finder has been removed from all modules.
Seradex.Inventory.InventoryConverter.dll			
6.4.10	10/26/2018	I1808175	Removed an unnecessary filter condition on deletion to increase performance.
Seradex.MasterApi.dll			
6.4.3	10/26/2018	I1807112	Added the ability to fetch Release Notes for DBOX from the MasterAPI
Seradex.OrderEntry.Bases.dll			
6.4.14	10/26/2018	I1712174	The View > From menu item was added and enabled for the Delivery Schedule module. The dates of delivery schedule records can now be filtered by the number of days as set up in the Utilities > Application Preferences > Form Specific > Shipping Entry Date Filter.
Seradex.OrderEntry.dll			
6.4.13	10/26/2018	I1712174	The View > From menu item was added and enabled for the Delivery Schedule module. The dates of delivery schedule records can now be filtered by the number of days as set up in the Utilities > Application Preferences > Form Specific > Shipping Entry Date Filter.
