Seradex OrderStream

Technical Release Notes

September 2014

6.4.1 10/02/2014 I1409205

Improved the error message displayed when translating the date and time values specified in the file.

Enhanced to support multiple possible ID values for the primary ID of a segment.

Seradex.Financials.FinancialsSystem.dll

6.4.57 09/30/2014 I1312012

Allowed setting of the Entry Date when creating GL Journal Entries.

I1409090

Added a function to determine if a date is in a valid Fiscal period.

I1409025

Corrected issue with currency revaluation if the account is exactly zero in functional yet still has a home balance

Seradex.Inventory.dll

6.4.13 10/02/2014 I1408070

The gathering query for the receipt has been adjusted to ensure that if the receipt employee id return a null value, the system will replace that null value with a zero.

Seradex.OrderEntry.SalesOrderEDI.dll

6.4.1 09/30/2014 I1409096

The Customer Combo is now loaded using the standard Customer Query so it respects the Customer Combo Setup Company Preference in the Sales Order section of the Form Specific tab. It also now respects the Inactive and EDI flags so if a customer is inactive or not marked as using EDI then they will not show in the list even if assigned to a format.

Seradex.Utilities.OrderImport.dll

6.4.5 10/03/2014 I1409031

The EDI Import tool will no longer load the default property values when importing Config orders.

Seradex.Win.Financials.dll

6.4.57 09/30/2014 I1406109

An adjustment has been made to Chart of Accounts Form ensuring that if you cannot delete the duplicate chart of accounts' records due to related information in the database. The system will still allow you to set the selected account to be inactive.

Seradex.Win.InventoryTransfer.dll

6.4.8 09/30/2014 I1407090

Transfers generated from the transfer generator now will be consolidated to one transfer when multiple inventory records are sent to the same location but different owner lines.

Seradex.Win.ShopFloorExecution.dll

Seradex OrderStream
