11709106 Lookup combo boxes will now open similarly to their Orderstream counterparts.
Improved appbox to handle closing gracefully in the cases where a module is forced to terminate unexpectedly.

Seradex.BaseSystem.dll

Seradex OrderStream

Technical Release Notes

September 2017

6.4.28 10/10/2017 I1704066

Support for automated purchasing has been added.

Seradex.ComComponents.dll

6.4.37 10/10/2017 I1704066

Support for automated purchasing has been added.

I1706139

Launch functionality for Delivery Schedule has been added.

I1611193

Modified to work with Barcode Shipping.

Seradex.CommonServices.dll

6.4.38 10/10/2017 I1611193

Modified to work with Barcode Shipping.

Seradex.Financials.FinancialsSystem.dll

6.4.88 10/10/2017 I1612107

Added support to customize the receive payment screen.

Seradex.Library.dll

6.4.1 10/10/2017 I1704066

Support for automated purchasing has been added.

Seradex.Production.Scheduling.dll

6.4.60 10/11/2017 I1710032

DBR Scheduling now limits new sub-workorders based on pre-existing parent work orders. The start date of the first operations are now compressed so they do not specify a date prior to today.

6.4.61 10/13/2017 I1710092

Updating the priority alone in Finite Scheduling will now always set the update state to allow the change to be sent to the live schedule.

Seradex.Purchasing.dll

6.4.4 10/10/2017 I1704066

Support for automated purchasing has been added.

Seradex.Search.dll

6.4.68 10/10/2017 I1706139

Delivery Schedule can now be selected as a module to launch from a search.

Seradex.Utilities.MicrovellumSystem.dll

6.4.13 09/29/2017 I1703136

Modified the Microvellum import to include the "MaterialCode" field from the Parts table for MV version 7.

I1709191

Modified to correct an error when connecting to the MS Access mdb database.

Technical Release Notes

September 2017

Seradex.Win.AppboxThemeConfigurator.dll

6.4.0 10/04/2017 11709025 Added the Appbox Theme Configurator. This form allows users to create and customize various themes for their Tiles.

Seradex.Win.AppboxThemeSelector.dll

6.4.0 10/04/2017 11709025 Added the Theme Selector. This form allows users to attach themes to their Appbox Profiles, Node Groups, and Nodes. It also allows users to set custom Application Nodes. It includes a link in the Tools menu to access the Theme Configurator.

Seradex.Win.DeliverySchedule.dll

6.4.16 10/10/2017 11706139 Added a new method in which Delivery Schedule can be launched. Modified calls to LoadModule to be inline with core behaviour.

Seradex.Win.Financials.dll

6.4.85 10/10/2017 11612107 Added support to customize the receive payment screen.
11705181 Corrected issue with delete and print buttons on the deposit screen being enabled in certain incorrect situations which could lead to errors if buttons are used

Seradex.Win.Purchasing.dll

6.4.11 09/22/2017 11704066 Support for automated purchasing has been added.
11709108 Appropriate Reorder values will now be shown in the Source Location combo in Transfer MRP.
The Source Location combo will now be sorted.

Seradex.Win.Reports.dll

6.4.4 10/10/2017 11704066 Support for automated purchasing has been added.

Seradex.Win.Scheduling.Finite.dll

6.4.13 10/13/2017 11710092 Updating the priority alone in Finite Scheduling will now always set the update state to allow the change to be sent to the live schedule.

Seradex.Win.Search.dll

6.4.59 10/10/2017 11706139 The Delivery Schedule module can now be launched from searches.
11708012 Adjusted the search tool strip resize toggle buttons to ensure that the setting save and load correctly.

Seradex OrderStream

Technical Release Notes

September 2017

Seradex.Win.Shipping.dll

6.4.0 10/10/2017 11611193 Initial release of Barcode Shipping

Seradex.Win.ShopFloorExecution.dll

6.4.38 10/10/2017 11609027 The complete work order form that appears after the last shop floor execution operation is complete will now alert users that it will complete all selected work orders when closing the form using the close button in the top right corner.
11708012 Adjusted the search tool strip resize toggle buttons to ensure that the setting save and load correctly.

6.4.39 10/13/2017 11609027 Corrected the recent change to the complete work order form that appears after the last shop floor execution operation is complete. It will now alert users that it will complete all selected work orders when closing the form using the close button in the top right corner.

ShipDetails.exe

6.4.19 10/02/2017 11702201 ShippingDetails.exe now supports sxSystem configurations.

ShipDetailsReportHandler.exe

6.4.1 10/02/2017 11702201 ShipDetailsReportHandler.exe now supports sxSystem configurations.

Shipping.dll

6.4.120 10/10/2017 11611193 Modified to work with Barcode Shipping; the save procedure was broken up into header, detail, and allocation procedures.

StdReports.dll

6.4.30 10/10/2017 11704066 Support for automated purchasing has been added.

sxEDIBridge.dll

6.4.38 10/11/2017 11710049 The EDI bridging utility has been updated to display the export path, prefix, and suffix, and to fall back to the EDIExportPath specified in CompanySetup and then to the local "ActiveERP\Templates" folder when the specified paths in the EDI setup and then CompanySetup are not valid. In addition, the error message has been updated to inform the user to check the EDI setup when an error occurs using that information.

11608241 Improved the outbound EDI override queries to allow them to be more dynamic.

sxMaintenanceControls.ocx

Seradex OrderStream

Technical Release Notes

September 2017

6.4.10	10/10/2017	11709127	Modified to disable the "Work Order Completion - Enforce full Inventory Allocation" and "Allow Multiple Inventory Transfer Generation from Work Order" application preferences when the "Alternate Item Processing" license is activated.
sxProfile.dll			
6.4.18	10/04/2017	11709025	Added a 'Theme Selector' menu option to the Tools menu of the Profile form. This new menu option will only be visible on sxSystem Configurations. It will open up the new Theme Selector utility.
sxRuntime.exe			
6.4.42	10/04/2017	11709106	Lookup combo boxes will now open similarly to their Orderstream counterparts. Improved appbox to handle closing gracefully in the cases where a module is forced to terminate unexpectedly.
		11704026	Added the Windows' DPI aware manifest.
		11710021	sxRuntime has been modified to no longer force Orderstream screens to use the newer version of the Microsoft Common controls. The default version no longer has the date display issue introduced with the Windows 10 "Creators Update".
sxTaxes.dll			
6.4.30	10/10/2017	11710031	Restored the Accpac Specific tax setup fields in the Accounting Match section of Tax groups
Tooling.dll			
6.4.22	10/10/2017	11705314	Rack or Bin entered with an apostrophe will no longer throw an exception when being validated and "Allow Specials For Rack and Bin" preference is enabled.
WorkOrder.dll			
6.4.149	10/10/2017	11703230	Make-Stock MRP can now generate new work orders per item, as well as per item Std Run Qty, via new Settings menu options.
		11709199	Modified to improve the speed of the work order completion process in batch mode when dealing with lot/serial work order lines. Also the lot/serial scanning process of the work order lines was modified to display a message when an invalid or an already scanned number is selected.
		11710002	Modified to ensure that the work order completion with the item replacement logic always pays attention to the evaporate flag on the work order completion form. Also when in backflushing mode the components will not be moved to the WIP location prior to consumption.
6.4.150	10/12/2017	11710053	Creating a transfer from work order has been altered to handle orders with over 200 lines.
