Technical Release Notes

September 2018

AcctMaintenance.dll

6.4.101	09/28/2018	I1805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		I1802038	Enhanced to add support for DBOX intercompany PO
		I1808272	A new EDI Account setup form was created to allow the user to select EDI Formats for a customer for each EDI transaction type.
		I1809086	The account lookup will now display the state/prov description if there is no code available.

AdminTools.dll

6.4.47	09/18/2018	I1809037	Updated to add support for the latest version (5.0) of rar compressed files in the Web Update process.
		I1806223	When using SxSwitcher, only the database indicated by the OverrideActiveMConnection element will have its license updated.

AutoConfig.dll

6.4.102	09/28/2018	I1804249	Modified to add the ActiveM database name to the temporary adtg file that is created for processing the batch.
---------	------------	----------	--

ClientReports.dll

6.4.75	09/28/2018	I1805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
--------	------------	----------	--

Config.dll

6.4.166	09/28/2018	I1804254	Modified to be able to call custom procedures from the cost Roll up routine in spec mode.
		I1808059	Corrected initial configurator data import range names detection. Corrected data version number logic to always allow data import when version number is 0 and import is enabled. Corrected address creation for dynamic user named ranges.

CreditNote.dll

6.4.115	09/28/2018	I1805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
---------	------------	----------	--

CRM.dll

Seradex OrderStream

Technical Release Notes

September 2018

6.4.126	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808272	The EDI Types button, visible when the EDI checkbox is checked, will now launch the new EDI Account Setup form.
		11808259	Inactive lead sources will now be filtered out of the Lead Management Lead Sources combo.
		11809045	Job costing documents within CRM's opportunities grid can now be launched by double clicking the cell.
		11809086	The account lookup will now display the state/prov description if there is no code available.

DataTransfer.mdb

6.4.227	09/28/2018	11802010	Added new field to receiving to be able to flag a receipt as being an ASN Receipt
		11806240	Added the new DBOX Config Settings field to the ConfigSettings table
		11801231	Added ChartDetails table and new ChartTypes to support Google Charts in DBOX
		11809088	Added a new secured control record to allow displaying the Change Orders tab in the JobCosting module.
		11802038	Added field to Vendors for DBOX intercompany PO
		11805262	New core search "Batch Invoice Approval" to control the batch invoice approval form, can be dupliated as a custom search called "Custom Batch Invoice Approval" to allow customization to the display of batch invoice approval.
		11808239	Modified the CERTIFICATE UpdateActiveM record to not attempt to apply if the user is not a "db_owner" of the database.
		11806014	Database tables have been added to store work order cost variance information.
		11808131	The Property Default History SQL has been modified to ensure that the system is gathering and displaying the correct Linked Property Defaults setup.

DayEndProc.dll

6.4.138	09/28/2018	11807066	Added new Accounting system option for QuickBooks and US called QuickBooks - 2014 US, this is to support the ability for the system to allow for taxes on AR documents that differs from the Customer Base tax.
---------	------------	----------	---

DBox Web Front End Components (WFE)

6.4.14	09/28/2018	11809030	Fixed an issue where if no value was ever selected on a Property that was allow custom and requires processing it wouldn't process.
		11809092	Fixed an issue where the values in a dropdown would not update after processing the configurator until the user clicked away from the control.
		11809095	Estimates that have a linked Sales Order had an issue where Estimate Details that weren't linked on the linked Sales Order would not be able to be deleted. This has been rectified.

Seradex OrderStream

Technical Release Notes

September 2018

6.4.14	09/28/2018	11806240	Added support for double-clicking in Text box and Combo Box properties to open up an expanded view of the available property values/text box entry. Can also click the magnifying glass/pencil icons beside the fields if the Display DBOX DrillDown Icons configurator setting is enabled.
		11809096	Items on the opportunity page will now properly get the default unit price from the ItemPrices table, then when an item is selected it will calculate the unit price based on the Price List if available. The price will now also carry over to the Estimate when clicking create estimate from the opportunity page.
		11807060	The Search grids will always show a horizontal scroll bar. Only the results grid will scroll vertically, everything else remains in place. Filters will scroll horizontally with the Grid.
		11801231	Dbox charting utilities have been enhanced to incorporate Google chart options.

DC2001.dll

6.4.48	09/28/2018	11809057	Added logic to govern the Payroll menu option in data collection by a license for "PayRoll"
--------	------------	----------	---

EngineeringChange.dll

6.4.19	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
--------	------------	----------	--

Estimating.dll

6.4.152	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808177	VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation.
		11805141	Modified to add a new menu option named "Import from Cabinet Vision" under the Tools menu for importing Cabinet Vision data. This menu option is only visible is the new license: "CabinetVision Import" is activated.

EventAlert.exe

6.4.17	09/28/2018	11806263	The execution time will no longer add to the next run time during processing.
--------	------------	----------	---

InventoryAdjustment.dll

6.4.87	09/28/2018	11808169	Validation messages will now be displayed in the following scenarios: blank Owner No and Owner Line No values when the owner type is specified, and rows with an owner type of Invoice or Shipping with an Adjustment quantity greater than 0.
		11803081	Validation of the fiscal period has been added when creating transaction from temp table.

Seradex OrderStream

Technical Release Notes

September 2018

6.4.87	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
InventoryTransfer.dll			
6.4.85	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
Invoice.dll			
6.4.145	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808177	VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation.
		11805260	Invoice batch import has been altered to support the ability to auto post to Financials from an external application.
		11805262	Altered invoice to ensure when calling invoice dll functions from external applications that logic governed by company preferences works as expected.
		11809061	Finance Charge will now set the minimum charge correctly and can now be auto send to Financials.
ItemEditor.dll			
6.4.125	09/28/2018	11809086	The item editor will now display the system's currency code for vendor costs instead of the dollar sign.
		11808202	Added the Generated column to the details spread and improved user communication.
		11804254	Modified to be able to call custom procedures from the cost Roll up routine.
		11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
JobCosting.dll			
6.4.75	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808160	The Change Order tab will now be hidden when JobControlBilling module activation is on. The WorkFlow, Document Storage, Milestones, and Activity Log tabs will now be editable for approved Job Costing transactions. The gathering of the Financial Summary data will now filter out all transactions that are not related to the Job Billing when JobControlBilling module activation is on.
		11809088	Additional Secured Control restrictions, visibile and enable, can now be applied to the SSTab control type.

Seradex OrderStream

Technical Release Notes

September 2018

MicrovellumImport.dll

6.4.20	09/28/2018	11805141	Added the capability to import Cabinet Vision data using the Microvellum import functionality.
		11808238	Microvellum Import will pass the ItemSpecID with the rest of the line's information to .NET modules. VB6 is not affected.

PdfSharp.Charting.dll

6.4.0	09/28/2018	11808138	Required file to allow use of the new document scanning module.
-------	------------	----------	---

PdfSharp.dll

6.4.0	09/28/2018	11808138	Required file to allow use of the new document scanning module.
-------	------------	----------	---

POInvoice.dll

6.4.98	09/28/2018	11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808138	The ability to launch the new document scanning module has been added.
		11808185	Ensured that when approving a PO Invoice that contains both receiving and vendor return transactions for the selected purchase order, the system will update the purchase order's Qty Invoiced to Date quantity correctly.

PurchaseOrder.dll

6.4.118	09/28/2018	11705315	Adjusted the system validation ensuring that the system will no longer allow saving on invalid selected items.
		11802038	Enhanced to add support for DBOX intercompany PO
		11805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
		11808177	VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation.
		11805262	Added support for a PO detail reason code for vendor revisions, will read Reason Codes assigned to the Purchasing Module

Receiving.dll

6.4.129	09/28/2018	11802010	ASN receipts no longer update the receipt being created with the owner ship of the receipt but instead use a new field in the receipt header called ASN Receipt.
		11808197	An issue where selecting an RMA or Miscellaneous receipt, and then Selecting a standard receipt would result in the standard receipt not fully loading, has been resolved.

Seradex OrderStream

Technical Release Notes

September 2018

6.4.129	09/28/2018	I1805144	The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml. Service orders will now be filtered out of the RMA combo if they have RMA numbers which are NULL or empty, rather than just if they are NULL. The ability to launch the new document scanning module has been added.
		I1808263	
		I1808138	
RptDataCollection.dll			
6.4.68	09/28/2018	I1806014	When a work order is complete, the cost variance will now be saved to the database.
RptManagement.dll			
6.4.25	09/28/2018	I1808243	For the General Ledger Account Listing report, the Account No field has been made narrower, and the Account Description has been made wider (and will be allowed to grow).
SalesOrder.dll			
6.4.189	09/28/2018	I1802038	Enhanced to add support for DBOX intercompany PO The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml. VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation. MatReq will only update the sales order detail lines that were affected. MatReq logging has been changed to create the log prior to prompting the user and update it with the response afterwards. Modified to add a new menu option named "Import from Cabinet Vision" under the Tools menu for importing Cabinet Vision data. This menu option is only visible is the new license: "CabinetVision Import" is activated.
		I1805144	
		I1808177	
		I1803244	
		I1608023	
		I1805141	
Saraff.Twain.dll			
6.4.0	09/28/2018	I1808138	Required file to allow use of the new document scanning module.
Seradex.AppBox.exe			
6.4.7	09/28/2018	I1802198	Removed unnecessary references to Access databases.
Seradex.AutomatedScanner.dll			
6.4.0	09/28/2018	I1808138	New module to allow the scanning of documents.

Seradex.ConfiguratorSystem.dll

Seradex OrderStream

Technical Release Notes

September 2018

6.4.7 09/28/2018 I1808051 Allow the property type to be specified on creation of a new Product Line Property object to ensure grid cell property types are initialized correctly when using Quick Config.

Seradex.Connection.dll

6.4.35 09/28/2018 I1805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.

Seradex.Dbox.Dashboarding.dll

6.4.1 09/28/2018 I1801231 Google Chart Editor has been implemented, functions to manage Chart data have been added to the API.

Seradex.Dbox.dll

6.4.15 09/28/2018 I1801231 Google Chart Editor has been implemented, functions to manage Chart data have been added to the API.

I1809148 The Config Image for the Config was not being created and added to the ItemSpec.

I1806240 Added support for the new ConfigSetting to display icons beside the properties on the configurator that can be drilled down/expanded.

I1806240 Additional property value columns beyond values and description now included for lookup in DBOX configurator.

I1809096 Items on the opportunity page will now properly get the default unit price from the ItemPrices table, then when an item is selected it will calculate the unit price based on the Price List if available. The price will now also carry over to the Estimate when clicking create estimate from the opportunity page.

I1809095 Copying a line item will append it to the end of the group that you are copying within.

I1808151 Parent ItemSpecID is now correctly written to the Input worksheet of the configurator workbook in DBOX for parent-child configurations.

I1808191 Modified DBOX update accounts to ensure that any data not supplied from the accounting system is left unchanged in the ActiveM. This applies to the updating of Customers and Vendors. Note that all text fields except for the following list will be updated to a blank value if a blank value is supplied by the accounting system. (RegistrationNo, TaxRegNo1, TaxRegNo2, TaxRegNo3, TaxRegNo4, TaxRegNo5, Notes)

I1802038 Enhanced to add support for DBOX intercompany PO

I1808259 DBOX will now filter inactive lead sources out of the lead sources lists.

Seradex.Dbox.Import.dll

6.4.0 09/28/2018 I1802038 Enhanced to add support for DBOX intercompany PO

Seradex.Financials.FinancialsSystem.dll

Seradex OrderStream

Technical Release Notes

September 2018

6.4.96	09/28/2018	11808225	Improved messages displayed to the user when using the Online Banking order import functionality.
		11805260	Added a function to apply available credit to a single invoice for use from external applications
		11808288	For Customer deposits that have multiple lines for the same customer, ensure the related Bank transaction Memo only states the customer name once.
		11809061	Finance Charge will now set the minimum charge correctly and can now be auto send to Financials.
		11806162	Increased timeout of the function that updates Customer balances to reduce potential data integrity issues.
		11808217	Altered deposit import to fail if a valid customer is specified as well as a valid invoice yet the customer specified is not a customer that can pay that invoice.

Seradex.OrderEntry.SalesOrderEDI.dll

6.4.15	09/28/2018	11802038	Enhanced to add support for DBOX intercompany PO
--------	------------	----------	--

Seradex.Production.DataCollection.dll

6.4.41	09/28/2018	11809064	Corrected issue for clients using Scheduling and use the Pct Complete of zero feature on the structure to allow working on any operation, the system was treating the first operation as the final operation.
		11801156	Modified Shop Floor Execution to ensure that subsequent operations are not visible when a starting operation has not been completed and is being handled by another employee when multiple employees are not allowed to work on a single operation, or that operation is set to start in the future.

Seradex.Production.Scheduling.dll

6.4.70	09/28/2018	11712123	Updated DBR, Finite, and Hybrid Scheduling to display a more informative date format for the Day Column (It is changed from "Monday 17" to "Mon Sep 17, 2018"), and to display a full date in the chart.
		11808173	Modified to log any error that occurs when executing a query in the Error Log table.

Seradex.Purchasing.ReceivingSystem.dll

6.4.9	09/28/2018	11802010	ASN receipts no longer update the receipt being created with the owner ship of the receipt but instead use a new field in the receipt header called ASN Receipt.
-------	------------	----------	--

Seradex.RecurringTransaction.dll

6.4.13	09/28/2018	11809098	Corrected issue with the Job control billing module whereby billing for just retention reclamation did not function as expected.
--------	------------	----------	--

Seradex OrderStream

Technical Release Notes

September 2018

Seradex.RestApi.dll

6.4.10	09/28/2018	11809096	Items on the opportunity page will now properly get the default unit price from the ItemPrices table, then when an item is selected it will calculate the unit price based on the Price List if available. The price will now also carry over to the Estimate when clicking create estimate from the opportunity page.
		11801231	Google Chart Editor has been implemented, functions to manage Chart data have been added to the API.
		11802038	Enhanced to add support for DBOX intercompany PO

Seradex.Search.dll

6.4.74	09/28/2018	11805262	Altered Search control to facilitate use for searches that interact with temp tables and allow saving to the database
--------	------------	----------	---

Seradex.Utilities.AvawareSystem.dll

6.4.4	09/28/2018	11803244	Enhanced Avaware Import to now save and create / update Estimate based on the import db file.
-------	------------	----------	---

Seradex.Utilities.MicrovellumSystem.dll

6.4.14	09/28/2018	11805141	Added the capability to import Cabinet Vision data using the Microvellum import functionality.
--------	------------	----------	--

Seradex.Win.AvawareImport.dll

6.4.3	09/28/2018	11803244	Enhanced Avaware Import to now save and create / update Estimate based on the import db file.
-------	------------	----------	---

Seradex.Win.Financials.dll

6.4.94	09/28/2018	11809061	Finance Charge will now set the minimum charge correctly and can now be auto send to Financials.
--------	------------	----------	--

Seradex.Win.Invoice.dll

6.4.10	09/28/2018	11805262	Update Invoice batch Approval to work off of a core search "Batch Invoice Approval", can be overridden via a custom search called "Custom Batch Invoice Approval"
--------	------------	----------	---

Seradex.Win.QuickConfigurator.dll

6.4.16	09/28/2018	11808051	Ensure the property types of the grid cell Product Line Properties are correctly initialized.
--------	------------	----------	---

Seradex OrderStream

Technical Release Notes

September 2018

Seradex.Win.Receiving.dll

6.4.16 09/28/2018 I1802010 ASN receipts no longer update the receipt being created with the ownership of the receipt but instead use a new field in the receipt header called ASN Receipt.

Seradex.Win.Scheduling.Finite.dll

6.4.20 09/28/2018 I1808144 Added a Gantt chart to the Finite Scheduling module.
I1712123 Updated DBR, Finite, and Hybrid Scheduling to display a more informative date format for the Day Column (It is changed from "Monday 17" to "Mon Sep 17, 2018"), and to display a full date in the chart.

Seradex.Win.Search.dll

6.4.69 09/28/2018 I1805262 Altered Search control to facilitate use for searches that interact with temp tables and allow saving to the database

Seradex.Win.Telerik.dll

6.4.11 09/28/2018 I1808144 Created a Gantt control using the Telerik GanttView control.

ServiceOrder.dll

6.4.67 09/28/2018 I1805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.

Shipping.dll

6.4.136 09/28/2018 I1805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
I1808177 VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation.
I1809098 When generating an invoice from a shipment, the check for deposit invoices did not take into account Job based Deposits
I1809027 Corrected issue with tracked, non make, non stock sell items allocated to the sales order when the amount relieved from inventory for shipping exceeded the amount allocated to the sales order.

StdReports.dll

6.4.35 09/28/2018 I1805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.

Seradex OrderStream

Technical Release Notes

September 2018

SubContracting.dll

6.4.55 09/28/2018 I1805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.

sxControls.ocx

6.4.39 09/28/2018 I1808143 Modified to ensure the Profile bar displays correctly when moved to the secondary monitor at startup if the primary screen is a 4K screen at 250% DPI and the secondary is a standard size, resolution, and DPI.

sxMaintenanceControls.ocx

6.4.17 09/28/2018 I1806240 A new control array for DBOX Configuration settings was added to the Application Settings > Configurator Settings tab

sxQuickBooks.dll

6.4.15 09/28/2018 I1807066 Added new Accounting system option for QuickBooks and US called QuickBooks - 2014 US, this is to support the ability for the system to allow for taxes on AR documents that differs from the Customer Base tax.

sxRuntime.mdb

6.4.46 09/28/2018 I1808271 Modified the UserMethods record to reflect the current class name.

sxUserDefineds.ocx

6.4.39 09/28/2018 I1809138 Stored date values in UDF transaction details will no longer have a 0 prepended to the day value when it is greater than 10.

Telerik.WinControls.dll

6.4.0 09/28/2018 I1808144 New Telerik dependency file required for the Gantt control.

Telerik.WinControls.UI.dll

6.4.0 09/28/2018 I1808144 New Telerik dependency file required for the Gantt control.

TelerikCommon.dll

6.4.0 09/28/2018 I1808144 New Telerik dependency file required for Telerik.WinControls and Telerik.WinControls.UI.

Seradex OrderStream

Technical Release Notes

September 2018

UnRAR.dll

6.4.0 09/18/2018 11809037 Updated to add support for the latest version (5.0) of rar compressed files in the Web Update process.

UpdateAcct.dll

6.4.71 09/28/2018 11807066 Added new Accounting system option for QuickBooks and US called QuickBooks - 2014 US, this is to support the ability for the system to allow for taxes on AR documents that differs from the Customer Base tax.

UWP Inventory Transfer_Adjustment ARM.zip

6.4.2 09/28/2018 11803081 Adjusted the logic ensuring that the system will no longer allow the user to approve inventory adjustment transaction when the fiscal period is locked.
11808087 Adjusted the logic, ensuring that the system is gathering the correct information when scanning from a barcode device. Enhanced the system to allow auto default inventory lookup check boxes option.
11809215 Now allow the customer to input the number of decimal places that the inventory item lookup quantity field can display.

UWP Inventory Transfer_Adjustment Window.zip

6.4.1 09/28/2018 11809215 Now allow the customer to input the number of decimal places that the inventory item lookup quantity field can display.
11808087 Adjusted the logic, ensuring that the system is gathering the correct information when scanning from a barcode device. Enhanced the system to allow auto default inventory lookup check boxes option.
11803081 Adjusted the logic ensuring that the system will no longer allow the user to approve inventory adjustment transaction when the fiscal period is locked.

WGenerator.dll

6.4.34 09/28/2018 11809127 With the 'Mat Req Processing for multiple WO lines to one Sales Order line' application preference enabled, the work order generator will again allow multiple work orders to be generated for a sales order.

WorkOrder.dll

6.4.170 09/28/2018 11809128 Corrected issue when deleting the only line on the work order.
11608023 MatReq logging has been changed to create the log prior to prompting the user and update it with the response afterwards.
11806014 When a work order is complete, the cost variance will now be saved to the database.
11805144 The connection routine will now look at the OverrideReports and the Databases.Reports field for the database indicated in the OverrideActiveMConnection element of SeradexMasterConfiguration.xml.
11808177 VB6 Orders now pass the Appbox Event Raiser through to .NET using the New Interface module activation.

Seradex OrderStream
