

Seradex OrderStream

Technical Release Notes

May 2016

AcctMaintenance.dll

6.4.83 05/06/2016 I1602210 The user defined control was renamed.

ActiveM20.dll

6.4.97 05/06/2016 I1602210 The user defined control was renamed.
I1506243 Item Running Balance will now look at the WO Override spec when gathering item data.
I1603004 The item running balance will now report sales order demand in the stock UOM.
I1505167 Added external access to the main inventory allocation function so that it can be called from other modules.

ActivityLog.ocx

6.4.5 05/06/2016 I1409158 Altered to support the new SQL Server based sxRuntime

AdminTools.dll

6.4.33 05/06/2016 I1409158 Altered to support the new SQL Server based sxRuntime

AutoConfig.dll

6.4.84 05/06/2016 I1603197 An adjustment has been made to ensure that auto processor only open the config excel files in read only mode.
I1603304 Improved performance if during the reconfigure process a subsequent line is a different product line yet uses the same sheet.

AutoUpdater.exe

6.4.27 05/06/2016 I1604133 AutoUpdater has been modified to handle a large number of files by splitting the file operation into smaller groups so it does not overflow the internal buffer in the Windows API. (This was not an issue in Windows XP and earlier OSes)
I1601192 AutoUpdater.exe now requires the installation of .NET Framework 4.5.2

ClientReports.dll

6.4.51 05/06/2016 I1604011 An adjustment has been made to support the usage of colon in the email data.

Config.dll

Seradex OrderStream

Technical Release Notes

May 2016

6.4.138	05/06/2016	I1603305	Modified to support nested query select statement for config lookup properties.
		I1601240	An adjustment has been made to the Items and Tools lookup SQL combo ensuring that the require fields ItemID/ToolID and ItemNo/ToolNo are in the SQL select statement as the first and second field.
		I1309172	Correction has been made to the configure logic ensuring that the system will disable all controls that are associated to a tab that is marked as invisible via the Product Line Security Maintenance.

CreditNote.dll

6.4.89	05/06/2016	I1603131	The sales rep on the invoice will now be transferred to the credit now when generating a credit note transaction from the Service Order module.
--------	------------	----------	---

CRM.dll

6.4.100	05/06/2016	I1603111	An adjustment has been made to the Customer Freight Vendor Details form ensuring that the Ship To field is displaying correctly. The Ship To Name, Freight Vendor Info, and Freight Acct No have been renamed.
		I1602183	Data Validation for the Customer and Prospect modules has been added to the CRM form.
		I1603226	The Contact combo box will now reload when adding new contact for selected account.
		I1603185	An adjustment has been made to the Accounts lookup to use the new search style lookup instead of the history style lookup.
		I1406076	Added a maintenance form to the EDI checkbox click event on CRM to add EDI Import and Export types.
		I1604160	When deleting a customer, the system will now check the JobSites table for the related customer, and prevent deletion if the customer exists in that table.

DataTransfer.exe

6.4.29	05/06/2016	I1604166	Added Support for synonyms which are linked tables on ActiveM to select Tables on the seradex system database.
		I1604252	Support running data transfer on a database where the only connection is via SQL authentication
		I1409158	Added ability to update the new Seradex system database with different data transfer data than the ActiveM, Supports selection of a purely blank database to create from scratch the new seradex system database.
		I1512182	DataTransfer updated to properly detect and report on system queries broken by data model changes or changes to other system queries. DataTransfer also now warns the user if attempting to downgrade the ActiveM to an older DataTransfer since that could cause issues.

DataTransfer.mdb

6.4.172	05/06/2016	I1409158	Added data transfer ability for the new seradex master sxSystem database.
---------	------------	----------	---

Seradex OrderStream

Technical Release Notes

May 2016

6.4.172	05/06/2016	I1602135	Latitude and Longitude fields have been added to the Cities database table. A CreateSQLStatement field has been added to the SearchBaseQuery database table.
		I1602255	A correction has been made to the Exception Check SQL query.
		I1602091-1	Added RetailUnitPrice, RetailDiscountAmt, RetailDiscountPct, RetailNetPrice, and RetailExtendedPrice to the SalesOrderDetails table.
		I1603109	Corrected issue with manual quick deposits that happen to affect the sales version of any Tax GL assigned to a tax vendor being omitted from the Tax return sales section
		I1506243	Added a new field to the Shop Floor Execution Base Search. BOMSpecID, to facilitate the new functionality of modifying SFE Transfers. Added new functions to gather workorder BOM based on overridden item specs. Added new view to easily gather the override spec for work orders.
		I1603052	Altered AR aging reports to exclude invoices that have the invoice date before the as of date yet the GL date after the as of Date
6.4.173	05/17/2016	I1604080	Modified to update the main queries for these two Data Collection reports: the "Labour Variance by Employee" and the "Labour Variance by Work Order" so that they can display negative data collection values as well.
6.4.172	05/06/2016	I1603308	Alteration to the view for rptCompanyHeader and rptCompanyHeaderSub to only select TOP 1 (first record) as it is has Order By ID clause
		I1505167	Added all required objects for the new Inventory Converter module. These are: the InventoryConversionOrder and InventoryConversionOrderDetails tables, the MaxLotQty field in the Items and ItemSpecs tables and a the new OwnerType= InventoryConversionOrder to the OwnerTypes table.
6.4.173	05/17/2016	I1511195	The item running balance report will now display production and consumption by scheduled work order, if available. Also, decreases in inventory will now appear before increases if they fall on the same date.
		I1605136	Improved system performance when working with item substitutions.
		I1605138	The sxWorkOrderOverrideSpec view has ben updated to run more efficiently on databases with a large number of work order lines.
		I1605092	Data model changes for DBOX
6.4.172	05/06/2016	I1508064	Added 'Receiving',22 to dbo.ServiceOrderTransactionTypes
		I1604037	Added core data transfer logic to support all required tables, views and core data values for Dbox/Axis Portal.
		I1511245	Updated ReportsSubReport.SubQuery field with new addition of 'status' field
		I1507114	A custom calendar based scheduling interface has been created for QTK, integrating with the finite scheduling system.
		I1603259	Corrected labels on the Integrity checks Financials - Journal Entries Missing Details and Financials - Journal Entries out of Balance
		I1511160	The fields for [Transaction Field] and [Transaction Module] have been changed from [ContactID] to [ContactName]
		I1512036	Search Links have been added to Account Status
		I1509016	A column of 'Tracking' has been appended to the Item Master search in the Inventory Adjustment Search.
		I1505254	UPC Code has been added to the Concurrent Item Lookup searches for the Estimate, Sales Order and Invoice modules.
		I1510265	Search updated for new Split functionality added to Finite Scheduling to allow a user to split an individual operation within a chain.

Seradex OrderStream

Technical Release Notes

May 2016

DC2001.dll

6.4.39 05/06/2016 I1602115 A new validation has been added to ensure that the system doesn't allow approval when there are records with start time but no associated finish time.

EngineeringChange.dll

6.4.13 05/06/2016 I1604039 Order by ItemNo for Item Change tab

Estimating.dll

6.4.121 05/06/2016 I1509225 Updated support for custom functionality.
I1505254 Menu added for Concurrent Item Lookup under Tools

InventoryAdjustment.dll

6.4.72 05/06/2016 I1505167 Added ability to adjust inventory pre-allocated to the new conversion order module. Also ensure that adjustments pay attention to the specific Inventory records when the InventoryItemID is specified.

InventoryTransfer.dll

6.4.67 05/06/2016 I1603278 An adjustment has been made to ensure that the system only update the QtyRequire to the default value of 1 when the temp table record contain a null value for the QtyRequire field.
I1603262 When transferring inventory to a new location for the same owner type, inventory transfer will now update or delete old lot serial inventory records.
I1505167 Added ability to deallocated inventory that has been pre-allocated to the new conversion order module.

Invoice.dll

6.4.109 05/06/2016 I1603262 When buy, non-stock inventory is transferred from sales order to shipping or invoicing on approval and multiple sales order lot serial inventory records exist for the same inventory item, negative inventory records will no longer be created.
I1604038 Correction has been made to the subscript out of range error.
I1601065 Minor UI correction to Details spread column 'GL Cost Variance Account' to extend width and prevent error.
I1603273 When an approved partial invoice exists, and the sales order quantity is adjusted, the sales order line status will now be calculated correctly.
I1604050 An adjustment has been made to Deposit Creation form ensure that changing the item, the system will default the GL account value to the selected item category.
I1505254 Menu added for Concurrent Item Lookup under Tools

Seradex OrderStream

Technical Release Notes

May 2016

6.4.109	05/06/2016	I1602222	Corrected issue if using the Financials feature of a different Sell rate than the Buy rate for the most recent rate change. Only affects creating invoices in the invoice module when the invoice date is not modified.
		I1603218	Rebuilt to ensure Discount Amount rounding calculation is correct.

ItemEditor.dll

6.4.101	05/06/2016	I1505167	Added a new field named "Max Lot Qty" to the Additional tab of the Item Main form to be able to enter the maximum lot capacity for lot make items. This is required by the new Conversion Order module.
---------	------------	----------	---

JobCosting.dll

6.4.56	05/06/2016	I1409158	Altered to support the new SQL Server based sxRuntime
--------	------------	----------	---

MatReq.dll

6.4.96	05/06/2016	I1603286	Components of miscellaneous WO lines can now be sent to MatReq from the MRP Lookup form.
		I1506243	MRP will now look at the WO Override spec to gather material to purchase, if required.

POInvoice.dll

6.4.81	05/06/2016	I1602211	If one selects a remittance vendor that happens to have a different default vendor account set than the originating PO/vendor ensure the vendor invoice is at least defaulted to show the remit to vendors account set.
		I1601031	The Packing Slip No field from the Receiving header has been added to the Vendor Invoicing Purchase Order grid.
		I1603005	Correction has been made to the header document storage ensuring that the system is saving the document ID against the CreatorHeaderID field instead of the CreatorID field.
		I1602057	Altered GLAccount behaviour by adding validation after typing in combo box in Misc tab. Will now look in populated combo for matching result.
		I1603257	Ensure for AP if the deposit item has taxes to use that tax group and to also ensure taxes are calculated before presenting to the user.

PurchaseOrder.dll

6.4.93	05/06/2016	I1603005	Correction has been made to the header document storage ensuring that the system is saving the document ID against the CreatorHeaderID field instead of the CreatorID field.
--------	------------	----------	--

Receiving.dll

Seradex OrderStream

Technical Release Notes

May 2016

6.4.99	05/06/2016	I1603005	Correction has been made to the header document storage ensuring that the system is saving the document ID against the CreatorHeaderID field instead of the CreatorID field.
		I1602210	The user defined control was renamed.
		I1508064	Now can generate receiving information from Service order and will prepopulate items to grid, customer, and RMA information.

RptOrderEntry.dll

6.4.35	05/06/2016	I1511245	Added Status to core report for Service Order
--------	------------	----------	---

SalesOrder.dll

6.4.154	05/06/2016	I1603273	When an approved partial invoice exists, and the sales order quantity is adjusted, the sales order line status will now be calculated correctly. When a sales order line becomes fully shipped or invoiced by updating the quantity, allocated inventory will now be deallocated.
		I1602224	Cancelled line order quantity changes now revert for both Qty and Priced Qty columns.
		I1602032	Altered the DeletionLog would write the Work Order deletion with the Sales Order before Work Order Details were deleted. This would cause it to not write to table when there were no longer work order details.
		I1509225	Updated support for custom functionality.
		I1602005	The sales order details grid now supports selecting between multiple routings of an item.
		I1505254	Menu added for Concurrent Item Lookup under Tools

Seradex.BaseSystem.dll

6.4.23	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.ComComponents.dll

6.4.30	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1506243	Added function calls to Spec Builder and WO via sxProxy.

Seradex.Common.EDISystem.dll

6.4.5	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.CommonServices.dll

6.4.30	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1506243	Added handling of the RequireSubWO Item flag to the .Net version of the Build Full Struc function.

Seradex OrderStream

Technical Release Notes

May 2016

Seradex.Connection.dll

6.4.22 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.DataCRMCampaigns.dll

6.4.9 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Email.dll

6.4.7 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Employee.dll

6.4.13 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Excel.dll

6.4.12 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Financials.FinancialsSystem.dll

6.4.73 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1603194 Corrected issue whereby deleting a batch or journal entry did not work as expected.
I1604034 Corrected date format for the TD banking export.
I1604214 Ensured voided cheques do not appear in the set reprint interface

Seradex.Infragistics.dll

6.4.19 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Inventory.dll

6.4.17 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1506243 Refactored functions to coincide with the new SFE transfer functionality.

Seradex.Inventory.InventoryConverter.dll

6.4.9 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1505167 Modified to add the necessary function and procedures required by the new Conversion Order module.

Seradex OrderStream

Technical Release Notes

May 2016

6.4.9	05/06/2016	I1505165	The Inventory Converter has been updated to further support custom applications.
		I1507216	Modified the update query when creating adjustments to correctly calculate Unit Costs when multiple users are running the functionality.

Seradex.Messaging.dll

6.4.4	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.OrderEntry.Bases.dll

6.4.10	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.OrderEntry.BillofLading.dll

6.4.4	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.OrderEntry.DeliverySchedule.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.OrderEntry.dll

6.4.10	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.OrderEntry.SalesOrderEDI.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1603325	Modified to eliminate an issue that caused the import routine to stop the import and display a message stating that the new ID already exists.

Seradex.ProductConfigurator.dll

6.4.3	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.Bases.dll

6.4.5	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.Calendar.dll

6.4.13	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex OrderStream

Technical Release Notes

May 2016

6.4.13	05/06/2016	I1602276	An adjustment has been made to the time validation ensuring that it's parsing out the date when comparing the time.
		I1603255	Logic was adjusted to ensure exception was saving on the right date.

Seradex.Production.DataCollection.dll

6.4.26	05/06/2016	I1510265	New Split functionality added to Shop Floor Execution to allow a user to split an individual operation within a chain.
		I1601193	Upgraded to .NET framework 4.5.2

Seradex.Production.dll

6.4.5	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.Maintenance.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.ProductionTracking.dll

6.4.15	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Production.PunchClock.dll

6.4.10	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Production.QualityAssurance.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.Rework.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Production.Scheduling.dll

6.4.45	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1507114	Modified to support custom calendar based scheduling interface integrating with the finite scheduling system.
		I1505157	Finite Scheduling has been modified to support dragging and dropping, or manually specifying the start date without time, in the summary tab to move the related operations.
		I1510265	New Split functionality added to Finite Scheduling to allow a user to split an individual operation within a chain.

Seradex OrderStream

Technical Release Notes

May 2016

6.4.45	05/06/2016	I1604042	Estimates are no longer included in the list passed to MatReq to be updated.
		I1605034	Modified to prevent two sql commands from timing out when running with a very large calendar range.

Seradex.Production.WorkFlowSystem.dll

6.4.9	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1507114	Added functionality for custom Work Flow integration with custom calendar based scheduling interface

Seradex.Production.WorkOrder.dll

6.4.5	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Purchasing.dll

6.4.2	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Purchasing.ReceivingSystem.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.RecurringTransaction.dll

6.4.9	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.ReportSystem.dll

6.4.1	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Search.dll

6.4.60	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1602146	Exporting search results to excel will now create a file with the following name format, SearchName_YearMonthDayHourMinuteSecond.xls.

Seradex.Security.dll

6.4.21	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Strings.dll

6.4.24	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex OrderStream

Technical Release Notes

May 2016

6.4.24 05/06/2016 I1506243 Added new App Preference, Allow Modifications to Transfer on Cell Start, for use in .Net projects.

Seradex.Utilities.CopyConfigurator.exe

6.4.1 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.GizaSystem.dll

6.4.5 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1603304 Corrected issue whereby Giza import did not return seradex derived prices/discounts from the relevant configurator sheet
I1511026 Added support for more than two option levels in an option group.

Seradex.Utilities.ImportAdapterInterface.dll

6.4.8 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.MailMergeSystem.dll

6.4.5 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.MicrovellumSystem.dll

6.4.9 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1604184 A validation procedure has been added that will allow the system to check the import utility expected fields against the current Routes table schema a particular MV7 version is using.

Seradex.Utilities.NonConformanceManagerSystem.d

6.4.14 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.OrderImport.dll

6.4.9 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.ProKitchenSystem.dll

6.4.1 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.QCPLauncher.exe

Seradex OrderStream

Technical Release Notes

May 2016

6.4.2 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Utilities.UserDefinedPropMaintSystem.dll

6.4.13 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.AccountMergePurge.dll

6.4.4 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.BillOfLading.dll

6.4.9 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.ConcurrentItemLookup.dll

6.4.1 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1505254 Custom scan of UPC Code which can add to calling form

Seradex.Win.Controls.dll

6.4.1 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.CRMCampaigns.dll

6.4.12 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.DeliverySchedule.dll

6.4.14 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2

Seradex.Win.Financials.dll

6.4.70 05/06/2016 I1601193 Upgraded to .NET framework 4.5.2
I1603217 If one voids AP without deleting the system did not hide the void button properly after the fact
I1601312 Prompt users on a void of AP if the system determines you can delete it if they wish to delete or just reverse.
I1603134 The Deposit Amount column in the Bank Deposits form will now only support 2 decimal places and only support numeric values.
I1604191 LockForm was always true instead of only when chkPosted=true which negated the SetChanged setting.
I1604189 Journal Entry copy from Search will now refresh the new entry. Set _currentEntry to 0 so it would not load original entry.

Seradex OrderStream

Technical Release Notes

May 2016

6.4.70	05/06/2016	I1602021	Added 2 date pickers for filtering grid results. Accessed by using 'Custom Range' selection of Days Within drop down list.
		I1601036	Corrected issue with Customer deposit, if one has a payment that is dated before all payable invoices and attempts to pay them, the system properly states one can not pay them. That leaves the system in a potential state to misstate AR Owing
		I1604270	Lock down the cheque number on the detail display in the print cheque form.

Seradex.Win.InventoryCosting.dll

6.4.1	05/06/2016	I1604188	Invoice item costing information will now be loaded regardless of whether the inventory was consumed directly by the invoice, or its related shipment.
		I1601193	Upgraded to .NET framework 4.5.2

Seradex.Win.InventoryTransfer.dll

6.4.9	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Win.Invoice.dll

6.4.7	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
-------	------------	----------	----------------------------------

Seradex.Win.MailMerge.dll

6.4.12	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Win.NonConformanceManager.dll

6.4.16	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Win.Production.dll

6.4.0	05/06/2016	I1505165	The production object has been updated to further support custom applications.
		I1505167	Created for the new Inventory Converter module. This new module allows the user to create a work order and automatically allocate to it the required line material that can also be specified during the work order lines creation process.

Seradex.Win.ProspectImport.dll

6.4.18	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
--------	------------	----------	----------------------------------

Seradex.Win.Purchasing.dll

6.4.5 05/06/2016 I1601193

Upgraded to .NET framework 4.5.2

Seradex.Win.QuickConfigurator.dll

6.4.6 05/06/2016 I1601193
I1509114

Upgraded to .NET framework 4.5.2
Existing lines that have not been modified will no longer be processed by Auto Config on click of the Process button.

Seradex.Win.Receiving.dll

6.4.13 05/06/2016 I1601193

Upgraded to .NET framework 4.5.2

Seradex.Win.RecurringTransaction.dll

6.4.13 05/06/2016 I1601193

Upgraded to .NET framework 4.5.2

Seradex.Win.Reports.dll

6.4.1 05/06/2016 I1601193

Upgraded to .NET framework 4.5.2

Seradex.Win.Scheduling.dll

6.4.29 05/06/2016 I1601193

Upgraded to .NET framework 4.5.2

Seradex.Win.Scheduling.Finite.dll

6.4.6 05/06/2016 I1601193
I1507114
I1505157
I1510265

Upgraded to .NET framework 4.5.2
Modified to support custom calendar based scheduling interface integrating with the finite scheduling system.
Finite Scheduling has been modified to support dragging and dropping, or manually specifying the start date without time, in the summary tab to move the related operations.
New Split functionality added to Finite Scheduling to allow a user to split an individual operation within a chain.

Seradex.Win.Search.dll

6.4.47 05/06/2016 I1505165
I1603078
I1602107
I1602146
I1509225

The search control has been updated to support further custom applications.
A new menu option to automatically resize row heights has been added. The column resize menu option no longer resizes rows.
The search email right click menu option will now function the same as double clicking an email in search.
Exporting search results to excel will now create a file with the following name format, SearchName_YearMonthDayHourMinuteSecond.xls.
Updated support for custom functionality.

Seradex OrderStream

Technical Release Notes

May 2016

6.4.47	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
Seradex.Win.ShopFloorExecution.dll			
6.4.30	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1506243	If the App Preference, Allow Modifications to Transfer on Cell Start, is checked, a new form will be displayed to allow modifications to items and quantities which are to be transferred.
Seradex.Win.Telerik.dll			
6.4.3	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
Seradex.Win.TimeAndAttendance.dll			
6.4.6	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
Seradex.Win.UIBases.dll			
6.4.19	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
Seradex.Win.UserDefinedPropertyMaintenance.dll			
6.4.20	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
Seradex.Win.WorkFlow.dll			
6.4.8	05/06/2016	I1601193	Upgraded to .NET framework 4.5.2
		I1507114	Added TaskData field to Work Flow setup
ServiceOrder.dll			
6.4.53	05/06/2016	I1602210	The user defined control was renamed.
		I1603131	The sales rep on the invoice will now be transferred to the credit now when generating a credit note transaction.
		I1603154	Modified to add error handling in the resize code to prevent invalid size calculations from causing the form to crash.
		I1508064	Can choose Receiving as a Service Order option and load appropriate receiving data to grid.
Shipping.dll			
6.4.106	05/06/2016	I1602126	An adjustment has been made to the non-shippable logic ensuring that the system include the discount percentage in the tax calculation.

6.4.106 05/06/2016 I1603262 When buy, non-stock inventory is transferred from sales order to shipping or invoicing on approval and multiple sales order lot serial inventory records exist for the same inventory item, negative inventory records will no longer be created.

SpecBuilder.dll

6.4.25 05/06/2016 I1505167 Modified to include the new MaxLotQty field in the spec creation functions.
 I1506243 Added public access to additional Item Spec creation functions.

SubContracting.dll

6.4.52 05/06/2016 I1409158 Altered to support the new SQL Server based sxRuntime

sxControls.ocx

6.4.32 05/06/2016 I1409158 Altered to support the new SQL Server based sxRuntime
 I1602113 Orderstream no longer gets stuck in a infinite loop if it is accidentally connected to a database that is not an ActiveM (it doesn't have a Version table).

sxDashBoardControl.ocx

6.4.13 05/06/2016 I1605068 Corrected issue with the dashboard control when using the new SQL server based system Data in lieu of the old Access Based sxRuntime

sxEDIBridge.dll

6.4.28 05/06/2016 I1604128 Corrected issue with creating outbound Shipping EDI
 I1409132 An adjustment has been made to the EDI module customer combo box ensuring that it will only load customers that are marked as EDI and have open sales order, invoice/credit note or shipping EDI documents against those EDI customers.

sxMaintenance.dll

6.4.102 05/06/2016 I1602197 An adjustment has been made ensuring that the email field is populated if there are data against the selected sales rep.
 I1602210 The user defined control was renamed.
 I1603082 Advanced security has been added to the Company Setup form.
 I1604160 When using the Address Cleanup tool, the system will now look into the JobSites table when searching for unused Address records.
 I1605001 Corrected login logic on Employees/Sales Reps and Contacts for those using Time and attendance or web shop floor with login ability. Only when using the new SQL based sxRuntime

Seradex OrderStream

Technical Release Notes

May 2016

sxMaintenanceControls.ocx

6.4.1	05/06/2016	I1602269	In Application Preferences, the two options labelled 'Allow additional employees to log into a work center in Shop Floor' and 'Allow multiple employees to create Data Collection for the same operation in Shop Floor' have been made mutually exclusive.
		I1506243	Added a new Application Preference, Allow Modifications to Transfer on Cell Start, to allow modifying transfers that are created when starting an operation in Shop Floor Execution.

sxProfile.dll

6.4.10	05/06/2016	I1409158	Altered to support the new SQL Server based sxRuntime
		I1411136	The "Column Label" column has been added to the Control Security field on the Advanced Security Setup form.
		I1502150	Advanced Security no longer loads rows with missing required data.
6.4.11	05/13/2016	I1605142	Corrected an issue where an error would be thrown when accessing the Users form in the Profile Editor when OrderStream is not configured to use the SQL Server based sxSystem database.

sxProxy.exe

6.4.27	05/06/2016	I1506243	Added function calls to Spec Builder and Work Order SubWO update.
--------	------------	----------	---

sxRuntime.exe

6.4.33	05/06/2016	I1602113	Orderstream no longer gets stuck in a infinite loop if it is accidentally connected to a database that is not an ActiveM (it doesn't have a Version table).
		I1409158	Altered to support the new SQL Server based sxRuntime

sxRuntime.mdb

6.4.33	05/06/2016	I1505167	Added the necessary records to show the new Inventory Converter module under the production tab of the main OrderStream profile bar.
--------	------------	----------	--

sxUserDefineds.ocx

6.4.31	05/06/2016	I1501111	An adjustment has been made to the user defined date field ensuring that it's loading the date correctly according to the local machine short date.
--------	------------	----------	---

sxVersion.dll

6.4.7	05/06/2016	I1409158	Altered to read the files to perform version check upon from the new sxSystem Database vs the ActiveM
-------	------------	----------	---

sxWorkflow.ocx

6.4.11	05/06/2016	I1601175	By clearing the work flow name drop down box, users can now remove work flow assigned to documents.
		I1602139	Check if next task is inactive in work flow and not give work flow error as if the task was absent

Tooling.dll

6.4.18	05/06/2016	I1409158	Altered to support the new SQL Server based sxRuntime
		I1509169	Null values on forms should now be correctly handled by Data Validation.

WorkOrder.dll

6.4.123	05/06/2016	I1512170	The sub work order updating process when BOM changes are made to the top work order has been corrected to no longer associate incorrect ItemSpecs against existing sub work order lines when an item is a child of itself.
		I1506243	Work Order completion functionality will now look at the Override Spec created from the manual SFE Transfer.
		I1602210	The user defined control was renamed.
6.4.124	05/19/2016	I1511022	Modified to ensure that the work order completion process always produces the finished good item if the materials are consumed.
6.4.123	05/06/2016	I1603214	Modified to ensure that any partial work order completion using inventory back flushing works correctly when the application preference "Allow Multiple Inventory Transfer Generation from Work Order" is enabled.
		I1603090	Work Order lines Due Date now can change regardless of TR, DC or Lot/Serial attachment.
		I1601199	Modifications to show WorkOrder.Completed set to false if new line added to previously completed work order.
		I1604021	Updated the work order completion form to ensure the completion date is set correctly when including a line, regardless of the users system date format.
		I1603282	Adjusted the logic to ensure that double filter row doesn't get applied when processing.
		I1505167	Modified to include a new work order generation routine based on temporary tables that can be called from other modules.
